“Don't let your past dictate your future”

Proverb from Sierra Leone

What are the least developed countries?

Forty-nine countries are currently designated by the United Nations as “least developed countries” (LDCs). These are: Afghanistan, Angola, Bangladesh, Benin, Bhutan, Burkina Faso, Burundi, Cambodia, Central African Republic, Chad, Comoros, Democratic Republic of the Congo, Djibouti, Equatorial Guinea, Eritrea, Ethiopia, the Gambia, Guinea, Guinea-Bissau, Haiti, Kiribati, Lao People’s Democratic Republic, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mozambique, Myanmar, Nepal, Niger, Rwanda, Samoa, Sao Tome and Principe, Senegal, Sierra Leone, Solomon Islands, Somalia, South Sudan, Sudan, Timor-Leste, Togo, Tuvalu, Uganda, United Republic of Tanzania, Vanuatu, Yemen and Zambia.

The list of LDCs is reviewed every three years by the United Nations Economic and Social Council in the light of recommendations by the Committee for Development Policy (CDP). The following three criteria were used by CDP in the latest review of the list, in March 2012:

- (a) a **per capita income** criterion, based on a three-year average estimate of the gross national income (GNI) per capita, with a threshold of \$992 for possible cases of addition to the list, and a threshold of \$1,190 for graduation from LDC status;
- (b) a **human assets** criterion, involving a composite index (the Human Assets Index) based on indicators of:
 - (i) nutrition (percentage of the population that is undernourished);
 - (ii) health (child mortality rate);
 - (iii) school enrolment (gross secondary school enrolment ratio); and
 - (iv) literacy (adult literacy rate); and
- (c) an **economic vulnerability** criterion, involving a composite index (the Economic Vulnerability Index) based on indicators of:
 - (i) natural shocks (index of instability of agricultural production; share of the population that has been a victim of natural disasters);
 - (ii) trade-related shocks (index of instability of exports of goods and services);
 - (iii) physical exposure to shocks (share of the population living in low-lying areas);
 - (iv) economic exposure to shocks (share of agriculture, forestry and fisheries in gross domestic product (GDP));
 - (v) index of merchandise export concentration);
 - (vi) smallness (population in logarithm); and
 - (vi) remoteness (index of remoteness).

For all three criteria, different thresholds are used for identifying cases of addition to, and graduation from, the list of LDCs. A country will qualify to be added to the list if it meets the addition thresholds on all three criteria and does not have a population greater than 75 million. Qualification for addition to the list will effectively lead to LDC status only if the Government of the relevant country accepts this status. A country will normally qualify for graduation from LDC status if it has met graduation thresholds under at least two of the three criteria in at least two consecutive triennial reviews of the list. However, if the per capita GNI of an LDC has risen to a level at least double the graduation threshold, the country will be deemed eligible for graduation regardless of its performance under the other two criteria.

The General Assembly, through a resolution adopted on 18 December 2012, endorsed (with immediate effect) CDP's March 2012 recommendation to add South Sudan to the list of LDCs. South Sudan became an independent State on 9 July 2011 and a Member State of the United Nations five days later.

Only three countries have so far graduated from LDC status: Botswana in December 1994, Cape Verde in December 2007 and Maldives in January 2011. In March 2009, CDP recommended the graduation of Equatorial Guinea. This recommendation was accepted by the Council in July 2009, but as of September 2013, the Assembly had not confirmed the decision. In September 2010, the Assembly, giving due consideration to the unprecedented losses Samoa suffered as a result of the Pacific Ocean tsunami of 29 September 2009, decided to defer to 1 January 2014 the graduation of that country. The Council in July 2012 endorsed CDP's recommendation to graduate Vanuatu from LDC status, a decision the Assembly had not yet confirmed as of September 2013.

After a recommendation to graduate a country has been endorsed by the Economic and Social Council and confirmed by the General Assembly, the graduating country is granted a three-year grace period before graduation effectively takes place. This grace period, during which the country remains an LDC, is designed to enable the graduating State and its development and trading partners to agree on a “smooth transition” strategy, so that the loss of LDC status at the time of graduation does not disrupt the country’s socio-economic progress. A "smooth transition" measure generally implies extending for a number of years after graduation, for the benefit of the graduated country, a concession from which the country used to benefit by virtue of its LDC status.

Acknowledgements

The Least Developed Countries Report 2013 was prepared by a team consisting of Agnès Collardeau-Angleys, Junior Davis, Pierre Encontre, Igor Paunovic, Madasamyraja Rajalingam, Rolf Traeger and Heather Wicks (the LDC Report team). The work was carried out under the guidance and supervision of Taffere Tesfachew, Director, Division for Africa, Least Developed Countries and Special Programmes, who also made significant inputs to the structure and content of the Report.

An ad hoc expert group meeting on “Growth with employment for inclusive and sustainable development” was held in Geneva on 3 and 4 July 2013 to peer-review the Report and its specific inputs. It brought together specialists in the fields of labour economics, development policies, public works, industrial policy and financing for development. The participants in the meeting were: Ludovico Alcorta (United Nations Industrial Development Organization), Christoph Ernst (International Labour Office), Charles Gore (University of Glasgow), Massimiliano La Marca (International Labour Office), Woori Lee (International Labour Office), Moazam Mahmood (International Labour Office), Pedro Martins (Overseas Development Institute), Irmgard Nübler (International Labour Office) and Aurelio Parisotto (International Labour Office), as well as the members of the LDC Report team and the following UNCTAD colleagues: Chantal Dupasquier, Mahmoud Elkhafif, Samuel Gayi, Ricardo Gottschalk, Kalman Kalotay, Jörg Mayer, Patrick Osakwe and Astrit Sulstarova. The papers reviewed at the meeting had been prepared by Junior Davis, Igor Paunovic and Rolf Traeger.

The Report draws on background papers prepared by Chalapurath Chandrasekhar, Jayati Ghosh and Anna McCord. Jayati Ghosh provided the substantive editing and contributed to the overall Report. Evangelia Bourmpoula, Marie-Claire Sodergren and Christina Wieser (International Labour Office) made available the ILO Laborsta and Employment Trends (EMP/TRENDS) econometric model databases.

Erica Meltzer edited the text. Sophie Combette designed the cover. Heather Wicks and Maria Bovey provided secretarial support.

Madasamyraja Rajalingam did the overall layout, graphics and desktop publishing.
