Ecosystem Services

Ecosystem Services

The benefits ecosystems provide for
Human well-being

Typology of Ecosystem Services

Provisioning Goods produced or provided by ecosystems <ul style="list-style-type: none">• food• fresh water• fuel wood• genetic resources	Regulating Benefits obtained from regulation of ecosystem processes <ul style="list-style-type: none">• climate regulation• disease regulation• flood regulation	Cultural Non-material benefits from ecosystems <ul style="list-style-type: none">• spiritual• recreational• aesthetic• inspirational
Supporting Services necessary for production of other ecosystem services <ul style="list-style-type: none">• Soil formation• Nutrient cycling• Primary production		

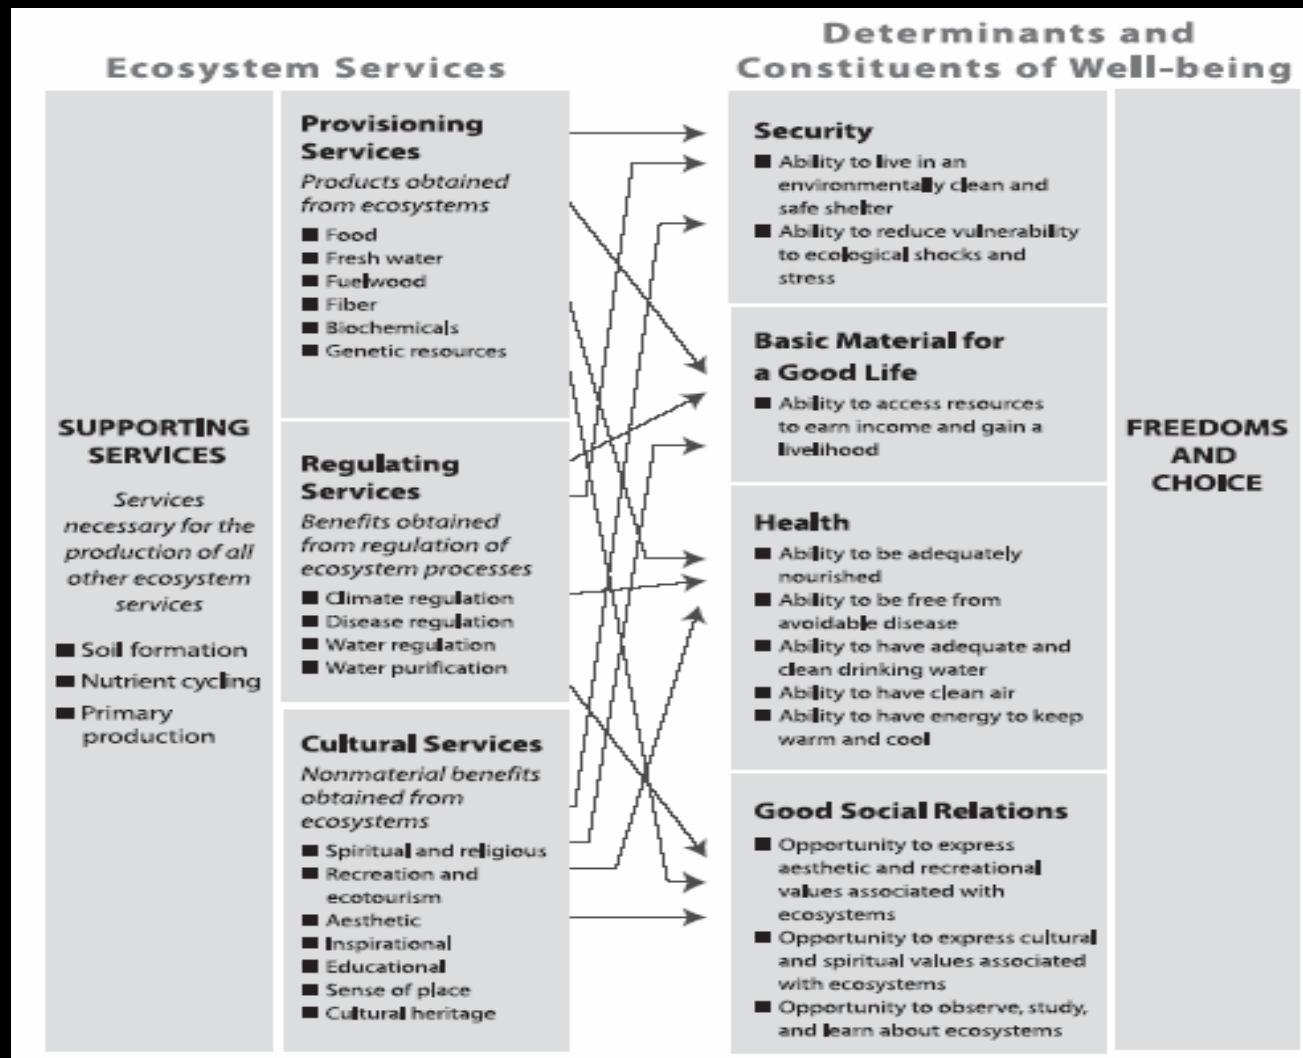

Human Well-being

Human Well-being has several key components:

- Material wealth and livelihoods
- Health
- good social relations
- personal security
- Freedom of choice and action which cut across all components

How well-being is expressed and experienced is context- and situation-dependent, reflecting local social and personal factors such as geography, ecology, age, gender, and culture.

Links across ES and HWB

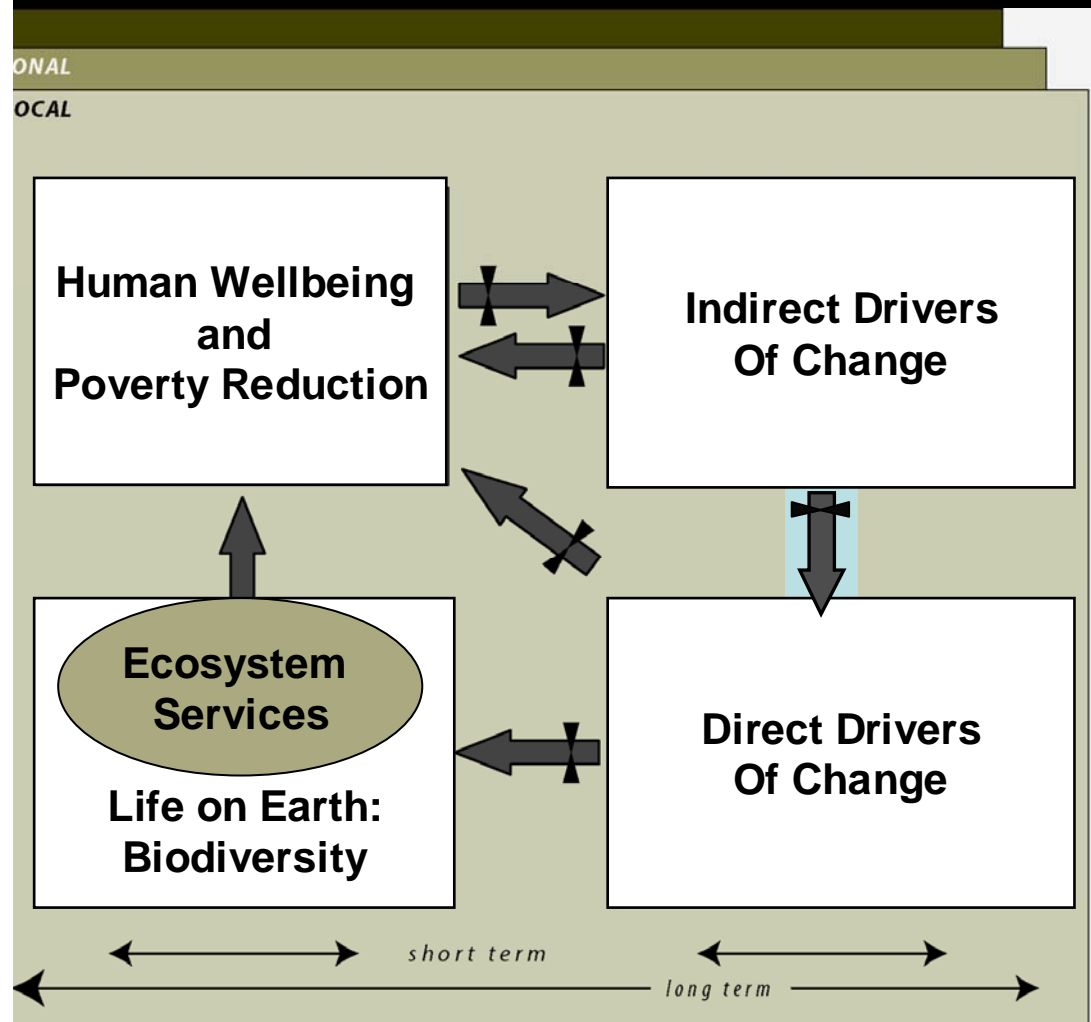

Key points to Consider of Linkages

- Relationship between services and well-being differs across different individuals and social groups.
- Cause and effects can take place across space
- Cause and effects can take place across time

Inter-dependencies and trade-offs

- Inter-dependency across ecosystem services
- Inter-dependency across well-being constituents and determinants
- Trade-offs among ecosystem services
- Trade-offs among well-being constituents and determinants

MA Framework

ategies and interventions
