Trade in Environmentally Sound Technologies:

Implications for
Developing Countries

Acknowledgements

The report was commissioned by the Environment and Trade Hub of the United Nations Environment Programme (UN Environment) and implemented by the Technology and Management Centre for Development of the University of Oxford. It is a key output of the Environment and Trade Hub's project on 'Trade in Environmentally Sound Technologies', funded by the European Commission.

The report has been produced in collaboration with the Norwegian University of Science and Technology (NTNU) and individual contractors.

The project was managed by Ying Zhang, Programme Management Officer of the Environment and Trade Hub (UN Environment), under the overall guidance of Anja von Moltke, Head of the Environment and Trade Hub (UN Environment) and Steven Stone, Chief of the Resources and Markets Branch (UN Environment). Substantive contributions were provided by Rashmi Jawahar Ganesh, Keith Alverson, Mahesh Pradhan, Qing Xu, Man-Mei Chim.

Professor Xiaolan Fu led the research team, supported by Shaomeng Li (lead on trade flow analysis) and Giovanni Pasquali (lead on analysis of challenges and opportunities, supported literature review and data analysis) from Oxford University. John Hermansen, Haley Knudson, Christian Tangene and Mahdis Moradi from NTNU led the sustainability assessment and supported the analysis of challenges and opportunities. Mahesh Sugathan led the mapping of negotiation history and the analysis of trade governance implications, supported by Anirudh Shingal (European University Institute; Indian Council for Research on International Economic Relations), who also contributed to the data analysis. The report received important contributions from Laura Rival from the Oxford University. Final editing and revision was done by Ying Zhang (UN Environment), Kerstin Wonka and Stacey Mills (UN Environment).

UN Environment would like to thank the following experts and colleagues for their review and contribution: Aik Hoe Lim (World Trade Organization), Karsten Steinfatt (World Trade Organization), Ying Yan (World Trade Organization), Rainer Walz (Fraunhofer Institute), Jing Zhang (Nottingham University Business School), George Essegbey (Science and Technology Policy Research Institute, CSIR), Quan Zhao (International Trade Centre), Yanhua Liu (China National Climate Change Expert Committee).

Administrative support was provided by Ardesbir Zamani (UN Environment), Selome Tadesse Worku (UN Environment), Fatma Pandey (UN Environment) and Catherine Kamau (UN Environment). The layout was designed by Jessica Hyne, who also supported communication and outreach of the project. Additional support in the layout was provided by Diana De León.

UN Environment would like to thank the European Commission for the financial support provided for this publication and guidance from Emmanuelle Maire, Javier Arribas Quintana, Bojan Grlas, and Emmy Korodima, from Directorate-General for Environment of the European Commission.

List of figures	viii
List of tables	ix
Executive Summary	xiv
1. Introduction.....	1
1.1 Trade in environmentally sound technologies and sustainable development	1
1.2 Main concepts	3
1.2.1. Environmental goods	3
1.2.2. Environmental services	4
1.3 Conceptual framework	9
1.4. Methodology	10
2. A brief history of trade negotiations related to environmentally sound technologies	12
2.1. Setting the stage: OECD and APEC lists	12
2.1.1. APEC Early Voluntary Sector Liberalisation Initiative	12
2.1.2. The OECD List	13
2.2. Multilateral trade negotiations: talks under the WTO Doha Round ...	15
2.2.1. Environmental goods	15
2.2.2. Environmental services	18
2.2.3. Overall assessment of the WTO Doha Round negotiations on environmental goods and services	20
2.3. Plurilateral negotiations on the Environmental Goods Agreement	20
2.4. The Trade in Services Agreement	23
2.5. Inclusion of environmental goods and services in regional trade agreements	24
2.6. Regional voluntary initiatives: The APEC Agreement on Environmental Goods	25
2.7. Environmental credibility and participation of the environmental community in negotiations	29
2.8. Conclusion and outlook	30
3. Trade flow analysis	32
3.1. Trends in trade of selected EST-environmental goods (Category 1)	33
3.2. Trends in trade of selected EST-environmental goods by main categories	

	(Category 1)	35
3.3.	Trends in trade of selected EST-environmental goods by countries (Category 1)	37
3.4.	Trends in trade of EST-environmental goods by product (Category 1)	39
3.5.	Overall trends in trade of selected EST-environmental goods with clearer environmental end-use (Category 2)	45
3.6.	Relative comparative advantage analysis of trade in selected EST- environmental goods (Category 2)	46
3.7.	Intra-industry trade analysis of trade in selected EST-environmental goods (Category 2)	50
3.8.	Trade of selected EST-environmental services	50
3.8.1.	Growing attention on environmental services	50
3.8.2.	Classification	50
3.8.3.	Data limitation	54
3.8.4.	Trade patterns in selected EST-environmental services	54
3.8.5.	Trade patterns in selected EST-environmental services in the private sector	56
4.	Opportunities and challenges of EST trade liberalization I: Economic and social impact analysis	58
4.1.	Barriers to trade in ESTs and market liberalization	59
4.2.	Opportunities and challenges of liberalizing trade in general	62
4.3.	Liberalizing trade in ESTs: the need for a different approach	64
4.4.	Environmental goods: Opportunities and challenges	66
4.4.1.	Gains from liberalizing trade in environmental goods	66
4.4.2.	Challenges of liberalizing trade in environmental goods	69
4.5.	Environmental services: Opportunities and challenges	72
4.5.1.	Gains from liberalizing trade in environmental services	72
4.5.2.	Challenges of liberalizing trade in environmental services	76
4.6.	EPPs: Opportunities and challenges	78
4.6.1.	Gains from liberalizing trade in EPPs	79
4.6.2.	Challenges of liberalizing trade in EPPs	81
4.7.	Summary of opportunities and challenges of EST trade liberalization	82
5.	Opportunities and challenges of EST trade liberalization II: Sustainability assessment of selected ESTs	85
5.1.	Sustainable development from earth-system perspective	86
5.2.	Sustainability assessment approach	87
5.3.	Sustainability assessment of solar photovoltaic cells	91
5.3.1.	Environmental aspects of solar PV cells	92
5.3.2.	Social aspects of solar PV cells	92
5.3.3.	Economic aspects of solar PV cells	94
5.4.	Sustainability assessment of filtering or purifying machinery for water	96
5.4.1.	Environmental aspects of water filters	96
5.4.2.	Social aspects of water filters	97
5.4.3.	Economic aspects of water filters	98
5.5.	Sustainability assessment of waste incinerators	98
5.5.1.	Environmental aspects of waste incinerators	100
5.5.2.	Social aspects of waste incinerators	100

5.5.3.	Economic aspects of waste incinerators	101
5.6.	Sustainability assessment of filtering or purifying machinery and apparatus for gases	104
5.6.1.	Environmental aspects of filters for gases	104
5.6.2.	Social aspects of filters for gases	104
5.6.3.	Economic aspects of filters for gases	105
5.7.	Sustainability assessment of natural fibres	108
5.7.1.	Environmental aspects of hemp and flax fibres	108
5.7.2.	Social aspects of hemp and flax fibres	109
5.7.3.	Economic aspects of hemp and flax fibres	110
5.8.	Relations to other sustainability assessment frameworks	112
5.9.	Discussion of sustainability assessment	113
6.	Implications for trade governance	114
7.	Conclusion	124
7.1.	The need for better and more data	125
7.2.	Support measures at the country level	126
7.3.	Steps forward in global and regional trade governance	127
7.4.	Concluding remarks and future research	127
