

Agenda item 7. Reducing Poverty through Sustainable Agriculture

Reducing Poverty through Sustainable Agriculture

- ❑ A component of Suprogramme 1 – Macroeconomic Policy, Poverty Reduction and Development
- ❑ Mainly implemented by Centre for the Alleviation of Poverty through Sustainable Agriculture (CAPSA in Bogor, Indonesia) based on 2009 Resolution (65/4)
- ❑ Key Activities / Achievements
 - Analytical Research
 - Policy Advocacy
 - Information Networking and Dissemination
 - Capacity Building and Training

New Frontiers – Substantive Outlook

- ❑ The 2030 Agenda for Sustainable Development
 - Ambitious new agenda – 17 goals, 169 targets
 - Highlight on Balanced Integration of Economic, Social and Environmental dimensions
 - New Capacity / Knowledge required
- ❑ Persistent Food / Hunger Challenges
 - “Sustainable” intensification of agricultural production
 - Innovation anticipated throughout value chains (production, distribution, markets, consumption, etc.)
- ❑ Global Call for Climate Action
 - Adaptation / Resilience to CC impacts and disasters
 - Positioning Agriculture in INDC

Assessing the regional trend

- Preliminary assessment of regional trends indicates
 - Progress in MDG poverty / hunger targets, but maybe in sacrifice of environmental and social sustainability
 - Positive trend in agricultural production, but challenges remain with distribution and access
 - Agriculture's contribution to economy and employment stagnant but remains important in inclusive rural development
 - Current agricultural practices put significantly stress on environmental sustainability, including through water and energy uses.
 - Impacts of climate change becomes more evident

Challenges and Responses

Requiring priority policy intervention

- Intensification of agriculture
- Resilience to climate change and natural disasters
- High value chains for sustainable agriculture

Policy options are exemplified, including

- Technological Innovations and transfer
- Knowledge / experience sharing on climate smart agriculture
- Resource efficiency
- Sustainability / co-benefits
- Market Based Adaptation to Climate Change
- Structural reform
- Public-private partnership

Requirements for Regional Cooperation

- Policy coherence and coordination
- Technical advisory and financing
- Human resource development
- Knowledge exchange and Networking
- Capacity building
