CONTENTS

Production and editorial teams.....	iv
Acronyms.....	v
Foreword.....	vii
Executive Summary	1
Overview.....	1
Chapter 1: Introduction	8
Overview of the Nile basin	8
How the River Nile was formed	15
The history of cooperation in the Nile basin	16
Context of this report.....	19
References	20
Chapter 2: Land cover types and vegetation dynamics	21
Introduction	21
Land cover types in the Nile basin	21
Vegetation dynamics and land cover change in the Nile basin using MODIS	31
References	45
Chapter 3: Climate and hydrological overview	46
Introduction	46
Climate	46
Storage systems	56
Hydrogeology	65
References	76
Chapter 4: Water availability and demand	80
Introduction	80
Water availability	80
Water demand and use	84
References	87
Chapter 5: Vulnerability and hotspots in the basin	88
Climate scenarios in the Nile basin	88
Vulnerability	91
Hotspots.....	92
References	118
Chapter 6: Impacts of climate change	120
Introduction to global climate change.....	120
Future water stress in the Nile basin.....	120
Climate futures in the Nile basin	122
Implications and management options.....	135
Conclusions	138
References	140
Chapter 7: Adaptation to climate change.....	142
What is adaptation?	142
Importance of adaptation	142
Adaptation options and strategies	143
Pathways and policy implications	146
Conclusion	147
References	148
Annex 1: Methodology for calculating ET using remote sensing	149
Introduction	149
References	163

List of figures, tables and boxes

Figures

Figure 1.1: Countries of the Nile basin.....	9
Figure 1.2: Drainage system of the River Nile.....	11
Figure 1.3: Annual average real GDP growth rates (2000-2009)	12
Figure 1.4: Proportion of urban and rural population in the basin countries.	13
Figure 1.5: Under-5 mortality rates per 1 000 live births (1990-2009).	14
Figure 1.6: Trends in the proportion of the population with access to an improved water source: 1990, 2000 and 2008.	15
Figure 2.1: Land cover of the Nile basin from GLOBCOVER 2009.....	23
Figure 2.2: Land cover types in Burundi Nile basin from GLOBCOVER 2009.....	24
Figure 2.3: DRC land cover types within the Nile basin from GLOBCOVER 2009.	24
Figure 2.4: Egypt land cover types in the Nile basin from GLOBCOVER 2009.	25
Figure 2.5: Eritrea land cover types in the Nile basin from GLOBCOVER 2009.....	26
Figure 2.6: Ethiopia land cover types in the Nile basin from GLOBCOVER 2009.	26
Figure 2.7: Kenya land cover types in the Nile basin from GLOBCOVER 2009.....	27
Figure 2.8: Rwanda land cover types in the Nile basin from GLOBCOVER 2009.....	27
Figure 2.9: South Sudan land cover types in the Nile basin from GLOBCOVER 2009.	28
Figure 2.10: Sudan land cover types in the Nile basin from GLOBCOVER 2009.....	29
Figure 2.11: United Republic of Tanzania land cover types in the Nile basin from GLOBCOVER 2009.....	29
Figure 2.12: Uganda land cover types in the Nile basin from GLOBCOVER 2009.	30
Figure 2.13: Distribution of land cover types in the Nile basin using MODIS in 2009.	32
Figure 2.14: Change in land cover types of the Nile basin.	33
Figure 2.15: Land cover from MODIS (2001, 2009) in the Nile basin segment of Burundi.	34
Figure 2.16: Relative extent of land cover types in the Nile basin in Burundi.	34
Figure 2.17: Land cover from MODIS (2001, 2009) of the Nile basin segment of DRC.	35
Figure 2.18: Relative extent of land cover types in the Nile basin in DRC.....	35
Figure 2.19: Land cover from MODIS (2001, 2009) in the Nile basin segment of Egypt.	36
Figure 2.20: Relative extent of land cover types in the Nile basin in Egypt.....	36
Figure 2.21: Land cover from MODIS (2001, 2009) in the Nile basin segment of Eritrea.	37
Figure 2.22: Relative extent of land cover types in the Nile basin in Eritrea.	37
Figure 2.23: Land cover from MODIS (2001, 2009) in Nile basin segment of Ethiopia.	38
Figure 2.24: Relative extent of land cover types in the Nile basin in Ethiopia.....	38
Figure 2.25: Land cover from MODIS (2001, 2009) in the Nile basin segment of Kenya.....	39
Figure 2.26: Relative extent of land cover types in the Nile basin in Kenya.	39
Figure 2.27: Land cover from MODIS (2001, 2009) in Nile basin segment of Rwanda.....	40
Figure 2.28: Relative extent of land cover types in the Nile basin in Rwanda.....	40
Figure 2.29: Land cover from MODIS (2001, 2009) in the Nile basin segment of South Sudan.	41
Figure 2.30: Relative extents of land cover types in the Nile basin in South Sudan.....	41
Figure 2.31: Land cover from MODIS (2001, 2009) in the Nile basin segment of Sudan.....	42
Figure 2.32: Relative extent of land cover types in the Nile basin in Sudan.	42
Figure 2.33: Land cover from MODIS (2001, 2009) in the Nile basin segment of the United Republic of Tanzania.	43
Figure 2.34: Relative extent of land cover types in the Nile basin in the United Republic of Tanzania.	43
Figure 2.35: Land cover from MODIS (2001, 2009) in the Nile basin segment of Uganda.....	44
Figure 2.36: Relative extent of land cover types in the Nile basin in Uganda.	44
Figure 3.1: Rainfall regimes over the Nile basin (base period is 1961 to 1990).....	47
Figure 3.2: The main sub-basins of the Nile basin region.	48
Figure 3.3: Annual terrestrial evapotranspiration (ET) in the Nile basin, 2001, 2005 and 2010.	51
Figure 3.4: Mean annual rainfall map of the Nile basin between 2001-2010.....	52
Figure 3.5: Mean annual ET from different biomes in the Nile basin, 2001-2009.....	53
Figure 3.6: Annual variability of total terrestrial ET from the Nile basin.....	53
Figure 3.7: Annual variability of terrestrial ET in the Nile basin countries.	53
Figure 3.8: Total annual ET from Nile basin lakes and reservoirs and the contribution of each of the major water bodies to the total, 2001-2010.....	54
Figure 3.9: Annual ET and total volumes of major lakes that contribute the most ET to the Nile basin.	54
Figure 3.10: Relationship between lakes' SAV ratio, volumes and evapotranspiration.....	54
Figure 3.11: Average annual ET from the major Nile basin lakes, 2001-2010.....	55
Figure 3.12: Total annual terrestrial ET from land surfaces and total ET from terrestrial surfaces, lakes and reservoirs in the Nile basin.	55
Figure 3.13: Lake Victoria drainage basin.	57
Figure 3.14: Historical water elevations in Lake Victoria.	57
Figure 3.15: Outflow and lake level at Lake Tana (1975–2006).	57
Figure 3.16: The swamps of South Sudan.....	59
Figure 3.17: Location of major dams along the River Nile.....	61
Figure 3.18: Average monthly flow of the Nile at Aswan before and after the construction of the Aswan High Dam.....	62
Figure 3.19: Annual flow pattern of the Nile River.....	64
Figure 3.20: Groundwater storage and recharge in the Nile River Basin.....	65
Figure 3.21: Idealized hydrostratigraphic column in the Nile basin part of Egypt.	65
Figure 3.22: Tectonic setting.....	66
Figure 3.23: Groundwater flow in the Nubian aquifer.....	66
Figure 3.24: Thickness of the Nubian aquifer system.....	67
Figure 3.25: W-E hydrostratigraphic cross-section in central Egypt.....	67
Figure 3.26: Three dimensional section representation of hydrostratigraphic units in the northern part of the Nile basin.....	67
Figure 3.27: Aquifer type in Nile delta.....	68
Figure 3.28: W-E hydrogeological cross-section close to the White and Blue Nile Rivers.....	70
Figure 3.29: Groundwater basins in Sudan.	70
Figure 3.30: W-E Hydrogeological cross-section in Uganda.	74
Figure 4.1: The blue-green water model.....	80
Figure 4.2: Precipitation, green water and blue water flows in the Nile countries (1995).	81
Figure 4.3: GDP per capita (at constant 2000 prices) in 2009.....	82
Figure 4.4: Access to water and sanitation in the Nile basin against per capita internal water resources.	82
Figure 4.5: Water availability in the Nile basin.	83
Figure 4.6 Actual versus internal renewable water resources in the Nile basin countries.....	84
Figure 4.7: Gradient along the Nile offering opportunities for hydropower development.	85

Figure 5.1: Regional Climate Model (RegCM3) projection results for 2071–2100. Key: (A2-RF; 20 km resolution); (left) temperature, (right) rainfall.....	88
Figure 5.2: Impact of climate change on Nile basin runoff, precipitation (ppt) and potential evapotranspiration (PET) (per cent change from 2000 values)	90
Figure 5.3: Different order climate change effects on water resources.....	91
Figure 5.4: Population growth in Khartoum metropolitan area.....	95
Figure 6.1: Current vulnerabilities of freshwater resources and water stress map.....	121
Figure 6.2: Generic scenario approach to determining climate change impacts and water stress as well as adaptation strategies	122
Figure 6.3: Global CO ₂ business-as-usual-emissions scenario - (a) CO ₂ emissions; (b) CO ₂ concentrations.	123
Figure 6.4: The ‘living shoreline’ approach involves rehabilitating shoreline habitats with plants, rocks, sand or other structural or organic materials to enhance the natural connections between the uplands and marine areas.....	125
Figure 6.5: Scenarios showing the impacts of different SLR (0, +1, +2, +4, +6 and +20m) scenarios on the Nile delta.....	126
Figure 6.6: Projected flow of the Blue Nile across 17 statistically downscaled scenarios.	129
Figure 6.7: Spatial distribution of average annual changes in climate variables and runoff under weighted scenario for the 2050s: (a) precipitation, (b) temperature, (c) potential evapotranspiration, and (d) runoff.	130
Figure 6.8: Spatial distribution of percentage changes in flow statistics under the weighted runoff scenario for the 2050s.....	131
Figure 6.9: Projections of temperature variations over Lake Victoria in the 21st century.....	131
Figure 6.10: Expected and measured temperatures for the north and south of Lake Victoria (ten year average, 1990-2000 and 2040-2050).....	132
Figure 6.11: Expected and measured annual temperature differences over the north and south of Lake Victoria, 2000-2050 Water Balance: basin Flows.....	132
Figure 6.12: Thirty-year lake levels and levels with changes in rainfall and PE in Lake Victoria.	133
Figure 6.13: Projected trends in rainfall, evaporation, runoff and net basin supply (NBS) in Lake Victoria under A2 and B2 emissions scenarios.....	133
Figure 6.14: Statistically downscaled projections of the total flow at Dongola using 6 transient scenarios.....	133
Figure 6.15: Simulated annual flow series at Dongola from B2 experiments.	134
Figure 6.16: Architecture of water availability and policy assessment (WAPA) model.....	136
Figure 7.1: Adaptation as a pathway from development to climate protection.....	146
Figure 7.2: Climate compatible development.	147

Tables

Table 1.1: Vital statistics of the countries that share the Nile basin.....	8
Table 1.2: Temporal and spatial variation in Nile basin international water agreements.....	16
Table 1.3: Timeline of the cooperation efforts over the Nile.....	19
Table 2.1: Original land cover classes and descriptions for GLOBCOVER 2009.	22
Table 2.2: GLOBCOVER (2009) land cover types in the Nile basin.	22
Table 2.3: Area and percentage of Burundi land cover types in the Nile basin.	24
Table 2.4: Area and percentage of DRC land cover types in the Nile basin.....	24

Table 2.5: Area and percentage of Egypt land cover types in the Nile basin.	25
Table 2.6: Area and percentage of Eritrea land cover types in the Nile basin.	26
Table 2.7: Area and percentage of Ethiopia land cover types in the Nile basin.....	26
Table 2.8: Area and percentage of Kenya land cover types in the Nile basin.....	27
Table 2.9: Area and percentage of Rwanda land cover types in the Nile basin.	27
Table 2.10: Area and percentage of South Sudan land cover types in the Nile basin.	28
Table 2.11: Area and percentage of Sudan land cover types in the Nile basin.	29
Table 2.12: Area and percentage of the United Republic of Tanzania land cover types in the Nile basin.....	29
Table 2.13: Area and percentage of Uganda land cover types in the Nile basin....	30
Table 2.14: IGBP land cover classes with their structural characteristics.	31
Table 3.1: Average annual rainfall over key catchments in the Nile basin.....	49
Table 3.2: Average Annual rainfall in each Nile basin country and in each country’s portion of the Nile basin.	50
Table 3.3: Key facts about the major lakes in the Nile basin	56
Table 3.4: Key facts about the reservoirs in the Nile River Basin.	61
Table 3.5: Variations in discharges on the Nile.....	64
Table 3.6: Groundwater availability in different aquifers of Egypt.	68
Table 3.7: Groundwater availability in different basins of Sudan.	71
Table 3.8: Groundwater availability in Blue Nile part of Ethiopia.....	72
Table 3.9: Groundwater availability in the Gash basin of Eritrea.....	72
Table 3.10: Groundwater availability in the Nile basin part of Uganda.	74
