Meld. St. 12 (2017–2018) Report to the Storting (white paper)

Health, safety and environment in the petroleum industry

Meld. St. 12 (2017–2018) Report to the Storting (white paper)

Health, safety and environment in the petroleum industry

Contents

1	Introduction	9	4.2.2	Experience from audits and investigations	35
1.1	The Government's foundation	9		Reports and notes of concern	35
1.2	The Government's assessments and conclusions	10	4.2.3	Research results and special reports	36
			4.2.4	Development in HSE status in the industry	36
2	The HSE regime in the Norwegian petroleum industry	13	4.3	Major accident risk	37
2.1	Regulations	13	4.4	Total indicator	37
2.1.1	The licensing system and the framework for the activity	13	4.4.1	Hydrocarbon leaks	38
2.1.2	Prudent activity requirement	15	4.4.2	Well control and well integrity	39
2.1.3	Development of the HSE regime ..	16	4.4.3	Leaks from risers, pipelines and subsea production facilities ...	40
2.1.4	Function-based requirements and use of standards	16	4.4.4	Structural damage and maritime incidents	40
2.2	The Petroleum Safety Authority's supervision	17	4.4.5	Acute discharges	41
2.2.1	The Petroleum Safety Authority ...	17	4.4.6	Barrier management	42
2.2.2	Audits at specific milestones	17	4.4.7	Maintenance management and technical condition	43
2.2.3	Supervision strategy and use of policy instruments	18	4.4.8	Onshore facilities	43
2.2.4	Investigation – follow-up and lessons learned after incidents and accidents	19	4.4.9	Working conditions, work-related health ailments and work injuries	43
2.2.5	Cooperation with other national authorities	20	4.5	Personal injuries and fatalities	44
2.2.6	International cooperation	21	4.5.1	Chemical working environment ...	44
2.3	Cooperation and participation	21	4.5.2	Physical working environment	46
2.3.1	Tripartite arenas	21	4.5.3	Ergonomic risk factors	47
			4.5.4	Organisational and psychosocial working environment	47
3	The petroleum industry	25	4.5.5	Shift work and night work	48
3.1	Operations concepts	25	4.5.6	Special topics	49
3.2	The player landscape	25	4.6	Development in the petroleum activities	49
3.3	Activity level	26	4.6.1	Multipurpose vessels	50
3.3.1	Production and reserves	27	4.6.2	Petroleum activities in the High North	51
3.3.2	Investments and exploration	27	4.6.3	Organisational changes	53
3.3.3	Mobile facilities	28	4.6.4	Digitalisation	54
3.3.4	Onshore facilities	29	4.6.5	ICT vulnerability and security	54
3.3.5	Supplier industry	29	4.6.6	Preparedness	54
3.3.6	Employment in the industry	29	4.6.7	Diving	56
3.3.7	Permanent, temporary employee or contract hire	30	4.6.8	Helicopter safety	57
3.3.8	Hours worked on mobile facilities and production facilities	31	4.6.9	Late phase	59
			4.6.10	Well plugging	60
			4.6.11	Disposal	60
			4.6.12		
4	Risk, development and follow-up	33	5	Follow-up of the HSE regime ...	63
4.1	Risk concept in the petroleum activity	33	5.1	Follow-up by the industry and companies	64
4.2	Basic data	33	5.2	Follow-up by the authorities	66
4.2.1	Risk level in Norwegian petroleum activity (RNNP)	34	5.2.1	Follow-up of the licensing system	66

5.2.2	The Petroleum Safety Authority's supervision	66	6	The Government's conclusions	75
5.2.3	Prioritised main topics for supervision	68	6.1	Expectations regarding the HSE level	75
5.2.4	Investigation of accidents and independent committee of inquiry	68	6.2	Follow-up of responsibility	75
5.2.5	Measures to reduce the cost level on the shelf	68	6.3	Regime for follow-up of health, safety and the environment	76
5.3	Participation and multipartite cooperation	69	6.4	Further development in the petroleum activities	76
5.4	Learning, exchange of experience and prevention	71	6.5	Knowledge and documentation	77
5.5	Organisation of regulations and use of standards	71	7	Financial and administrative consequences	79
5.6	Knowledge development	72			

Abbreviations

AMU	Working Environment Committee
AOC	Air Operator Certificate
AORF	Arctic Offshore Regulators Forum
BaSEC	Barents Sea Exploration Collaboration
CEN	The European Committee for Standardization
DFU	Defined hazard and accident situations
ECHA	European Chemicals Agency
EPPR	Emergency prevention, preparedness and response
HSE	Health, safety and the environment
ICT	Information and communication technology
IOGP	The International Association of Oil & Gas Producers
IRF	International Regulators Forum
ISO	The International Organization for Standardization
Kg/s	Kilograms per second
KonKraft	Konkuransekraft – norsk sokkel i endring <Competition – a changing Norwegian shelf>
NORSOK	The Competitive Position of the Norwegian Shelf
NSOAF	North Sea Offshore Authorities Forum
PIO	Plan for Installation and Operation
Ppm	Parts per million
PDO	Plan for Development and Operation
RNNP-AU	Risk level in the petroleum activity – acute pollution
RNNP	Risk level in Norwegian petroleum activity
Sm ³	Standard cubic metres
AOC	Acknowledgement of Compliance
APA	Awards in Predefined Areas
W2W	Walk to work
