1970 WORLD CENSUS OF AGRICULTURE

REGIONAL PROGRAM FOR EUROPE

1970 WORLD CENSUS OF AGRICULTURE

REGIONAL PROGRAM FOR EUROPE

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS
ROME 1967

PREFACE

The Thirteenth Session of the FAO Conference, in its Resolution No. 3/65 on the 1970 World Agricultural Census, emphasized the role and the importance of agricultural censuses in development planning and in improving current agricultural statistics, and approved for distribution among Member Nations of the Organization and nonmembers the Program for the 1970 World Census of Agriculture, as finalized by the Statistics Advisory Committee.

The 1970 World Census Program covers a great variety of conditions in different parts of the world. Within the framework of this Program regional census programs have been prepared. The Regional Program for Europe consists of two parts:

I — World Program

II — European Supplement to the World Program

The aim of the Supplement is to indicate modifications in the World Program to adapt it to the conditions and needs prevailing in the European region. The Supplement has been prepared on the basis of recommendations obtained from the Sixth Session of the FAO/ECE Study Group on Food and Agricultural Statistics in Europe, held in Geneva (Switzerland), from 15 to 19 August 1966. The Study Group recommended a number of additions and modifications required to obtain within-regional

comparability of items where it would not be possible to achieve worldwide comparability.

As in 1960, the items proposed for the present Program are printed in two distinct types, **bold** and ordinary. The list consisting of those items printed in **bold type**, whether in the World Program or in the Supplement, is called the "Short List." The "Expanded List" consists of all items, whether printed in bold type or ordinary. The "Short List" items are considered to be of major importance in the world and/or regional agriculture and data on these items are desired to be collected from all countries of Europe. However, no country is expected to collect information concerning an item which is of little or no importance to the country itself, even though that is included in the Short List. The items in the Expanded List, which are not in the Short List, are those which the countries may wish to add to the Short List according to their needs and conditions when making their census plans.

The Regional Program consists of 11 sections numbered from 0 to 10. Sections 7 to 9 of the World Program remain unchanged for Europe and, accordingly, no mention is made of these sections in the Supplement. In order to facilitate reading of this Regional Program, additions and modifications to the World Program outlined in the Supplement are indicated hereafter.
