EDITORIAL STATEMENT

*Transnational Corporations*¹ is a longstanding, policy-oriented, refereed research journal on issues related to investment, multinational enterprises and development. It is an official journal of the United Nations, managed by the United Nations Conference on Trade and Development (UNCTAD). As such it has global reach, a strong development policy imprint and high potential for impact beyond the scholarly community. There are no fees or article processing charges associated with submitting to or publishing in *Transnational Corporations*. All articles of the online version of the journal are open access and free to read and download for everyone.

Aims and scope

The journal aims to advance academically rigorous research to inform policy dialogue among and across the business, civil society and policymaking communities. Its central research question – feeding into policymaking at subnational, national and international levels – is how cross-border investment, international production, multinational enterprises and other international investment actors affect sustainable development. The journal invites contributions that provide state-of-the-art knowledge and understanding of the activities conducted by and the impact of multinational enterprises and other international investors, considering economic, legal, institutional, social, environmental or cultural aspects.

The journal welcomes submissions from a variety of disciplines, including international business, innovation, development studies, international law, economics, political science, international finance, political economy and economic geography. Interdisciplinary work is especially welcomed. The journal embraces both quantitative and qualitative research methods, and multiple levels of analyses at macro, industry, firm or individual/group level.

Transnational Corporations aims to provide a bridge between academia and the policymaking community. It publishes academically rigorous, research-underpinned and impactful contributions for evidence-based policy analysis and policymaking, including lessons learned from experiences in different societies and economies, in both developed- and developing-country contexts. It welcomes contributions from the academic community, policymakers, research institutes, international organizations and others.

In addition, *UNCTAD Insights* articles feature original research by UNCTAD staff, frequently conducted in collaboration with researchers from other organizations, universities and research institutions. The aim of the *UNCTAD Insights* articles is to

¹ Previously: *The CTC Reporter*. In the past, the Programme on Transnational Corporations was carried out by the United Nations Centre on Transnational Corporations (1975–1992) and by the Transnational Corporations and Management Division of the United Nations Department of Economic and Social Development (1992–1993).

advance and support research on investment and development, in line with UNCTAD's work programme, catalysing further work and helping to set a policy-relevant research agenda.

Unique benefits for authors: direct impact on policymaking processes

Through UNCTAD's wider development community and its global network of investment stakeholders, the journal reaches a large audience of academics, business leaders and policymakers. UNCTAD's role as the focal point in the United Nations system for investment issues guarantees that its contents gain significant visibility and contributes to debates in global conferences and intergovernmental meetings, including the biennial *World Investment Forum* and the Investment and Enterprise Commission. The research published in *Transnational Corporations* feeds directly into UNCTAD programmes related to investment for development, including its flagship product, the annual *World Investment Report*, and its technical assistance work (investment policies reviews, investment promotion and facilitation and investment treaty negotiations) in more than 160 countries and regional organizations. The journal thus provides a unique venue for authors' academic work to contribute to, and have an impact on, national and international policymaking.
