# UNESCAP
Working group meeting

Bangkok, 10 September 2015

Figure 6. State of single window implementation, 2010 and 2014

2010
% of OECD countries

- No SW
- SW planned or in the process of implementation
- SW operational

2014
% of OECD countries

- SW planned or in the process of implementation
- SW operational

OECD (2015)Trade Policy Papers 181

Study

- Explore ICT requirements and gaps to implement Trade and Transport Facilitation systems
- ICT requirements are
  - IT system architecture,
  - legal and policy framework,
  - human resources and knowledge resources, organisational framework and development.
- Target group: ICT policymaker namely in LDCs and LLDCs

Questions to be answered

1. Where is the IT TTF potential?

2. What are the challenges for a more effective deployment of IT for TTF purposes?

3. What needs to happen to use IT effectively?

4. What are particular developing countries challenges?

1: Potential

- Business areas
  - Risk Management
  - Transit facilitation
  - Guarantee management (for transit)
  - Licenses, certificates and quota management
  - Coordinated Border Management
  - Transparency / Administrative Facilitation
  - Cross-border exchange of information
  - Customs processing
  - Decision making support

...5 min

2: Challenges?

- Brainstorming
- Think of factors that currently hinder using the full potential of IT?
- Write every idea on a card

2: Challenges?
