Disclaimer:

The findings, suggestions and conclusions presented in the case study are entirely those of the authors and should not be attributed in any manner to UNEP Risoe Centre or the United Nations Environment Program, nor to the institutions of individual authors.

Acknowledgements

We wish to thank Dr. Subash Dhar and Dr. Jorge Rogat from the UNEP Risø Centre, and Ms. Kamala Ernest from the UNEP, for their active involvement at various stages of the case study as well as during the project workshops. We appreciate their valuable inputs in preparation of the final report.

We are especially grateful to Mr. P. N. Shukla, Director, Dedicated Freight Corridor Corporation Limited (DFCCIL), and Mr. Rajesh Jain, General Manager, DFCCIL, for insightful discussions on the case study and for providing us relevant information on the Dedicated Freight Corridor project. They shared important project documents with us and their support was vital for completion of this case study. A special thanks to Mr. Alexander Veitch, the International Union of Railways (UIC) for his valuable comments and inputs.

We would also like to thank our research associates Mr. Parth Vaidya, Ms. Trishita Roy and Ms. Vidhee Avashia for excellent research support during the study. We are thankful to Ms. Josephine Basch, Ms. Annemarie Kinyanjui and Ms. Surabhi Goswami for providing valuable editorial inputs during preparation of the final report.

Contents

<i>Acknowledgements</i>	<i>iii</i>
<i>List of Tables and Figures</i>	<i>vii</i>
<i>Abbreviations</i>	<i>ix</i>
1. Background	1
1.1 Context	1
1.2 Case study	1
1.3 Focus on CO ₂ emissions	2
1.4 Focus on long-term assessment	3
2. Overview of Freight Transport in India	5
2.1 Past trends and future projections	5
2.2 Infrastructure gaps and future challenges	7
2.3 Proposed Dedicated Freight Corridors (DFCs)	7
2.4 Global experience of DFCs	9
3. The Delhi-Mumbai Dedicated Freight Corridor	11
3.1 Objectives and scope of the DFC project	11
3.2 Implementation strategies	12
3.3 Project plans and projected performance	13
3.4 Governance and management structure	16
3.5 The Delhi-Mumbai Industrial Corridor (DMIC)	17

4. Assessment of CO₂ Emissions	21
4.1 Approach	21
4.2 Methodology	21
4.3 Alternative scenarios	23
4.4 Future traffic projections	24
4.5 Estimation of fuel consumption	25
4.6 Future energy demand	26
4.7 Estimation of CO ₂ emission factors	28
4.8 Future CO ₂ emissions	29
 5. Findings and Conclusions	 33
5.1 Reduction of CO ₂ emissions from the western DFC	33
5.2 Potential reduction of CO ₂ emissions from six DFCs	33
5.3 Potential for climate financing	34
5.4 Impacts on regional development	35
5.5 Conclusions	35
 References	 37
 Annexure	 39
A: Freight traffic movement by rail and road (1950–2010)	39
B: Freight traffic by mode (2007–08)	39
