

FOREST ECOSYSTEM VALUATION STUDY

Indonesia

Citation:

United Nations Office for REDD Coordination in Indonesia (UNORCID), 2015. Forest Ecosystem Valuation Study: Indonesia.

Editor in Chief: Satya S. Tripathi

Board of Editors: Johan Kieft, Hideyuki Kubo, Felicity Le Quesne, and Brittany Benson.

Peer Reviewers: Buyung Airlangga, Haripriya Gundimeda, Lalit Kumar, Johny P. Kusumo, Meine van Noordwijk, and Pungky Widiaryanto

Study Leader: Pavan Sukhdev

Report Authors: Andrea Bassi, Kaavya Varma and Winnie Toppo

Contributions from: Pierre Dupuis, Karishma Bhuyan and Swapan Mehra

ISBN: 978-1-942960-04-1

FOREST ECOSYSTEM VALUATION STUDY

Indonesia

Table of Contents

Foreword	8
Executive Summary	9
Chapter 1. Forest Ecosystem Valuation: An Overview	13
1.1 Why value ecosystem services?.....	13
1.1.1 Significance of ecosystem services.....	14
1.2 Ecosystem services valuation approaches	15
1.3 Review of ecosystem assessments in Indonesia.....	18
1.4 Outline of the Forest Ecosystem Valuation Study in Indonesia	19
1.4.1 Methodology	20
1.5 Indonesia Green Economy Model (I-GEM): An Overview	22
1.5.1 Projecting socio-economic trends to reveal added benefits and avoided costs	23
1.5.2 Scenarios for cost benefit analysis	23
Chapter 2. State of Forest Cover, Deforestation and Snapshot of Ecosystem Services Provided by Forests in Indonesia	25
2.1 Forest cover of Indonesia	25
2.1.1 Deforestation in Indonesia	28
2.2 Snapshot of forest ecosystem services in Indonesia	31
Chapter 3. Outcomes of Forest Ecosystem Valuation	32
3.1 Valuing the contribution of the ‘provisioning services’	32
3.1.1 The significance of timber for Indonesia’s economy.....	32
3.1.2 Value of Non-Timber Forest Products.....	41
3.1.3 Value of Taxes from the Forestry Sector	50
3.2 Valuing the contribution of ‘regulating services’	53
3.2.1. Economic Value of Soil Erosion Prevention.....	54
3.2.2. Economic Value of Carbon Sequestered and Stored.....	55
3.2.3. Economic Value of Differential Water Recharge between Forested and Non-Forested Areas	56
3.2.4. Implications of valuing the contribution of regulating services	57
Chapter 4. Scenario Analysis	58
4.1 Simulation Results.....	59
4.1.1 Investment required.....	59
4.1.2 Forest cover	59
4.1.3 Forestry production.....	61
4.1.4 Scope for employment.....	62
Chapter 5. Recommendations for REDD+ Implementation and Investments	65
5.1. REDD+ Context in Indonesia	65
5.2. Recent Legal Changes Affecting REDD+.....	66
5.3. FMUs and Jurisdictional and Nested REDD+	67
5.4. Proposed Option for JNR for Indonesia.....	70
Conclusions	71
Bibliography	72

Annex 1. Example of Domestic Prices of Timber in Indonesia.....	80
Annex 2. List of Wood Products Considered for Calculating Export Value of Wood Products.....	81

List of Figures

Figure 1: Division of land area of Indonesia	25
Figure 2: Percentage of forest on total area outside forest designation by MoF for some island groups, 2012.....	27
Figure 3: Annual deforestation in hectares	29
Figure 4: Annual deforestation (in ha) in Indonesia by 7 major islands or island groups.....	29
Figure 5: Percentage of logs produced based on production source, 2011	34
Figure 6: Percentage of log produced based on production source, 2012	34
Figure 7: Production trends of logs, sawn wood and plywood, 2002-2012.....	35
Figure 8: Importance of timber products to the economy of Indonesia, 2012	38
Figure 9: Production trend line of 13 medicinal plants, 2003 to 2013.....	46
Figure 10: Trend of taxes collected by government.....	52
Figure 11: Trend of forest revenue share from total revenue.....	52
Figure 12: Causes of lost forestry taxes 2003-2006	53
Figure 13: Total forest cover (left) and secondary forest area (right) under the BAU and GE scenarios (thousand km ²)	60
Figure 14: Protected forest and secondary forest land, under BAU and GE scenarios (km ²).	60
Figure 15: Annual timber production in million cubic meters (left) and annual timber value added in IDR billion (right) under BAU and GE scenarios	61
Figure 16: Annual NTFP production in thousand tons (left) and annual NTFP value added in IDR billion (right) under BAU and GE scenarios	62
Figure 17: Annual medicinal herbs production in thousand tons (left) and annual medicinal herbs value added in IDR billion (right) under BAU and GE scenarios.....	62
Figure 18: JNR crediting scenarios	68
Figure 19: Most opportune REDD+ implementation modality in Indonesia	69
Figure 20: FMU-based JNR framework for Indonesia.....	70

List of Tables

Table 1: Estimated values of ecosystem services.....	15
Table 2: Ecosystem valuation techniques.....	17
Table 3: Provisioning and regulating services valued	20
Table 4: Indicators of investment in the preservation of forests and their ecosystems	24
Table 5: Primary, secondary and plantation forest cover in Indonesia under MoF purview, 2013 (*1000 hectares).....	26
Table 6: Primary, secondary and plantation forest cover in Indonesia outside MoF purview, 2013 (*1000 Hectares)	26
Table 7: Contribution of forestry sector to Indonesia's GDP (Billion IDR) at current market prices, 2000-2014.....	32
Table 8: Production of logs, sawn wood and plywood in Indonesia, 2002-2012	35
Table 9: Example of calculation of price of logs, sawn wood and plywood, for the year 2014.....	36
Table 10: Economic value of logs, sawn wood and plywood from year 2002 to 2012	37
Table 11: Total value of timber produced from year 2002 to 2012	38
Table 12: Export and import data of all wood products, 2003-2013	40
Table 13: Share of wood products in total exports of Indonesia, 2003-2012	41
Table 14: Production data of major NTFPs of Indonesia, 2000- 2006	43

Table 15: Production data of major NTFPs of Indonesia, 2006- 2012	44
Table 16: Yearly turnover of Jamu, 2006-2011	45
Table 17: Production of medicinal plants in Indonesia, 2001-2013 (ton)	45
Table 18: Production of medicinal plants in Indonesia, 2001-2013 (ton) (continued)	46
Table 19: Export volume of major NTFPs in Indonesia, of alternative years starting from 2001 to 2013 (kilograms).....	47
Table 20: Export value of major NTFPs in Indonesia, of alternative years starting from 2001 to 2013 (FOB value, USD)	47
Table 21: Import volume of major NTFPs in Indonesia, of alternative years starting from 2001 to 2013 (kilograms).....	49
Table 22: Import value of major NTFPs in Indonesia, of alternative years starting from 2001 to 2013 (FOB value, USD)	49
Table 23: Revenue sharing among central, provincial, and district/municipality governments prior to 1999 decentralisation and fiscal balancing laws (percentage)	50
Table 24: Revenue sharing among central, provincial, and district/municipality governments under Law 25/1999 on fiscal balancing and its implementing regulation (percentage)	51
Table 25: Taxes collected from the forestry concessions of Indonesia (1)	51
Table 26: Taxes collected from the forestry concessions of Indonesia (2)	51
Table 27: Forest revenue share of total government revenue	52
Table 28: Value of the soil loss prevented and economic value of soil conserved	54
Table 29: Average carbon stock and average economic value of carbon sequestered	55
Table 30: Differential value of recharge and the total economic value of differential recharge	56
Table 31: Main assumptions used for model development and scenarios simulation.....	58
Table 32: Main results of the analysis for the forestry sector, under BAU and GE scenarios	64
Table 33: Domestic log prices in Indonesia, 2014.....	80
Table 34: Domestic ex-mill sawn wood prices in Indonesia, 2014.....	80
Table 35: Domestic prices of plywood in Indonesia, 2014.....	80

List of Text Boxes

Text Box 1: Potential for Green Jobs in Central Kalimantan.....	63
