FOREWORD

The Statistical Development Series is a sequence of comprehensive technical manuals on various aspects of the statistical programmes which make up a national information system for food and agriculture. Organization of agricultural censuses, surveys and other data sources is the most important part of these programmes. In the Statistical Development Series emphasis is placed on the need to conceptualize data sources within the framework of a national information system which requires standardized concepts and minimizes duplication of effort.

The supplement is published following the recommendation of the Study Group on Food and Agricultural Statistics in Europe that a supplement should be prepared to the Programme for the 1990 World Census of Agriculture addressing the particular conditions of Europe. It contains specific recommendations for countries in the European Region with regard to agricultural censuses.

Helmut Schumacher  
Director, Statistics Division

CONTENTS

	<u>Paragraphs</u>
PART I: PURPOSES AND CONTEXT	
Introduction	1- 2
Structure of Part II	3- 4
The System Document	5- 11
PART II: THE WORLD PROGRAMME AND EUROPEAN MODIFICATIONS	
Section 1:	
Introduction	12- 18
Section 2:	
Methodological Considerations	
Objectives	19- 21
Census scope	22- 23
Statistical Unit and Coverage	24- 26
Frequency, Time Reference, Enumeration Period	27- 29
Complete or Sample Enumeration	30- 31
Census Frame	32- 33
Non-sampling Errors, Data Processing, Analysis	34- 36
Section 3:	
Proposed Census Items	
(- introduction)	37- 41
01: Identification	42- 43
02: General Characteristics	44- 47
03: Demographic Characteristics	48- 49
04: Employment	50- 55
05: Land and Water	56- 69
06: Crops	70- 76
07-08: Livestock	77- 81
09: Machinery and Equipment	82- 86
10: Buildings	87- 88
11: Ancillary Activities	89- 90
List of Items for the European Region	91+Table
Further Items for Consideration	92

Section 4:	
Tabulation Programme	
(- introduction)	93- 95
Summary Statistics	96- 97
The Tabulation Schema	98- 99
Priority Tables	100-103
Further Tables and Data	104-108
Class Intervals	109-110
Section 5:	
Guidelines for Taking a Census	
(- introduction)	111-112
Selected Topics:	
Typology	113-117
Advance Estimates	118-119
Tabulation Software	120
Error Correction	121-122
Secondary Data	123-124
Microcomputers	125-127
User Access to Data	128
Research into Methods	129-130

## PART I: PURPOSES AND CONTEXT

### Introduction

1. The main programme document for the 1990 World Census of Agriculture (hereafter called the World Programme or WP, for short) has been prepared for use in all countries of the world. However, particular considerations may apply within different regional groupings of countries across the world. The purpose of this European Supplement to the World Programme is to set out the considerations which are likely to apply to countries within the European region, broadly defined. Many of these countries have relatively well developed systems of agricultural statistics.

2. For this purpose the European Region is defined as comprising the following countries:

Albania	Germany, Federal	Poland
Austria	Republic of	Portugal
Belgium	Greece	Romania
Bulgaria	Hungary	Spain
Byelorussian SSR	Iceland	Switzerland
Canada	Ireland	Turkey
Cyprus	Israel	Ukrainian SSR
Czechoslovakia	Italy	USSR
Denmark	Luxembourg	United Kingdom
Finland	Malta	USA
France	Netherlands	Yugoslavia
German Democratic Republic	Norway	

Nearly all are members of the United Nations Economic Commission for Europe and many of them participate in the regular Study Group for the examination and discussion of questions of European agricultural statistics held under the joint auspices of the Food and Agriculture Organization, the Economic Commission for Europe, and the Conference of European
