# UNDP LOW EMISSION CAPACITY BUILDING (LECB) PROGRAMME

This product was developed under the LECB Programme, with generous funding from the European Commission (EC), the German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB), and the Australian Government.

The UNDP Low Emission Capacity Building (LECB) Programme is a country-driven initiative that promotes essential cooperation between relevant institutions, engaging the public sector and industry in a concerted effort to design and implement approaches to low emission development that are consistent with national development priorities. National counterparts are supported to strengthen technical and institutional capacities to identify and formulate Nationally Appropriate Mitigation Actions (NAMAs) and Low Emission Development Strategies (LEDS) in the public and private sectors, and to strengthen the underlying greenhouse gas inventory management and Measurement, Reporting and Verification (MRV) systems.

The LECB Programme runs through 2016 and is active in 25 countries: Argentina, Bhutan, Chile, China, Colombia, Costa Rica, the Democratic Republic of Congo (DRC), Ecuador, Egypt, Ghana, Indonesia, Kenya, Lebanon, Malaysia, Mexico, Moldova, Morocco, Peru, Philippines, Tanzania, Thailand, Trinidad and Tobago, Uganda, Vietnam and Zambia.

The programme is supported through generous contributions from the European Commission, the German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB), and the Government of Australia.

More information can be found at [www.lowemissiondevelopment.org](http://www.lowemissiondevelopment.org)

## TABLE OF CONTENTS

List of Figures	6
List of Tables	6
Abbreviations and Acronyms	8
Executive Summary	11
1. Introduction	14
1.1 Energy Access and Development	14
1.2 Nationally Appropriate Mitigation Actions (NAMAs) and Intended Nationally Determined Contributions (INDCs)	15
1.3 NAMA as an Opportunity for Ghana	16
1.4 Purpose and Objectives of the NAMA	17
2. Background on Ghana	18
2.1 Geography and Administrative Divisions	18
2.2 The Economy	19
2.3 Demography	19
2.4 Socio–Economic Conditions	20
2.5 National Development Strategies and Targets	20
2.5.1 Ghana’s Vision 2020	21
2.5.2 Ghana Shared Growth and Development Agenda II (GSGDA II)	22
2.5.3 Ghana’s Vision 2057	23
2.5.4 The Millennium Development Goals (MDGs)	23
2.5.5 The Sustainable Development Goals	24
2.5.6 Ghana’s INDC	25
2.6 Current Situation and Trends in the Energy Sector	25
2.6.1 Sector Overview	25
2.6.2 Electricity Supply and Electrification	26
2.6.3 Modern Energy Services for Cooking	28
2.7 Relevant Stakeholders	34
2.7.1 Government Ministries/Departments/Agencies	36
2.7.2 NGOs/Research Institutions	39
2.7.3 Private Sector Entities	40
2.7.4 Barriers Facing the Energy Sector	42

3.	Policy Analysis	44
3.1	Relevant National and Sector Strategies and Policies	46
3.1.1	The Ghana National Climate Change Policy (NCCP)	46
3.1.2	The National Energy Policy (NEP)	46
3.1.3	Ghana Sustainable Energy for All Action Plan (SE4ALL)	47
3.1.4	The National Policy of LPG Promotion	47
3.1.5	The Strategic National Energy Plan (SNEP)	47
3.1.6	The National Electrification Scheme (NES)	48
3.1.7	The Renewable Energy Act 2011 (Act 832)	48
3.1.8	The Ghana Energy Development and Access Project (GEDAP)	49
3.1.9	The Solar Lantern Distribution Programme	49
3.1.10	The 200,000 Solar Rooftop Programme	50
3.1.11	The SWITCH Africa Green (SAG) project	50
3.1.12	Scaling-up Renewable Energy Program (SREP)	50
3.2	National Policies: Observations and Gaps	51
3.3	NAMA Alignment with National and Sectoral Strategies and Policies	52
3.4	National Targets	55
4.	Baseline Information and NAMA Targets	56
4.1	The NAMA Boundary	56
4.2	Baseline Scenario	57
4.2.1	Baseline Scenario for Intervention 1	57
4.2.2	Baseline Scenario for Intervention 2	58
4.3	GHG Baseline and Mitigation Targets	60
4.3.1	Mitigation Targets under Intervention 1	61
4.3.2	GHG Emissions Targets under Intervention 1	64
4.3.3	Mitigation Targets under Intervention 2	64
4.3.4	GHG Emission Targets under Intervention 2	74
4.4	NAMA Sustainable Development Baseline and Targets	75
4.5	Summary of NAMA Targets	77
4.6	Transformational Change	78
5.	Measures & Interventions under the NAMA	80
5.1	Setting the Context	81
5.1.1	The Boundary Conditions for the NAMA Interventions	82

5.1.2	Synergies offered by Two Types of Clean Energy Technologies	83
5.1.3	Private Sector Participation	84
5.1.4	Eligibility Criteria	84
5.1.5	International Context	85
5.1.6	NAMA Outcomes	85
5.2	Understanding the Concept of EPZs	85
5.2.1	The Business Models of EPZs	87
5.3	Intervention 1: Establish 28 EPZs with their own PV Power Plants	87
5.3.1	Establishing 28 EPZs	88
5.3.2	Energy Solution – PV Power Plant	90
5.4	Intervention 2: Distribute Clean Energy Technologies with the Support of Consumer Finance	91
5.4.1	Clean Energy Technologies	91
5.4.2	Technology Models and Distribution Plan	93
5.5	Measures for Interventions 1 and 2	95
5.5.1	Measures for Intervention 1	95
5.5.2	Measures for Intervention 2	96
5.5.3	Common Measures for Interventions 1 and 2	96
6.	Capacity Development	98
6.1	Component 1	98
6.1.1	Institutional Level	98
6.1.2	Individual Level	100
6.2	Component 2	101
7.	NAMA Financial Requirements and Mechanisms	102
7.1	Overview of NAMA Finance	102
7.2	Financial Requirements for the Technology Interventions	104
7.2.1	NAMA Finance for Intervention 1	104
7.2.2	NAMA Finance for Intervention 2	105
7.3	Financial Requirements for the Supporting Measures	111
7.4	National and International Finance	112
8.	NAMA Implementation Structure	114
8.1	Key operational bodies and implementing partners	116
8.2	NAMA Operational and Management System	119

8.3	Implementation Schedule	120
9.	Measuring, Reporting and Verification	122
9.1	Measuring	122
9.1.1	GHG Emissions Reductions	123
9.1.2	Sustainable Development	128
9.1.3	Support	131
9.1.4	Transformational Change	132
9.2	Reporting	132
9.2.1	Process and Plan for Reporting	132
9.2.2	Reporting Forms	134
9.3	Verification and Evaluation	135
	References	136
	Annexes	142
