### Authors

**Part 1:** Keith D. Shepherd 1, Tor-Gunnar Vågen<sup>1</sup>, Thomas Gumbricht 1, and Markus G. Walsh<sup>2</sup>. General Concepts and Analytical Approaches.

**Part 2:** Thomas Gumbricht and Keith D. Shepherd. Regional Land Health Surveillance.

**Part 3.** Tor-Gunnar Vågen and Markus G. Walsh. Sentinel Site Surveillance in Segou Region, Mali.

**Part 4.** Gemma Shepherd<sup>3</sup>. Synthesis and Implications for Policy, Research and Application.

#### Editor:

Keith D. Shepherd

This work is also illustrated in a companion Atlas: UNEP (2012). Sahel Atlas of Changing Landscapes: Tracing trends and variations in vegetation cover and soil condition.

#### Acknowledgements

This document is a product of UNEP's project "An Ecosystem Approach to Restoring West African Drylands and Improving Rural Livelihoods through Agroforestry-based Land Management Interventions".

We are grateful to the Governments of Burkina Faso, Mauritania, Niger and Senegal for their participation in the project, and especially to the Government of Mali's Institut d'Economie Rural (IER) for hosting the project operations in Mali. We also thank the Directorate for Nature Conservation (DNCN) in Segou for field support. We gratefully acknowledge field and laboratory assistance from staff of IER, especially Oumar Doumbia, Lassana Dioni and Mamadou Doumbia; and regional coordination support from Bocary Kaya and Serigne Kandji from the World Agroforestry Centre. We are very grateful to the Government of Norway for providing the principal funding for this project. We thank all those who provided peer review comments, especially Dr Richard Coe, Principal Scientist – Research Methods (World Agroforestry Centre, Nairobi, Kenya) and Dr. Alex Awiti (Resilience Ecologist, Aga Khan University, Nairobi, Kenya).

Foreword	XV
Preface	xvi
Executive Summary	xvii
Background	xvii
Land health surveillance concepts	xvii
Regional surveillance in West Africa Sahel	xviii
Sentinel site surveillance in Segou Region, Mali	xviii
Conclusions	xviii

### PART 1 GENERAL CONCEPTS AND ANALYTICAL APPROACHES

	Summary	22
	Surveillance principles	22
	Surveillance implementation	22
	Communicating surveillance data	23
(1)	Land health surveillance concepts	24
$\smile$	Land health, ecosystem services and human well-being	24
	Evidence-based decision making on land health	26
	Land health surveillance	27
( <b>2</b> )	Overview of land health surveillance methods and tools	32
$\smile$	Introduction	32
	Regional surveillance system	32
	Ground survey – sentinel site surveillance system	34
(3)	Land health surveillance and decision making	37
$\smile$	Communicating health surveillance information	37
	Strengthening evidence-based decision-making	38
	References	44

### PART 2 REGIONAL LAND HEALTH SURVEILLANCE:

Synoptic Screening of Land Degradation in the West Africa Sahel

	Summary	46
	Desertification discourse	46
	Methods	46
	Rainfall and vegetation trends	47
	Conclusions	48
4	The desertification debate	49
	Background	49
	Assessments of land degradation in the Sahel	51
	Discourse during the Sahelian drought 1970–1985	52
	Discourse on Sahel vegetation recovery 1985 to present	52
	Conclusion	55
5	The African Sahel and its climate	56
	Introduction	56
	The climate system of the Sahel	58
	Sahel rainfall variation 1930–2006	60
	Rainfall station gauging data	61
	Geostatistical interpolation of rainfall station data	62
	Satellite-supported rainfall data	62
	Calculating annual rainfall and rainfall trends	65
	Trends in rainfall over the Sahel 1930–2006	66
6	Sahel vegetation variation 1982–2006	67
	Satellite vegetation mapping	67
	The GIMMS AVHRR-NDVI dataset	69
	NDVI preprocessing	70
	NDVI trends 1982–2006	70
	Methods for calculating annual vegetation growth and trends	75
	Trends in annual average NDVI 1982–2006	75
	Annual maximum NDVI 1982–2006	/6
	Annual increment *NDVI 1982–2006	/6
	Conclusions	80
$\bigcirc$	Sanel rain-normalized NDVI 1982–2006	84
	Rain-normalized NDVI concept	84
	Rain-normalized *NDVI 1982–2006	85

## **PART 3 SENTINEL SITE SURVEILLANCE IN SEGOU REGION, MALI:** An evidence-based approach to assessing land degradation and

targeting sustainable land management interventions

Summary	116
Background	116
Land Degradation Surveillance Framework (LDSF)	116
Case study	117
Vegetation condition	117
Soil physical constraints	117
Soil fertility constraints	117
Soil condition indicator	118
Mapping soil condition	118
Fertilizer response trials	118
Targeting interventions	118

	Socioeconomic conditions and tree planting preferences	119
	Prospects	119
(10)	The Land Degradation Surveillance Framework	121
$\smile$	Background	121
	Field sampling procedures	122
	Land resource indicators	122
	Household indicators	123
	Analytical methods	123
(11)	Case study background	124
$\smile$	Background	124
	Population density	124
	Climate and topography	124
(12)	Vegetation health	129
$\smile$	Land use and vegetation cover	129
	Vegetation cover and structure	130
	Woody cover	131
	Remote sensing of woody cover	136
	Herbaceous cover	138
(13)	Soil health	139
$\bigcirc$	Soil physical constraints	139
	Fertilizer response trials	150
(14)	Identification of priority intervention areas	159
$\smile$	Introduction	159
	Interventions in semi-natural areas	159
	Interventions in cultivated areas	160
(15)	Human well-being and tree planting preferences	164
$\smile$	Socioeconomic profiles	164
	Household characteristics	164
	Agricultural systems	165
	Household well-being	167
	Tree planting preferences	168
	Costs	169
	Prospects	170
	References	171
	Appendix 3.1	172
	Land Degradation Surveillance Framework (LDSF) Field Guide	172
	Appendix 3.2	184
	Examples of LDSF statistical models and database	184
	Generalized linear models and generalized linear mixed-effects models	184
	Linear mixed-effects models	184
