

VELFERÐARRÁÐUNEYTIÐ

Ministry of Welfare

REGULATION
on the education, rights and obligations of chiropractors
and criteria for granting of licences,
No. 1087/2012.

SECTION I
General provisions.

Article 1

Scope.

This Regulation applies to chiropractors licensed by the Medical Director of Health under Article 2.

SECTION II

Licences.

Article 2

Professional title.

The right to use the professional title of chiropractor and to practise as such in Iceland is confined to those who have been granted a licence by the Medical Director of Health.

Article 3

Criteria for granting of a licence.

A licence under Article 2 may be granted to those who have completed a university degree of at least four years, certified by ECCE (the European Council on Chiropractic Education) if it takes place in Europe, or a comparable institution or council if the education has taken place on another continent. Furthermore the university should be recognised as such by the health authorities in Iceland and the health authorities of the state in which the education took place.

Additionally, the applicant must have completed twelve months' supervised clinical training after graduation.

A licence may also be granted on the basis of education from a state within the European Economic Area (EEA) and Switzerland. Recognition of professional qualifications and competence of a chiropractor who meets the criteria of Directive 2005/36/EC, on the recognition of professional qualifications, with subsequent amendments, is subject to Regulation on recognition of professional qualifications and competence of healthcare practitioners from other EEA states, No. 461/2011, or to Nordic Convention on a common Nordic labour market for certain health professionals and veterinarians, No. 36/1993 (*cf.* Amendment No. 6/2001).

A licence may also be granted to those who have completed a comparable qualification from an educational institution in a state outside the EEA or Switzerland, which is recognised as such by Icelandic health authorities, and by health authorities in the state where the education took place.

An applicant for a licence under Article 2 who is from a state outside the EEA and Switzerland, with which Iceland has not made an agreement on recognition of professional qualifications and competence, shall submit *inter alia* documentary evidence of nationality, content and duration of education, in addition to an examination certificate, a licence if the profession is an authorised profession in the applicant's state of origin, intended employment in Iceland, and any other documents and certificates deemed by the Medical Director of Health to be necessary for the issue of a licence.
