Disclaimer

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the United Nations Environment Programme concerning the legal status of any country, territory, city or area or of its authorities, or concerning delimitation of its frontiers or boundaries. Moreover, the views expressed do not necessarily represent the decision or the stated policy of the United Nations Environment Programme, nor does citing of trade names or commercial processes constitute endorsement.

Acknowledgement

This document was developed by a team led by Prof. K. R. Chari at Birla Institute of Management Technology, NOIDA, Ghaziabad, India comprising of Ms. Nisha Maurya, Ms. Pratibha Tatia, Mr. Nipun Puri and Mr. Abhey Bir under the overall guidance and supervision of Mr. Surya Prakash Chandak, Senior Programme Officer, International Environmental Technology Centre, Division of Technology, Industry & Economics, United Nations Environment Programme. It was peer reviewed and tested for applicability in the field in an International Experts' Workshop in which the following experts participated.

1. **Ms. Ajeeta AGARWAL**, Senior Environmental Engineer, Delhi Pollution Control Committee, New Delhi, India
2. **Mr. Arvind Kumar AGARWAL**, Managing Director, Paswara Industries Limited, Meerut, India
3. **Prof. K.R. CHARI**, Birla Institute of Management Technology NOIDA, India
4. **Prof. G. S. DANG** (Retired), Indian Petroleum Institute, Dehradun, India
5. **Mr. Fabio Dalla GIOVANNA**, Factory Director, Viscolube Italiana Spa, Italy
6. **Mr. Sumit JAGETIA**, Managing Director, Mewar Commodities Pvt. Limited, Bhilwara, Rajasthan, India
7. **Dr. Ahmad A. KHAN**, Director, Basel Convention Regional Centre for Training and Technology Transfer for the Caribbean, Ministry of Housing and the Environment, Trinidad and Tobago
8. **Mr. Carlo Gustavo LOMBARDI**, CEO/Managing Director, STP Studi Tecnologie Progetti S.r.l. Italy
9. **Mr. Bharat MANGLANI**, Director (Technology & Strategy), Bharat Oil & Waste Management Ltd. India
10. **Mr. Arturo MORELLI**, Promotion Manager, STP Studi Tecnologie Progetti S.r.l. Italy
11. **Prof. Arunaditya SAHAY**, Birla Institute of Management Technology NOIDA, India
12. **Dr. Joseph UDONNE**, Department of Chemical and Polymer Engineering, Lagos State University, Lagos, Nigeria
13. **Dr. Suren WIJEYEKOON**, Professor, Department of Chemical and Process Engineering, University of Moratuwa, Sri Lanka

Compendium of Recycling and Destruction Technologies for Waste Oils

Compiled by

United Nations Environment Programme
Division of Technology, Industry and Economics
International Environmental Technology Centre
Osaka, Japan

TABLE OF CONTENTS

Table of Contents.....	5
List of Figures and Pictures	10
List of Tables.....	12
List of Annexes	13
Executive Summary.....	14
Glossary of Terms	16
Purpose of the Compendium	18
 CHAPTER 1: REVIEW OF DATA ON WASTE OILS	 19
1.1 Introduction	19
1.2 Impact of Waste Oils on Health and the Environment.....	20
1.2.1 General Hazard/Toxicity	21
1.2.2 Carcinogenicity/Cancer Effects.....	21
1.2.3 Developmental, Reproductive, Endocrine, and Genotoxicity	22
1.3 Types of Facilities that Generate Waste Oils.....	22
1.3.1 Automotive Sector	22
1.3.2 Industrial Sector.....	22
1.3.3 Marine Sector	23
1.3.4 Power Sector.....	23
1.3.5 Other Sources	24
1.4 Estimation of Waste Oils Generated.....	26
1.4.1 Global Supply/Demand of Lubricating Oils	26
1.4.2 Estimation of Waste Oil Generation Globally.....	30
1.4.3 Waste Oil Generation Rates by Major Regions/Countries	30
1.5 Constituents of Waste Oils	37
1.5.1 Constituents of Waste Oils.....	37
1.5.2 Range of Hazardous Elements in Various Types of Waste Oils.....	39
1.6 Legislation, Regulations and Statutes	39
1.6.1 Need for Regulations and Legislation	39
1.6.2 European Used Oil Policy and Legislation	40
1.6.3 Waste Oil Directive (WOD) 75/439/EEC.....	41
1.6.4 Waste Incineration Directive	41
1.6.5 Hazardous Waste Directive 91/689/EEC	41
1.6.6 European Waste Catalogue (EWC 2002)	41
1.6.7 Used Oil Disposal in Europe.....	43
1.6.8 A Selection of Individual European Member Country Provisions	43
1.6.8.1 Italy.....	43

1.6.8.2	Portugal.....	43
1.6.8.3	France.....	43
1.6.8.4	Spain.....	44
1.6.8.5	The United Kingdom.....	46
1.6.9	Australia.....	48
1.6.10	Japan.....	49
1.6.11	Singapore.....	49
1.7	Waste Oil Management Practices.....	51
1.7.1	Waste Oil Management Programs.....	51
1.7.2	Recent Trends and Developments.....	52
1.8	Collection and Storage of Waste Oils.....	53
1.8.1	Major Entities Involved.....	53
1.8.1.1	Generators of Used Oils.....	53
1.8.1.2	Collection Centers and Aggregation Points.....	53
1.8.1.3	Transporters.....	54
1.8.1.4	Re-refiners and Processors.....	54
1.8.1.5	Burners (Those who use waste oils as fuel).....	54
1.8.1.6	Marketers (Those who trade in waste oils).....	54
1.8.2	Challenges and Ways to Collect Used Oils.....	54
1.8.2.1	Bulk Generators.....	54
1.8.2.2	Small Generators.....	55
1.8.2.3	Record Keeping.....	56
1.8.2.4	Safety Precautions for Waste Oil Storage Facilities.....	57
1.8.3	Recommended Procedures for Collection Centres.....	57
1.9	Generation Factors for Different Types of Waste Oils.....	58
1.10	Suggested Methodology for Estimating Waste Oil Generation.....	61
1.10.1	Introduction to the Methodology.....	61
1.10.2	Step-by-step Methodology.....	61
 CHAPTER 2: RECYCLING AND DESTRUCTION TECHNOLOGIES FOR WASTE OILS.. 71		
2.1	Waste Oil Recycling.....	72
2.1.1	An Overview.....	72
2.2	Parameters and Considerations for Successful Recycling Technologies.....	74
2.2.1	Environmentally Sound Technologies.....	74
2.2.2	High Quality Products.....	75
2.2.3	Product Quality Consistency.....	75
2.2.4	High Base Oil Yield.....	75
2.2.5	Economics.....	75
2.2.6	Capable of Processing a Variety of Waste Oils.....	76
2.2.7	Capable of Rendering Contaminants Benign.....	76
2.2.8	Handling and Treatment of Hazardous Waste Residues.....	76
2.3	Technologies for the Destruction of Waste Oils.....	77
2.3.1	Overview.....	77
2.3.2	Generic Technologies.....	79
2.3.2.2	Acid Activated Clay Technology.....	81
2.3.2.3	Vacuum Distillation/Evaporation Technology.....	81

2.3.2.4	Hydrogenation Based Technologies	82
2.3.2.5	Ultra-Filtration Technology	85
2.3.2.6	Extraction Based Technologies	85
2.3.3	Specific Technologies for Waste Oil Recycling	90
2.3.3.1	KTI Process ("C").....	90
2.3.3.2	Safety Kleen Technology ("C").....	93
2.3.3.3	Axens/Viscolube (REVIVOIL) Technology("C")	95
2.3.3.4	IFP Technology/Snamprogetti Technology ("C").....	97
2.3.3.5	HyLube Process ("C").....	100
2.3.3.6	UOP DCH Process ("C").....	102
2.3.3.7	Probex Process ("C").....	103
2.3.3.8	STP Process ("C").....	104
2.3.3.9	Degussa Process (Transformer Oil Recycling) ("C").....	106
2.3.3.10	Buss Luwa Vacuum Distillation/Clay Filtration Process ("C").....	106
2.3.3.11	BERC/NIPER Hydrogenation ("R&D"/"OD").....	107
2.3.3.12	Phillips Petroleum Company PROP Hydrogenation Technology ("C").....	108
2.3.3.13	Entra Process ("C").....	109
2.3.3.14	ORYX Process: Vacuum Distillation ("R&D"/"C").....	110
2.3.3.15	CEP Process ("C").....	111
2.3.3.16	Vaxon Process ("C")	113
2.3.3.17	MeinkenTechnology ("OD")	114
2.3.3.18	Atomic Vacuum Distillation Technology ("R&D").....	115
2.3.3.19	BlowDec Technology ("R&D")	115
2.3.3.20	Dunwell Process ("R&D"/"C").....	116
2.3.3.21	Interline Re-refining Process ("R&D"/"C").....	116
2.4	Burning of Waste Oils.....	118
2.4.1	Using Waste Oils as Fuel by Controlling Parameters	118
2.4.2	Generic Technologies for Burning Waste Oils.....	119
2.4.2.1	Direct Burning of Waste Oils	119
2.4.2.2	Burning after Mild Processing	120
2.4.2.3	Burning after Severe Reprocessing	120
2.5	Advanced Waste Oil Recycling Technologies.....	122
2.5.1	Thermal Cracking Based	122
2.5.2	Springs Oil Conversion (SOC).....	122
2.5.3	Great Northern Processing Inc. (GNP) Thermal Cracking Process (Propak Process).....	123
2.5.4	Environmental Oil Processing Technology	124
2.5.5	EADIEMAC Process for Recycling of Used Lubricating Oils	124
2.6	Selection of Appropriate Technology.....	125
2.6.1	Criteria and Considerations for Technology Selection	125
2.6.1.1	Availability of Waste Oils	125
2.6.1.2	Potential for Pollution.....	125
2.6.1.3	Emissions and Emission Norms of the Possible Site	125
2.6.1.4	Extent of Technology Commercialisation.....	126
2.6.1.5	Other Considerations.....	126
2.7	Issues Relevant to Developing Countries.....	126
2.8	Comparative Evaluation of Process Sequence of Specific Technologies.....	127

2.9	Socio-economic Implications of Recycling	127
2.10	Employment Potential of Waste Oil Recycling.....	128
2.11	Categories of Jobs Offered by the Recycling Industry	129
2.12	Skills Requirements.....	129
2.13	Operation and Maintenance Requirements.....	130
2.14	Equipment in a Recycling Plant	130
2.14.1	General Category Equipment.....	130
2.14.2	Special Category Equipment.....	130
2.15	Contact Addresses of Selected Re-refining Technology Licensors	131
2.16	Treatment and Disposal of Residual Hazardous Wastes after Recycling of Waste Oils.....	132
2.16.1	Incineration	132
2.16.1.1	About Incinerators	132
2.16.1.2	Multi-chamber Incinerators	132
2.16.1.3	Suitable Incinerators for Hazardous Wastes from Recycled Waste Oils..	134
2.16.1.4	Rotary Kiln Incinerators	135
2.16.1.5	Air Pollution Control Devices	136
2.16.1.6	Disposal of Hazardous Wastes in Secured Landfills	137
2.16.1.7	The Natural Hydrogeologic Setting.....	138
CHAPTER 3: Sustainability Assessment of Technologies (SAT)		141
3.1	Introduction	141
3.2	Basic Steps of SAT	142
3.3	Key Features of SAT	143
3.3.1	Addressing Strategies as Well as Operational Levels	143
3.3.2	Addressing Sustainability through a Specially Designed Methodology and Criteria	144
3.4	SAT Criteria.....	144
3.4.1	Arriving at a Set of Criteria	144
3.4.2	Involvement of Relevant Stakeholders	145
3.4.3	Stakeholders' Workshop	145
3.4.4	Constraints and Limitations	146
3.5	Adopting a Progressive Assessment	146
3.6	Choosing from Options.....	147
3.6.1	Use of Quantitative Techniques	147
