This post-Games assessment takes an impartial look at Beijing's work to fulfill its environmental commitments for the 2008 Summer Olympic and Paralympic Games. The report builds on the data and findings of *Beijing 2008 Olympic Games: an Environmental Review*, published by UNEP in 2007. The extent to which new findings and recommendations are included has been influenced by the available data at the time of publication.

Uniting sport, culture and the environment,
the Olympic Games ignite passion and emotion
like no other major event on Earth.

An iconic venue of the Beijing 2008 Olympic Games, the National Aquatics Centre – or Water Cube – is an environmental design showpiece.
