NOTE

The United Nations Conference on Trade and Development (UNCTAD) serves as the lead entity within the United Nations Secretariat for matters related to science and technology as part of its work on the integrated treatment of trade and development, investment and finance. The current UNCTAD work programme is based on the mandates set at quadrennial conferences, as well as on the decisions of the General Assembly of the United Nations and the United Nations Economic and Social Council that draw upon the recommendations of the United Nations Commission on Science and Technology for Development, which is served by the UNCTAD secretariat. The UNCTAD work programme is built on its three pillars of research analysis, consensus-building and technical cooperation, and is carried out through intergovernmental deliberations, research and analysis, technical assistance activities, seminars, workshops and conferences.

This series of publications seeks to contribute to exploring current issues in science, technology and innovation, with particular emphasis on their impact on developing countries.

The term “country” as used in this study also refers, as appropriate, to territories or areas. In addition, the designations of country groups are intended solely for statistical or analytical convenience and do not necessarily express a judgment about the stage of development reached by a particular country or area.

ACKNOWLEDGEMENTS

This study was prepared with the overall guidance of Shamika N. Sirimanne, Director of the Division on Technology and Logistics and by a team comprising Dong Wu (team leader), Claudia Contreras, Laura Cyron, Abiy Solomon and Jannate Tamsamani under the supervision of Angel Gonzalez Sanz, Chief, Science, Technology and ICT Branch.

The report benefited from major substantive contribution by Xiaolan Fu (Department of International Development, University of Oxford), principal consultant for the study.

UNCTAD appreciates valuable inputs provided by the Governments of the Plurinational State of Bolivia, Bulgaria, Canada, Germany, Kenya, Latvia, Poland, Portugal, South Africa, Turkey, Uganda, the United Kingdom of Great Britain and Northern Ireland and the United States of America, as well as from the United Nations Major Group for Children and Youth.*

The publication benefited significantly from discussions and inputs during the intersessional panel of the United Nations Commission on Science and Technology for Development (November 2017), as well as the twenty-first session of the Commission (May 2018).

Magali Studer designed the cover. Stephanie Kermoal provided administrative support.
