This guide was prepared by the Working Group to Prepare a Methodological Guide on Time-use Measurement in Latin America and the Caribbean of the Statistical Conference of the Americas of the Economic Commission for Latin America and the Caribbean (ECLAC). It was translated in the framework of the United Nations Development Account project 2023Y, “Strengthening social protection for pandemic responses: identifying the vulnerable, aiding recovery and building resilience”. The Working Group was coordinated by Mexico (National Institute of Statistics and Geography (INEGI)) and the Division for Gender Affairs of ECLAC, the Statistics Division of ECLAC and the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) served as technical secretariat. The member countries are: Argentina (National Institute of Statistics and Censuses (INDEC)), Belize (Statistical Institute of Belize (SIB)), the Plurinational State of Bolivia (National Institute of Statistics (INE)), Brazil (Brazilian Institute of Geography and Statistics (IBGE)), Colombia (National Administrative Department of Statistics (DANE)), Costa Rica (National Institute of Statistics and Censuses (INEC)), Cuba (National Office of Statistics and Information (ONEI)), Dominican Republic (National Bureau of Statistics (ONE)), El Salvador (Department of Statistics and Censuses (DIGESTYC) and Salvadoran Institute for the Development of Women (ISDEMU)), Mexico (National Institute for Women (INMUJERES)), Paraguay (National Institute of Statistics (INE)), Peru (National Institute of Statistics and Informatics (INEI)) and Uruguay (National Institute of Statistics (INE) and National Women’s Institute (INMUJERES)). The United Nations Development Programme (UNDP) is also member of the Working Group.

Acknowledgements

The following participated in the discussions, research and writing of this document:

- Mexico (INEGI): Norma Luz Navarro Sandoval, Laura Katyna García Torres, María de los Ángeles Téllez Atonal, Selene Abril Montoya Alcalá, Laura Barbosa Castañeda
- Argentina (INDEC): Andrea Lorenzetti, Ayelén Martínez, Fabiana Ibáñez, Carolina Marciano, Gabriel Viú, Julia Pistonesi
- Belize (SIB): Daysi Montero
- Bolivia (Plurinational State of) (INE): Porfidia Ajata
- Brazil (IBGE): Maria Lucia França Pontes Vieira, Nayara Lopes Gomes
- Chile (INE): Diego Rodríguez, Verónica Valdivia, Karlla Muñoz Cáceres, Beatriz Castillo
- Colombia (DANE): Karen Andrea García Rojas, María Alejandra Lara, Camila Valentina Moreno Parrado
- Costa Rica (INE): Freddy Araya Arroyo, Aida Chaves Villalta
- Cuba (ONEI): Anays Montequín Jiménez; (Centre for Women's Studies (CEM) of the Federation of Cuban Women): Yelene Palmero García
- Dominican Republic (ONE): Farah Paredes, Yakayra Manuela Rodríguez
- El Salvador (DIGESTYC): Vilma Mejía, Irene Rodezno; (ISDEMU): Victoria Sánchez, Vilma Cornejo, Ana Giselle Quijano
- Mexico (INMUJERES): Celia Aguilar Setién, María Eugenia Medina Domínguez, Patricia Fernández Ham
- Paraguay (INE): Leticia Garrido, María Rosalba Bazán
- Peru (INEI): Cirila Gutiérrez Espino, Moisés Elías Paredes
- Uruguay (INE): Nubia Pagnotta, Andrea Macari; (INMUJERES): Florencia Semblat, Natalia Reyes
- UNDP: Guillermina Martín, Daniela de los Santos
- UN-Women: Teresa Guerra, Gerald Mora, Paz López
- Division for Gender Affairs of ECLAC: Iliana Vaca Trigo, Carolina Miranda, Lucía Scuro, Paula Aghon

Thanks are also due to Natalia Genta, María Eugenia Gómez, Valentina Perrotta and Irma Sandoval for their substantive contributions.

Contents

Introduction	9
Chapter I	
Time-use from a gender perspective in Latin America and the Caribbean	13
A. Distribution of time and reproduction of inequalities	13
B. Time-use surveys in Latin America and the Caribbean	14
1. International and regional regulatory frameworks and mandates	14
2. Time-use surveys	18
3. Origin of time-use studies	18
4. Background on methodological guidelines on time-use measurements	20
Chapter II	
The state of the art in time-use measurements in Latin American and Caribbean countries	21
A. First time-use measurement surveys in the region	25
B. Types of data collection	28
C. Types of instrument, reference periods, target population and preparatory activities for the field survey used in the region	30
1. Diary or questionnaire of stylized questions based on an activities list	30
2. Reference period	32
3. Target population	33
4. Type of respondent	33
5. Preparatory activities or activities prior to data collection	33
D. Activity classifications used and treatment of simultaneity	34
1. Activity classifications	34
2. Treatment of simultaneity	34
E. Data collection method	35
F. Dissemination and availability of information	36
G. Institutionalization of time-use measurements	37
H. Projections for future time-use measurements in the region	38
Chapter III	
Conceptual framework	41
A. New analytical frameworks for production and work	41
B. The production boundary	42
C. Definitions of all forms of work	44
D. Other basic definitions	47
E. Classification of time-use activities	48
Annex III.A1	50
Glossary	50

Chapter IV

Methodological aspects of time-use surveys	55
A. Specification of information needs and definition of objectives.....	56
1. Objectives of the surveys.....	57
B. Design of the time-use survey.....	58
1. Link between the conceptual framework and the measurement objective.....	58
2. Type of data collection: module or stand-alone survey.....	59
3. Collection instrument: diary or activities list.....	61
4. Data collection method: in person, by telephone or online.....	64
5. Data collection mechanism: mobile devices or physical forms.....	65
6. Data reference period.....	65
7. Target population, type of respondent, level of disaggregation and sample design.....	67
8. Simultaneous activities.....	69
C. Construction of the time-use survey.....	69
D. Data collection.....	71
1. Issues to be considered for data collection in times of crisis.....	71
E. Processing of the data.....	73
F. Analysis of the data.....	74
G. Dissemination of the data.....	76
H. Evaluation of the process and lessons learned.....	77
1. Population heterogeneity within the country.....	77
2. Operational problems in the fieldwork.....	77
3. Problems with the information technology system.....	77
4. Problems related to the technical teams.....	78
5. Problems in capturing specific populations.....	79
6. Resource difficulties in guaranteeing continuity in the application of time-use measurement.....	79
7. Definition of the time of the year and its influence on results.....	80
8. Problems with time estimation among the interviewees.....	80
9. Greater prioritization of time-use surveys in national statistical systems.....	80
10. Underestimation of care work.....	81
11. Complements with other sources of information.....	81

Chapter V

Minimum set of time-use activities for Latin America and the Caribbean: an instrument for progressing towards international comparability	83
A. Background: the proposed minimum harmonized instrument for collecting time-use data of the Statistical Commission of the United Nations.....	84
B. Constraints on achieving comparability on the basis of a regional minimum list.....	84
1. Inclusion of questions with a higher level of disaggregation than proposed in the standardized list.....	84
2. Possible differences in phrasing or explanatory notes.....	85
3. Existence of different reference periods between surveys.....	85
C. Minimum Set of Time-Use Activities for Latin America and the Caribbean.....	85
D. Standard time use questionnaire and important considerations for its use.....	89
1. Important considerations for using the standard time-use module question proposal.....	91
2. Standard time-use questionnaire for Latin America and the Caribbean.....	92
Annex V.A1.....	99

Chapter VI

Time-use data for public policy: experiences and challenges	101
A. Information needs for public policies	101
B. The contribution made to care policies by data on time-use and unpaid work	102
1. Integrated National Care System (SNIC) in Uruguay	104
2. Towards a national care policy for Paraguay	105
3. National care network and child development in Costa Rica	105
4. Towards a national care system in Mexico	105
5. Guide on care co-responsibility of the National Support and Care System of the Chilean Ministry of Social Development	106
6. Bogotá District Development Plan 2020–2024, Colombia	106
7. National Programme for the Advancement of Women, Cuba	107
8. Towards a comprehensive care policy with a gender perspective, Argentina	107
C. The contribution of data on time use and unpaid work in the labour domain	108
D. The contribution of data on time use and unpaid work in other area	111
1. Poverty reduction policies	111
2. Natural resource policies	112
3. Urban development and transportation policies	112
4. Health policies	113
E. Economic value of unpaid work	113
F. Challenges for strengthening measurement and making increased use of time-use survey data	115
Bibliography	117

Tables

Table II.1	Latin America and the Caribbean (22 countries): official time-use measurements by type of data collection, 1985–2020	23
Table II.2	Latin America (6 countries): pilot tests of time use measurement	25
Table II.3	Latin America and the Caribbean: heterogeneity in time-use measurements according to number of questions and level of disaggregation of the activities	28
Table II.4	Latin America and the Caribbean (18 countries): dissemination and availability of information from statistical programmes on time use	36
Table II.5	Latin America and the Caribbean (7 countries): examples of rules establishing the collection of time-use data	38
Table II.6	Latin America and the Caribbean (9 countries): time-use measurements projected for 2020–2024	39
