PART

1

INTRODUCTION

The Timor-Leste Strategic Development Plan is a twenty year vision that reflects the aspirations of the Timorese people to create a prosperous and strong nation.

PART 1 INTRODUCTION

The Timor-Leste Strategic Development Plan is a twenty year vision that reflects the aspirations of the Timorese people to create a prosperous and strong nation. The plan has been developed to inspire change, to support bold collective action and to plan for a better future.

OVERVIEW

The Strategic Development Plan provides a vision for Timor-Leste that builds on the foundations we have laid down since 2002. It is informed by, and incorporates, the vision of the Timorese people in 'Timor-Leste 2020, Our Nation Our Future' which formed the basis of the 2002 National Development Plan. It also reflects the views of the thousands of Timorese people who contributed to the national consultation on the Summary Strategic Development Plan, From Conflict to Prosperity, in 2010.

Ongoing consultation and the participation and solidarity of the Timorese people will be vital to the successful implementation of the Strategic Development Plan.

Since independence in 2002, Timor-Leste's social and economic policies have focused on alleviating poverty to address the immediate needs of our people, consolidating security and stability, and providing a foundation for nationhood through building institutions of State. This ongoing process of peace building and state building has been necessary to create a base from which Timor-Leste can address our people's health and education needs and work towards the elimination of extreme poverty. While it normally takes post-conflict countries at least ten to 15 years to recover stability, Timor-Leste has achieved a safe and secure environment in less than a decade. We now have the benefits of peace, stability and a growing economy as we continue to build our nation.

In the last three years, Timor-Leste has experienced double-digit economic growth and a general improvement in people's welfare. Sector reforms and significant investments in the economy have taken place and the development of the oil and gas sector has begun. Our successes so far are due to the resilience of our people. It was our strong sense of self-determination that drove us to achieve independence after 400 years of colonisation and 24 years of occupation.

The same self-determination should now be applied to implementing the vision of the Timorese people through
