

UN ESCAP – ISOC Study

Unleashing the Potential of the Internet in Central Asia and Beyond

Preliminary Findings

Dr. Peter Lovelock

18 June 2015

Contents

- Introduction and 'Regional' Context
- Internet Access and Usage
- International and National Connectivity

Introduction

Introduction

What?

- Study on digital connectivity and the potential for transitioning towards a digital economy in 10 countries: Azerbaijan, Afghanistan, Armenia, Georgia, Kazakhstan, Kyrgyzstan, Pakistan, Tajikistan, Turkmenistan and Uzbekistan

Why?

- To identify main pain points throttling the Internet connectivity in the target countries and to propose policy options for creating an enabling Internet ecosystem in the region

How?

- Using secondary research on infrastructure development, Internet access, usage and the policy environment, including an analysis of the barriers and constraints, and including a set of policy recommendations

Socio-economic development indicators

A generally young region
