

Merchant Shipping (Survey of Passenger Steamers) Rules

Table of Contents

1 Citation

Part I PASSENGER ACCOMMODATION

2 Application

NUMBER OF PASSENGERS

3 Number of passengers

4 Application to voyagers beyond Home trade limit

5 Voyages within Home trade limit

6 Voyages within Local trade limit

7 Voyages within 30 mile limit

8 Maximum number of passengers allowed

MEASUREMENT OF PASSENGER SPACES

9 Measurements

SPACES WHICH ARE NOT TO BE MEASURED, ETC.

10 Between deck houses

11 Sponsons

12 Overhanging decks

13 Well-decked ships

14 Limitation of length

15 Airing space

16 Deck in relation to Load Line

17 Inefficient erections

18 Minimum height

19 Lower hold

20 Passengers only allowed in measured spaces

21 Cattle on weather deck

22 Lamp room

23 Oil fuel spaces

24 Awnings

25 Height of rails and bulwarks

26 Deduction for cattle and stores, etc.

27 Arrangements when cattle are carried

28 Airing space not required

VENTILATION

29 Ventilation

30 General

31 Ventilation by cowls

32 Ventilation by mechanical systems

LIGHTING

33 Lighting

DOORS AND BOOBY HATCHES

34 Doors and booby hatches

STAIRWAYS

35 Stairways

WATER CLOSETS

36 Water closets

37 Latrines

WASHING PLACES

38 Washing places

FUEL, WATER AND PROVISIONS

39 Provisions

HOSPITAL ACCOMMODATION FOR UNBERTHED AND THIRD CLASS BERTHED PASSENGERS

40 Hospital

41 Medical officer

GALLEYS

42 Galleys

GOODS ON PASSENGER DECKS

43 Goods

DEPARTURE OF PASSENGER SHIPS

44 Procedure before departure

45 Penalties

Part II MANUFACTURE AND TESTING OF MATERIALS OF CONSTRUCTIONGENERAL

46 Materials for construction to conform with requirements of Part

47 Wrought iron, mild steel plates and sections for hulls

48 Selection and treatment of test-pieces

STANDARD TEST-PIECES

49 Standard tensile test-pieces

50 Bending test-pieces

51 Duplicate tests

52 Stamping of material

53 Freedom from defects, etc.

GENERAL REQUIREMENTS FOR BOILER STEEL

54 Process of manufacture

BOILER PLATES

55 Number and nature of tests

56 Tensile tests

57 Bending tests

58 Annealing

ANGLE, RIVET AND STAY BARS

59 Number and nature of tests

60 Tensile tests

61 Bending tests

62 Tests for rivets

WROUGHT IRON FOR COMBUSTION CHAMBER STAYS

63 Number and nature of tests

64 Tensile tests

65 Bending tests

BOILER TUBES

66 Solid drawn boiler tubes subject to internal pressure

67 Iron and steel tubes subject to external pressure

STEEL FORGINGS

68 Process of manufacture

69 Number and nature of tests

70 Tensile tests

71 Bending tests

72 Annealing

STEEL CASTINGS
