WDPA Marine

The screenshot shows the homepage of the WDPA Marine website. At the top, there is a banner with a globe icon and the text "World Database On Marine Protected Areas" followed by "incorporating the UN List of Protected Areas". To the right of the banner are fields for "Username" and "Password", a "Register" link, and a "Log In" button. Below the banner is a navigation bar with links for "Home", "Maps", "Search", "Download", and "Contribute". The main content area features a large image of a coastal landscape with green land and blue water, and a logo for "CONSERVATION INTERNATIONAL". Below this is a search bar with the placeholder "Quick Protected Area Search: Start typing then select from list" and a "Search" button. The page is divided into several sections: "Welcome" (describing the dataset's purpose), "Tools" (links to "Rapid Assessment Of Land Use Change In and Around Protected Areas (RALUCIAPA)" and "The Fire Information for Resource Management System (FIRMS)"), "Maps" (linking to "2D Maps" with a world map thumbnail), "Search" (linking to an "advanced search tool"), and "Contribute" (inviting users to "Register" and providing information about becoming a WDPA Data Provider). At the bottom, there are links for "The WDPA Supporters", "Terms of Use | Site Map | FAQ | Contact | Feedback", and logos for UNEP WCMC, IUCN, and WCPA.

Quick Protected Area Search: Start typing then select from list [Search](#)

Welcome

The World Database on Protected Areas is a foundation dataset for conservation decision making. It contains crucial information from national governments, non-governmental organizations, academic institutions, international biodiversity convention secretariats and many others. It is used for ecological gap analysis, environmental impact analysis and is increasingly used for private sector decision-making. For more information [click here](#).

Tools

[Rapid Assessment Of Land Use Change In and Around Protected Areas \(RALUCIAPA\)](#)
[The Fire Information for Resource Management System \(FIRMS\)](#)

Maps

Explore and visualize marine protected areas through our map viewers.

World Database of Protected Areas: What is it?

- ◆ Boundary and attribute data on protected areas
 - Consists of key fields
 - Name
 - Designation
 - Date of establishment
 - IUCN Category
 - Boundary
 - Other interesting stuff (governance, etc.)
 - Expanding to include zonation, links with species, habitats, etc
