

Paperless TF for SMEs – part II

Policy frameworks

And

ICT applications

Agenda

- Policy frameworks
 - competitive and resource efficient TF system
 - 1 target, x indicative goals to guide policy action and xx initiatives for implementation
- ICT applications in transport and trade
 - NSW
 - Regional Single window

Framework must address ...

- lack of interoperability along the global value chain
- Reduce need to provide information several times for different purposes
- Increase information availability through single platform & for multiple agencies/ users
- Improve integration of information between trade and transport (eg track and trace technologies and intelligent cargo applications)
- Identify and continuously guide documentation efficiencies, costs reduction, better visibility of freight, less perceived complexity for multimodal transport (and trade)

- Target - 0 paper documents and flows, 0 waiting time at hubs, technology independent
- Goals - Interoperability (standardised solutions), common platform for information exchange, robust legal framework (for data security and protection), one stop shop for admin procedures
- **Initiatives** - Common reference model (BSP model), Single window, Multimodal e-waybill, e-delivery infrastructure

Building on Existing Initiatives (1)

- “Most progressive” regional TF initiatives
 - ASEAN
 - ASEAN Single Window initiative
 - MRAs for conformity assessment
 - APEC
 - TF Action Plans
 - IAP Peer review mechanisms
 - ESCAP
 - MAY 2012: Resolution 68/3 on Cross-Border Paperless Trade Facilitation → Towards regional arrangement(s)
 - http://www.unescap.org/commission/68/documents/English/2012-Resolutions-E68_24E.pdf
 - APTA

Building on Existing Initiatives (2)

- **Asia-Pacific Trade Agreement (APTA)**
 - Links East, Southeast and South Asia
 - **TF Framework Agreement**
 - Simple and common RoOs
 - **Simple and common Rules of Origin with minimum local value requirement of 45% f.o.b.**
