UNDP LOW EMISSION CAPACITY BUILDING (LECB) PROGRAMME

This product was developed under the LECB Programme, with generous funding from the European Commission (EC), the German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB), and the Australian Government.

The UNDP Low Emission Capacity Building (LECB) Programme is a country-driven initiative that promotes essential cooperation between relevant institutions, engaging the public sector and industry in a concerted effort to design and implement approaches to low emission development that are consistent with national development priorities. National counterparts are supported to strengthen technical and institutional capacities to identify and formulate Nationally Appropriate Mitigation Actions (NAMAs) and Low Emission Development Strategies (LEDS) in the public and private sectors, and to strengthen the underlying greenhouse gas inventory management and Measurement, Reporting and Verification (MRV) systems.

The LECB Programme runs through 2016 and is active in 25 countries: Argentina, Bhutan, Chile, China, Colombia, Costa Rica, the Democratic Republic of Congo (DRC), Ecuador, Egypt, Ghana, Indonesia, Kenya, Lebanon, Malaysia, Mexico, Moldova, Morocco, Peru, Philippines, Tanzania, Thailand, Trinidad and Tobago, Uganda, Vietnam and Zambia.

The programme is supported through generous contributions from the European Commission, the German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB), and the Government of Australia.

More information can be found at www.lowemissiondevelopment.org

TABLE OF CONTENTS

List of Figures	6
List of Tables	6
Abbreviations and Acronyms	8
Executive Summary	10
1. Introduction to NAMAs	12
1.1 Setting the Context	12
1.2 Nationally Appropriate Mitigation Actions	13
1.3 Clean Energy NAMA – An Opportunity for Kenya	13
1.4 Purpose and Objectives of the NAMA	15
2. Background to Kenya	16
2.1 Country Topography	16
2.2 Country Administration	17
2.3 Climate	17
2.4 Demography	17
2.5 Socio-Economic Situation	18
3. Background to the Energy Sector	20
3.1 Renewable Energy Potential in Kenya	20
3.2 Key Actors – Kenya Energy Sector	21
3.3 Rural Electrification Authority (REA)	22
3.4 Analysis of Household Energy	22
3.5 Current Fuel Use in Households	23
3.6 Use of Improved Cookstoves in Kenya	24
3.7 Solar PV Lighting in Kenya	24
3.8 Barriers to Adoption of Clean Energy Technologies	25
3.9 Key Drivers for Market based Approach	26
4. The Policy Environment in Kenya	28
4.1 Constitution of Kenya	28
4.2 Vision 2030	29
4.3 The Second Medium Term Plan (SMTP)	30

4.4	National Climate Change Action Plan (NCCAP)	31
4.5	National Energy and Petroleum Policy	32
4.6	Other Programmes	33
4.7	Summary and Conclusion	33
5.	NAMA Baseline Information	36
5.1	The NAMA Boundary	36
5.2	GHG Emission Reduction Baseline	37
5.2.1	Kenya: Access to Energy	37
5.2.2	Identified Approach for Determining GHG Emission Reduction	37
5.3	Sustainable Development Baseline	39
5.3.1	Kenya Status – MDG	39
5.3.2	The SD Tool:	40
5.4	NAMA Target	43
5.5	Alignment with the INDC	44
5.6	Alignment with Sustainable Development Goals:	45
6.	NAMA Intervention – Private Sector-enabled Business Model	48
6.1	Energy Productivity Zones (EPZs)—The Change Agent	48
6.2	Intervention 1: Establish 28 EPZs in Kenya with their own PV Power Plant	49
6.2.1	Intervention 1—Outcome 1: 28 of EPZs Established	50
6.2.2	Intervention 1—Outcome 2: 500 kWp of Solar PV-based power plant implemented	51
6.3	Intervention 2: Distribute Clean Energy Technologies enabled through consumer finance	52
6.3.1	Intervention 2 – Outcome 1: 1 million PV lanterns distributed	53
6.3.2	Intervention 2 – Outcome 2: 1 million ICS distributed	54
6.3	Eligibility Criteria - Private Sector Engagement	55
6.4	Driving Interventions through Business Models	56
7.	Capacity Development	60
7.1	Capacity Development Measures for Intervention 1	61
7.1.1	Technical Feasibility Study for pre-determined EPZ locations	61
7.1.2	Highlight Quality Standards	64
7.1.3	Capacity Development for the NCA and NIE	66
7.1.4	Private Sector Awareness Creation	67
7.1.5	Training of Staff and Workers	68
7.2	Capacity Development Measures for Intervention 2	69

7.2.1	Public Procurement Scheme	69
7.2.2	Marketing and Awareness Creation	70
7.2.3	Capacity Development for Financial Entities (e.g. Banks).	71
7.2.4	Training of Staff and Workers	72
7.3	Summary on Capacity Development Measures	72
8.	Implementation Structure	74
8.1	Governance and Management	74
8.2	Institutional Framework for NAMA Implementation and Management	75
8.2.1	National NAMA Approver/Focal Point	76
8.2.2	National Coordinating Entity (NCA)	76
8.2.3	NAMA Implementing Entity (NIE)	77
8.2.4	NAMA Executing Entities (NEEs)	80
8.3	Implementation schedule	81
9.	NAMA Finance	84
9.1	Overview of NAMA Finance	84
9.2	NAMA Finance required for Intervention 1	85
9.2.1	Loans for EPZ Business Model	85
9.2.2	Grants for Solar PV Power Plant	87
9.3	Consumer Finance for Intervention 2	88
9.3.1	End Consumer – Equity Contribution	88
9.3.2	End Consumer – Revolving Loan Fund	90
9.4	NAMA Finance Required for Measures	93
9.4.1	Financial Measures for initiating NAMA Implementation	93
9.4.2	Finance for Public Procurement	95
9.4.3	Finance for NCA/NIE Staff	97
9.5	Summary of Financial Requirements:	97
10.	NAMA MRV System	100
10.1	Measurement	101
10.1.1	GHG Mitigation	101
10.1.2	Sustainable Development Benefits	106
10.1.3	Measurement – SD Parameters	107
10.2	Reporting	111
10.3	Verification	112
