

Strengthening Energy Security and Building Resilience in the Asia–Pacific

The shaded areas of the map indicate ESCAP members and associate members. *

The Economic and Social Commission for Asia and the Pacific (ESCAP) serves as the United Nations' regional hub, promoting cooperation among countries to achieve inclusive and sustainable development.

The largest regional intergovernmental platform with 53 member States and 9 associate members, ESCAP has emerged as a strong regional think-tank offering countries sound analytical products that shed insight into the evolving economic, social and environmental dynamics of the region. The Commission's strategic focus is to deliver on the 2030 Agenda for Sustainable Development, which it does by reinforcing and deepening regional cooperation and integration to advance connectivity, financial cooperation and market integration. The research and analysis undertaken by ESCAP, coupled with its policy advisory services, capacity building and technical assistance to governments aims to support countries' sustainable and inclusive development ambitions.

Acknowledgements

This report was developed by the Energy Division of ESCAP under the overall direction and guidance of Hongpeng Liu, Director and Michael Williamson, Section Chief.

The report was authored by Dr.Frank Umbach, Head of Research, European Cluster for Climate, Energy and Resource Security (EUCERS)/Center for Advanced Security, Strategic and Integration Studies (CASSIS), University of Bonn.

Peer review and valuable suggestions were provided by David Wogan and Glen Sweetnam of the Asia Pacific Energy Research Center.

Prachakporn Sophon processed proof reading and designed layout.

Mitchell Hsieh, Katie Elles, Kavita Sukanandan, Christophe Manshoven, Sompot Suphutthamongkhon and Chavalit Boonthanom of the ESCAP Communications and Knowledge Management Section, coordinated the dissemination of the report.

Acronyms and Abbreviation

AI	artificial intelligence	
CCS	carbon capture and storage	
CCUS	carbon capture, use and storage	
CEIs	critical energy infrastructures	
Cls	critical infrastructures	
COVID-19	coronavirus disease 2019	
CRMs	critical raw materials	
ESCAP	United Nations Economic and Social Commission for Asia and	
	the Pacific	
EVs	electric vehicles	
GHG	greenhouse gas	
Gt	gigatons	
GW	gigawatt	
GWh	gigawatt-hours	
ICS	industrial control systems	
IEA	International Energy Agency	
loTs	internet of things	
mt	metric tonnes	
Mtoe	million tonnes of oil equivalent	
MW	megawatt	
OECD	Organisation for Economic Cooperation and Development	
ОТ	operational-technology	
SCADA	supervisory control and data acquisition	
SLOCs	storage locations	
SDGs	Sustainable Development Goals	
TWh	terrawatt hours	
WEC	World Energy Council

Contents

Ackn	owledgements	i
Acro	nyms and Abbreviation	iii
Chap	ter 1. Introduction	1
1.1.	The changing environment of energy ecosystems and energy security1	
1.2.	New geopolitical risks of renewables, electrification, digitalization, and the energy transition to a non-fossil fuel age7	
1.3.	The global COVID-19 pandemic – a new threat to energy security and a sustainable development	
1.4.	Challenges and opportunities for the Asia-Pacific region	
1.5.	Purpose and structure of the study19	

Chapter 2. New Dimensions of Energy Security

2.1.	Traditional understanding and definitions of energy security	21
2.2.	Resilience in the energy sector	28
2.3.	Supply security of Critical Raw Materials (CRMs)	30
2.4.	Cyber security of Critical Energy Infrastructures (CEIs)	34

21

43

Chapter 3. Global Energy Megatrends and Energy Security

3.1.	Global energy megatrends
3.2.	Decarbonization trends and the transition to clean energy futures
3.3.	The Impacts of COVID-19 on the global energy sector

Chapter 4. Challenges in Perspective: Moving Towards Electrification ofTransport and other Industry Sectors714.1Piring electricity demand71

4.1.	Rising electricity demand	/1
4.2.	Electrification of the transport sector	.78

Chapter 5. Coping with New Challenges for the Sustainable Development Goals in a Post-pandemic World: Where Do We Go from here?

5.1.	Introduction	89
5.2.	Perspectives by scenarios for SDG7	90
5.3.	Perspectives for energy policies and climate change targets	95
5.4.	The worldwide hydrogen boom – need for a realistic outlook	.07

Chapter 6. Balancing Short-Term Economic Recovery Programmes with Lo	ng-
Term Energy Security and Climate Protection Objectives	117

Chapter 7. Conclusions and	Recommendations	131
