UNITED NATIONS

This document was prepared by Valeria Torres, Economic Affairs Officer of the Policies for Sustainable Development Unit of the Sustainable Development and Human Settlements Division of the Economic Commission for Latin America and the Caribbean (ECLAC). The work was reviewed and supervised by Carlos de Miguel, Chief of the Policies for Sustainable Development Unit, and Joseluis Samaniego, Chief of the Sustainable Development and Human Settlements Division. Danielle Andrade and Paula Chamas, consultants of the same division, collaborated in the review of the legal and institutional frameworks of the countries of Latin America and the Caribbean.

Valuable inputs and comments were received on earlier versions of the document from Charmaine Gomes, Elizabeth Thorne and Guillermo Acuña of ECLAC; Andrea Brusco and Mara Murillo of the United Nations Environment Programme (UNEP); Theodore Koukis of the United Nations Economic Commission for Europe; Jorge Sanin, Isis Márquez and Claudia de Windt of the Organization of American States (OAS); Constance Nalegach and Gabriel Mendoza of the Ministry of the Environment of Chile; Jorge Legorreta and Berta Helena de Buen Richkarday of the Secretariat of the Environment and Natural Resources (SEMARNAT) of Mexico; Alison Graña of the Directorate of Environment, Ministry of Foreign Affairs of Uruguay; Daniel Barragán and Sofia Suárez of the Ecuadorian Centre for Environmental Law; Patricia Madrigal of Coope Solidar R.L. of Costa Rica; Luisa Arauz of the Environmental Advocacy Center (CIAM) of Panama; Carolina Neme of GAIA Uruguay; Daniel Ryan and Pía Marchegiani of the Environment and Natural Resources Foundation (FARN) of Argentina; Ezequiel Santagada and Patricia Abed of the Institute of Environmental Law and Economics (IDEA) of Paraguay; and Carolle Excell and Andrea Sanhueza of the Global Secretariat of the Access Initiative.

This document was prepared with financial support from the United Nations Development Account project “Improving management of resources for the environment in Latin America and the Caribbean” and the Federal Ministry for Economic Cooperation and Development (BMZ) of Germany through the German Agency for International Cooperation (GIZ).

The opinions expressed in this document, which has not undergone formal editorial review, are the sole responsibility of the author and may not reflect the opinions of the Organization.

## Summary

---

This document reviews laws and institutional frameworks that safeguard Principle 10 of the Rio Declaration on Environment and Development of 1992, which refers to access to information, participation and justice in environmental matters, in the 33 countries of Latin America and the Caribbean. In addition to the information that was collected, a questionnaire on implementation of Principle 10 at the national level was circulated in the first quarter of 2013, which was completed by 16 countries in the region and 10 civil society organizations.

As shown in this document, despite the significant progress made over the past 20 years, many countries of the region have yet to enact legislation to facilitate the implementation of Principle 10 of the Rio Declaration, while others are encountering implementation difficulties. Now, more than ever, the Latin American and Caribbean region must seek the full implementation of Principle 10, given that it provides a clear, pioneering vision of transparency, justice and access to information as a basis for deepening democracy and eliminating global asymmetries. It is widely recognized that deepening democracy as a collective order calls for progress towards providing equal opportunities and rights. This means enforcing the rights of those sectors of society that have historically been marginalized from decision-making to access to information, participation and justice on environmental matters.
