Producer

This document has been produced by the UNEP/SETAC Life Cycle Initiative

Supervision and support

Sonia Valdivia (UNEP) and Guido Sonnemann (UNEP)

Editors

Sonia Valdivia (UNEP), Cássia Maria Lie Ugaya (Technological Federal University of Parana and ACV Brasil), Guido Sonnemann (UNEP), Jutta Hildenbrand (Chalmers University)

Authors (Alphabetic order)

Ciroth, Andreas (GreenDeltaTC)
Finkbeiner, Matthias (TU Berlin)
Hildenbrand, Jutta (Chalmers University)
Klöpper, Walter (Editor-in-Chief of the *International Journal of Life Cycle Assessment*)
Mazijn, Bernard (Ghent University)
Prakash, Siddharth (Öko-Institut)
Sonnemann, Guido (UNEP)
Traverso, Marzia (TU Berlin)
Ugaya, Cássia Maria Lie (Technological Federal University of Parana and ACV Brasil)
Valdivia, Sonia (UNEP)
Vickery-Niederman, Gina (University of Arkansas)

International scientific and professional reviewers and stakeholders consulted

Bachmann, Till M. (European Institute for Energy Research, EIFER)
Garrigan, Curt (UNEP Sustainable Buildings and Climate Initiative Coordinator)
Clark, Garrette (UNEP)
Civit, Barbara (University of Mendoza)
Duque, Jorge (Escuela Superior Politécnica del Litoral, Guayaquil, Ecuador)
Fava, James (Five Winds International)

Fullana i Palmer, Pere (UNESCO Chair in Life Cycle and Climate Change)
Jensen, Allan Astrup (Nordic Institute of Product Sustainability, Environmental Chemistry and Toxicology)
Halog, Anthony (University of Maine)
Inaba, Atsushi (Kogakuin University, Japan)
King, Henry (Unilever)
Koniecki, Jakub (European Commission)
Mbohwa, Charles (University of Johannesburg)
Pierre, Fabienne (UNEP)
Swarr, Tom (Five Winds International)
Tonda, Elisa (PNUMA)
White, Philip (University of Arizona)
Vigon, Bruce (SETAC)
Von Blottnitz, Harro (University of Cape Town)
Zamagni, Alessandra (LCA & Ecodesign Laboratory, ENEA)

Editing, proofreading, design and lay-out

List of Figures

Geographic distribution of the case studies and connections between unit processes included in one S-LCA study	xx
Figure 1. Flows of information needed for a life cycle inventory.	7
Figure 2. Overall UNEP/SETAC scheme of the environmental LCIA framework, linking LCI results via the midpoint categories to damage categories.	8
Figure 3. Normalized results per impact category of a school desk made from FSC certified wood.	13
Figure 4. Life cycle inventory (LCI) of 1 kg of gold (99.5%).	15
Figure 5. Scope of application of three flavours of life cycle costing.	15
Figure 6. Cost categories and the share of labour costs in life cycle costing.	17
Figure 7. LCC of standard public transport heavy duty bus (in US\$).	19
Figure 8. Full-cost accounting for washing machines before and after dewatering and water recirculation.	21
Figure 9. Examples of a social life cycle inventory (S-LCI) and interrelationships to subcategories and impact categories.	23
Figure 10. Assessment system from categories to unit of measurement.	24
Figure 11. System boundaries of the study of a social life cycle assessment (S-LCA) for cobalt production in Katanga, Democratic Republic of Congo (DRC).	25
Figure 12. System boundaries considered in the notebook computer study.	28
Figure 13. Results of the social life cycle analysis (S-LCA) for different stakeholders (clockwise): workers, overall, value chain actors, local community.	30
Figure 14. System boundaries of a life cycle sustainability assessment (LCSA).	35
Figure 15. Example of life cycle sustainability assessment (LCSA) inventory data for unit process and organization levels.	37
Figure 16. Examples of midpoint and endpoint categories, subcategories of stakeholders and cost categories when starting a life cycle sustainability assessment (LCSA).	39
Figure 17. Presentation of LCSA results of the marble slabs study.	41
Figure 18. (Environmental) LCA results of WEEE recycling options in China.	43
Figure 19. Presentation of combined LCC and (environmental) LCA results of a WEEE recycling options in China.	44

List of Tables

Table 1. Input/output table for wooden school desk.	10
Table 2. Potential life cycle impacts table for wooden school desk – wood extraction and board sawing.	12
Table 3. Costs of standard public transport heavy duty bus.	19
Table 4: Full cost accounting for washing machines before and after dewatering and water recirculation.	21
Table 5. Selected examples of social impacts on workers and local communities as a result of artisanal mining of cobalt in Katanga, Democratic Republic Congo.	26
Table 6. Example of life cycle sustainability assessment data for marble slabs case study.	38
Table 7. Example of LCSA impact assessment results for a marble slabs case study.	40
Table 8. Life cycle costing (LCC) results of two WEEE wastes recycling options in China.	43
Table 9. S-LCA results of general WEEE recycling options in the informal sector China.	44

Acronyms

CALCAS	CALCAS, Coordination Action for innovation in Life Cycle Analysis for Sustainability
CBS	Cost breakdown structure
CR	Critical review
EC	European Commission
ELVs	End-of-life vehicles
EoL	End of life
EPD	Environmental Product Declaration
EU	European Union
FAETP	Freshwater aquatic ecotoxicity potential
FSC	Forest Stewardship Council
HTP	Human toxicity potential
ISO	International Organization for Standardization
(environmental) LCA	Environmental life cycle assessment
LCA	Life cycle assessment
LCC	Life cycle costing
LCI	Life cycle inventory analysis
LCIA	Life cycle impact assessment
LCM	Life cycle management
LCSA	Life cycle sustainability assessment
LCT	Life cycle thinking
