# Economic analysis based on input-output tables

## Definitions, indicators and applications for Latin America

José E. Durán Lima  
Santacruz Banacloche

European Union regional  
facility for Latin America  
and the Caribbean

**FEALAC**

Forum for East Asia-Latin America Cooperation

This document was prepared by José Durán Lima, Chief of the Regional Integration Unit of the International and Integration Trade Division of the Economic Commission for Latin America and the Caribbean (ECLAC), and Santacruz Banacloche, consultant with same Division. It is based on the findings of studies carried out under the research programme of the Regional Integration Unit, as part of the activities of the projects "Input-Output Tables for Industrial Policy in Latin America and the Caribbean" and "Development of value chains for deeper integration between Latin America and Asia-Pacific", financed by the United Nations Development Account and the Forum for East Asia-Latin America Cooperation (FEALAC) Trust Fund. The project "Fostering sustainable development models in Latin American and Caribbean countries: a multidimensional approach for the post-COVID 19 world" also provided funding for this publication, which forms the theoretical basis of the value chain analysis carried out for that project.

The following also participated in the preparation of the document: Sebastián Castresana, Mario Saeteros, Andrés Mondaini and Álvaro Lalanne.

The authors wish to thank Dayna Zaclicever for her substantive input and useful comments, and Daniel Cracau for his technical review of and contributions to the document.

Neither the European Union nor any person acting on its behalf is responsible for the use that might be made of the information contained in this publication. The opinions expressed are those of the author(s) only and should not be considered as representative of the European Union's official position.

The views expressed in this document, which has been reproduced without formal editing, are those of the authors and do not necessarily reflect the views of the Organization or the countries it represents.

## Contents

<b>Introduction .....</b>	<b>9</b>
<b>I. The Input-Output Table as a tool for economic analysis .....</b>	<b>13</b>
A. Regional Input-Output Tables: Latin America's IOT .....	18
B. Multi-Regional Input-Output Table (MRIOT) Databases .....	20
C. Assumptions and Limitations of the Input-Output Model .....	22
<b>II. Basic indicators .....</b>	<b>25</b>
A. Calculation of GDP by country and sector .....	25
B. Ratio of imported inputs over domestic inputs .....	31
C. Imported inputs required in production .....	35
D. Production linkages, backward and forward linkages .....	36
E. Rasmussen and Hirschman index .....	38
F. Average propagation length .....	42
G. Dependence on imported inputs .....	44
<b>III. Vertical specialization .....</b>	<b>49</b>
A. Direct imported content on exports (EV1) .....	50
B. Total content (direct and indirect) imported over exports (EV2) .....	53
<b>IV. Value Added Indicators .....</b>	<b>57</b>
A. Domestic value added contained in exports .....	57
1. Domestic value-added contained in intermediate and final exports .....	59
2. Domestic value added in exports by country of destination .....	61
3. Domestic value added contained in services exports .....	62
4. Breakdown of <i>ADVe</i> : compensation of employees vs. gross operating surplus .....	62
B. Foreign value added contained in exports .....	63
C. Decomposition of value added in exports .....	64

<b>V. Extensions and applications of input-output tables</b> .....	73
A. Estimate of employment associated with exports .....	74
B. Carbon footprint .....	76
<b>VI. Conclusions</b> .....	79
<b>Bibliography</b> .....	81

## Tables

Table 1	Regional and Multi-Regional Databases of MRIO (Multi-Regional Input-Output) .....	21
Table 2	Brazil: Rasmussen-Hirschman indexes .....	40
Table 3	Bolivia (Plur. State of): sectoral characterization by import dependency index, 2014 .....	47
Table 4	Latin America (11) breakdown of gross exports by domestic value added and imported inputs incorporated, 2017 .....	67
Table 5	Breakdown of gross exports by domestic value added and imported inputs incorporated, 2017 .....	69

## Figures

Figure 1	South America: GDP by country, 2005 and 2011 .....	26
Figure 2	Latin America: GDP by country, 2014 .....	27
Figure 3	South America: GDP by sector .....	28
Figure 4	South America: sectoral share of GDP by country of origin, 2005 and 2014 .....	30
Figure 5	Ratio of imported inputs to domestic inputs in South American countries .....	31
Figure 6	South America: IIR, three major sectors, 2005 .....	32
Figure 7	South America: intra-regional imported intermediate inputs by country of origin, 2005 .....	33
Figure 8	Uruguay: ratio of imported inputs over domestic inputs, main sectors .....	34
Figure 9	Ratio of imported inputs to GDP in South American countries .....	36
Figure 10	Brazil: key sectors according to the HRI and their share in GDP .....	41
Figure 11	Bolivia (Plur. State of): structure of imported inputs of the production function of large economic sectors, by sector of origin, 2014 .....	48
Figure 12	Peru: direct import content (by origin) over exports (EV <sub>1</sub> ), 13 major categories, 2005 .....	51
Figure 13	Peru: direct import content of exports, by destination (EV <sub>1</sub> ), 13 major categories, 2005 .....	52
Figure 14	Vertical Specialization in South American Countries, 2005 and 2011 .....	54
Figure 15	Uruguay: domestic value added in exports .....	59
Figure 16	Domestic value-added contained in exports, 2005 .....	60
Figure 17	Domestic value added contained in intra-regional exports, 2005 .....	61
Figure 18	Peru: domestic value added contained in exports .....	61
Figure 19	Share of services in South America's exports .....	62
Figure 20	Share of compensation of employees and gross operating surplus in total exports .....	63
Figure 21	Differences between main value-added indicators and vertical specialization .....	64
Figure 22	Latin America (11) breakdown of gross exports by domestic value added and imported inputs incorporated, 2017 .....	68
Figure 23	Latin America (18 countries): domestic value added contained in exports, by main destinations, 2017 .....	70
Figure 24	Latin America (11 countries): structure of imported content of total exports, by origin, 2017 .....	71

Figure 25	Latin America (selected countries): structure of imported content embodied in exports, by major economic sectors, 2017 .....	72
Figure 26	Uruguay: export employment by main destinations and benefited sectors.....	75
Figure 27	Colombia: producer and consumer responsibility, main sectors, 2005 .....	78

## Diagrams

Diagram 1	Simplified example of GVC.....	10
Diagram 2	Process followed for the assembly of the IOT .....	11
Diagram 3	Simplified structure of a national symmetrical IOT .....	14
Diagram 4	Regional and Multiregional Input-Output Table Structure .....	15
Diagram 5	Classification of economic sectors according to the Rasmussen-Hirschman indexes .....	39
Diagram 6	Steps required to connect sector $i$ to sector $j$ .....	43
Diagram 7	Classification of economic sectors according to the dependency indexes for the import matrix, most representative sectors.....	45
Diagram 8	Structure of gross exports according to domestic value added and imported inputs incorporated .....	66
