However, the Nairobi Convention encourages dissemination and use of the materials in this report. The Nairobi Convention would appreciate receiving a copy of any publication that uses this publication as a source. No use of this publication may be made for resale or any other commercial purpose whatsoever without prior permission in writing from the United Nations Environment Programme-Nairobi Convention.

Disclaimer:

This publication has been produced by the United Nations Environment Programme-Nairobi Convention and WIOMSA with the kind assistance of various regional governments, Non-Governmental Organizations, Civil Society Organizations, as well as of individuals through the Global Environment Facility (GEF) funded WIOSAP project and SIDA funded MASMA project executed by the Convention and WIOMSA respectively. The report is copyrighted entirely to the Nairobi Convention and WIOMSA.

Compiled and prepared by:

James G. Kairo and Mwita M. Mangora of the Western Indian Ocean (WIO) Mangrove Network under the auspices of the WIOSAP Project, with contributions from Lilian Mwihiaki, Robert M. Runya, Abel Kiprono, Elinasi Monga, Célia Macamo, Henriques Balidy, Zafyson H. Randrianasolo, Sachooda Ragoonaden, Mohammed Ahmed and Elvina Henriette, and expert support and guidance provided by Carl C. Trettin of US Forest Service, and Jared O. Bosire of UNEP-Nairobi Convention.

Series Editor:

Matthew D. Richmond

Designed by:

Marco Nunes Correia

Coordinated by:

Jared Bosire, Julius Francis and Timothy Andrew

Western Indian Ocean Ecosystem Guidelines and Toolkits

ISSN: 2714-1942

Table of Contents

1. Mangrove Ecosystems	1
1.1 Global Mangrove Extent and Distribution	1
1.2 WIO Mangrove Extent and Distribution	1
1.3 Mangrove Forest Structure and Geomorphology	3
1.3.1 Mangrove forest types	3
1.3.2 Mangrove zonation	4
1.4 Mangrove goods and services	4
1.4.1 Habitat and nursery functions	4
1.4.2 Coastal protection and erosion control	4
1.4.3 Nutrient cycling and carbon sequestration	5
1.5 Threats to Mangroves	5
1.5.1 Human pressures on mangroves	5
1.5.2 Mangroves and climate change	8
2. Concept and Principles of Mangrove Restoration	11
2.1 Mangrove Restoration: When it is necessary?	11
2.2 Typology of Mangrove Restoration	11
2.2.1 Natural regeneration	11
2.2.2 Artificial regeneration	12
2.2.3 Integrating mangrove restoration with alternative livelihoods	14
3. Step by Step Procedures for Mangrove Restoration	17
3.1 Project Planning Phase	17
3.2 Project Implementation Phase	19
3.3 Project Monitoring and Evaluation Phase	23
4. Implementing a Mangrove Restoration Plan	31
4.1 Vegetation Assessment	31
4.2 Secondary Succession	31
4.2.1 Faunal re-colonization protocol	32
4.2.2 Sampling of fish community in mangroves	34
5. Case Studies on how it has Worked and Lessons Learnt	39
5.1 Government Driven Initiatives: a case of Mauritius	39
5.2 NGOs Driven Initiatives: a case of Madagascar	39
5.3 Community Driven Initiatives: a case of Mozambique	41
5.4 Mixed approach: a case of Kenya, Tanzania and Seychelles	42
6. But still, to plant or not to plant?	47
7. References	51

List of Plates

Plate 1.	Charcoal production from clear felled mangroves in Ruvu Estuary, Tanzania. _____	7
Plate 2.	Peri-urban mangroves pressed with a combination of property development and salt pans at Ununio, Dar es Salaam, Tanzania. _____	7
Plate 3.	Mangrove dieback due to increased sedimentation caused by shoreline change at Gazi Bay, Kenya. _____	8
Plate 4.	Caring of planted <i>S. alba</i> in Gazi Bay, Kenya. _____	12
Plate 5.	An example of a wasted effort from direct planting of propagules on a sand flat in Vanga, Kenya. Here is a case of poor site matching. _____	13
Plate 6.	Traditional beekeeping in the mangrove forest in Makoba Bay, Zanzibar inspires communities to restore and protect mangroves. _____	14
Plate 7.	Gazi Women Mangrove Boardwalk in Kenya. _____	15
Plate 8.	A local community mangrove nursery with <i>A. marina</i> and <i>C. tagal</i> at Kilimani, Zanzibar. _____	22
Plate 9.	A six years old stand of replanted mangroves, <i>R. mucronata</i> by HonkoReef Doctor Project, Madagascar. _____	26
Plate 10.	Petroleum contaminated soils and landfarming. _____	28
Plate 11.	Planted mangroves at Le Morne, Mauritius. Top: before planting May 2011 and Bottom: after planting September 2011. _____	40
Plate 12.	NGO sponsored mangrove planting at Ambanja, Madagascar. _____	41
Plate 13.	Effective community participation is key to success in mangrove restoration at Limpopo Estuary, Mozambique. _____	42
Plate 14.	Contract mangrove planting with rice farming has been tried in Rufiji Delta, but effectiveness and sustainability is not guaranteed. _____	44
Plate 15.	Income through sale of carbon credits by Mikoko Pamoja is used to support local development projects such as education in Gazi bay, Kenya. _____	45
Plate 16.	Use of school children in the Seychelles to plant mangroves ensures long term community commitment, while building a community of mangrove practitioners. _____	46
Plate 17.	Government support. Mangrove planting in Kenya involving key government agencies. _____	47

List of Tables

Table 1. Mangrove coverage and species assemblages in WIO. (Source: Bosire *et al.*, 2016). _____ 2

Table 2. Valuing mangrove goods and services. _____ 5

Table 3. Advantages and disadvantages of natural mangrove restoration. _____ 13

Table 4. Advantages and disadvantages of artificial mangrove restoration. _____ 14

Table 5. Propagules/seedlings availability for mangroves in the WIO region. _____ 25

Table 6. Propagation methods for different mangrove species. _____ 26

Table 7. Summary of common reasons for failure of mangrove restoration projects and lesson learnt. _____ 27

Table 8. Vegetation monitoring schedule for mangrove restoration project. _____ 33

Table 9. Template for collecting data on faunal colonization. _____ 34

Table 10. Common species of crabs and molluscs likely to be encountered in mangroves of the WIO region. _____ 35

Boxes

Box 1. Rehabilitation of oil spill impacted mangrove sites _____ 27

List of Figures

Figure 1. World map of the mangrove distribution zones and the number of mangrove species along each region (Hamilton and Stuart, 2019). _____ 1

Figure 2. Map of the Western Indian Ocean region showing occurrence of mangrove forests. _____ 2

Figure 3. Mangrove forest types (redrawn from Lugo and Snedaker 1974). _____ 3

Figure 4. Typical mangrove species zonation in WIO region. _____ 4

Figure 5. Ecological processes and function supported by mangrove ecosystem that are of social and economic importance. _____ 6

Figure 6. A global model comparing mangrove C storage (mean \pm 95% confidence interval) with that of other major forest domains (Donato *et al.*, 2011). _____ 6

Figure 7. Scenarios for generalized mangrove responses to changes in relative sea level. _____ 9

Figure 8. Steps of adaptive mangrove restoration cycle to ensure success in the WIO region (drawn by M.M. Mangora). _____ 17

Figure 9. A typical mangrove nursery layout showing different compartments. _____ 21

Figure 10. Propagules and seedlings of common mangrove species in the WIO region. _____ 23

Figure 11. Morphology of *R. mucronata* propagule and sapling. _____ 24

Figure 12. Morphology of *A. marina* seed and seedling. _____ 24

Figure 13. Canals appropriate for hydrological restoration. _____ 29

Figure 14. Biometry of a mangrove sapling. _____ 32
