

A CASE STUDY OF MERCURY REMEDIATION IN A MINING / INDUSTRIAL AREA: DUMP ALMADÉN MINE

WORKSHOP ON MERCURY IN THE LATIN AMERICAN AND CARIBBEAN REGION

BRASILIA, BRASIL

MAY 21-22 2012

SITUATION

The Almadén mine has been devoted for more than 2000 years to the exploitation and production of mercury, it is well-known that it is one of the oldest mines in the world

The mercury production activity ended in July 2003

After the closure, we need the environmental restoration of its dumps, with the aim of minimizing the exploitation effects for more than 2000 years in the environment

*DUMP ALMADEN MINE YEAR
1961*

DUMP YEAR 1967

DUMP YEAR 1973
