Taxing Health: The Relevance of Tariff Revenue from Anti-malarial Commodities

Geneva: ITC, 2011. ix, 35 pages (Technical paper)

Doc. No. MAR-11-202.E

Paper dealing with potential fiscal revenue losses in malaria endemic countries, resulting from elimination of import duties and tariffs on anti-malaria products (medicines for treating/preventing of malaria, diagnostic tests, mosquito nets, insecticides for indoor residual spraying, and pumps for spraying indoor insecticides); examines the size of possible fiscal revenue losses if tariff rates on such products were cut off in countries with high and medium malaria endemic rates; includes bibliography (pp. 35).

Descriptors: **Trade Barriers, Tariffs, Taxes, Pharmaceuticals, Medicaments, Medical supplies, Insecticides, Nets, Pumps.**

For further information on this technical paper, contact Ms. Ursula Hermelink, hermelink@intracen.org

English

The International Trade Centre (ITC) is the joint agency of the World Trade Organization and the United Nations.

ITC, Palais des Nations, 1211 Geneva 10, Switzerland (www.intracen.org)

Views expressed in this paper are those of consultants and do not necessarily coincide with those of ITC, UN or WTO. The designations employed and the presentation of material in this paper do not imply the expression of any opinion whatsoever on the part of the International Trade Centre concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Mention of firms, products and product brands does not imply the endorsement of ITC.

This technical paper has not been formally edited by the International Trade Centre.

The paper was commissioned by the Academy for Educational Development – Applied Research and Technical Services, LLC (AED-ARTS) for the Malaria Taxes and Tariffs Advocacy Project (M-TAP), and was jointly financed by M-TAP and the International Trade Centre (ITC). It was prepared by Ursula Hermelink and Carla Vaca-Eyzaguirre, Associate Market Analysts, under the supervision of Mondher Mimouni, Chief ad-interim, Market Analysis and Research of ITC. The contributions of the data processing team at the Market Analysis and Research Section / Division of Market Development of the International Trade Centre, in particular of Xavier Pichot and Christophe Durand, are greatly acknowledged. Yvan Decreux and Olga Skorobogatova are to thank for their useful comments and suggestions. On the side of M-TAP, special thanks are due to Halima Mwenesi (AED-ARTS), Elisabeth Sommerfelt (AED) and Richard Tren (Africa Fighting Malaria), in particular for their support in seeking to determine the relevant tariff lines for anti-malarial commodities.
