

State of Afghan Cities Programme (SoAC)

Understanding Urbanisation in Afghanistan

Muhammad Farid

Australian Government

Department of Foreign Affairs and Trade

18 December 2014

How many people live in Kabul?

How many more are coming each year?

IDPs and returnees?

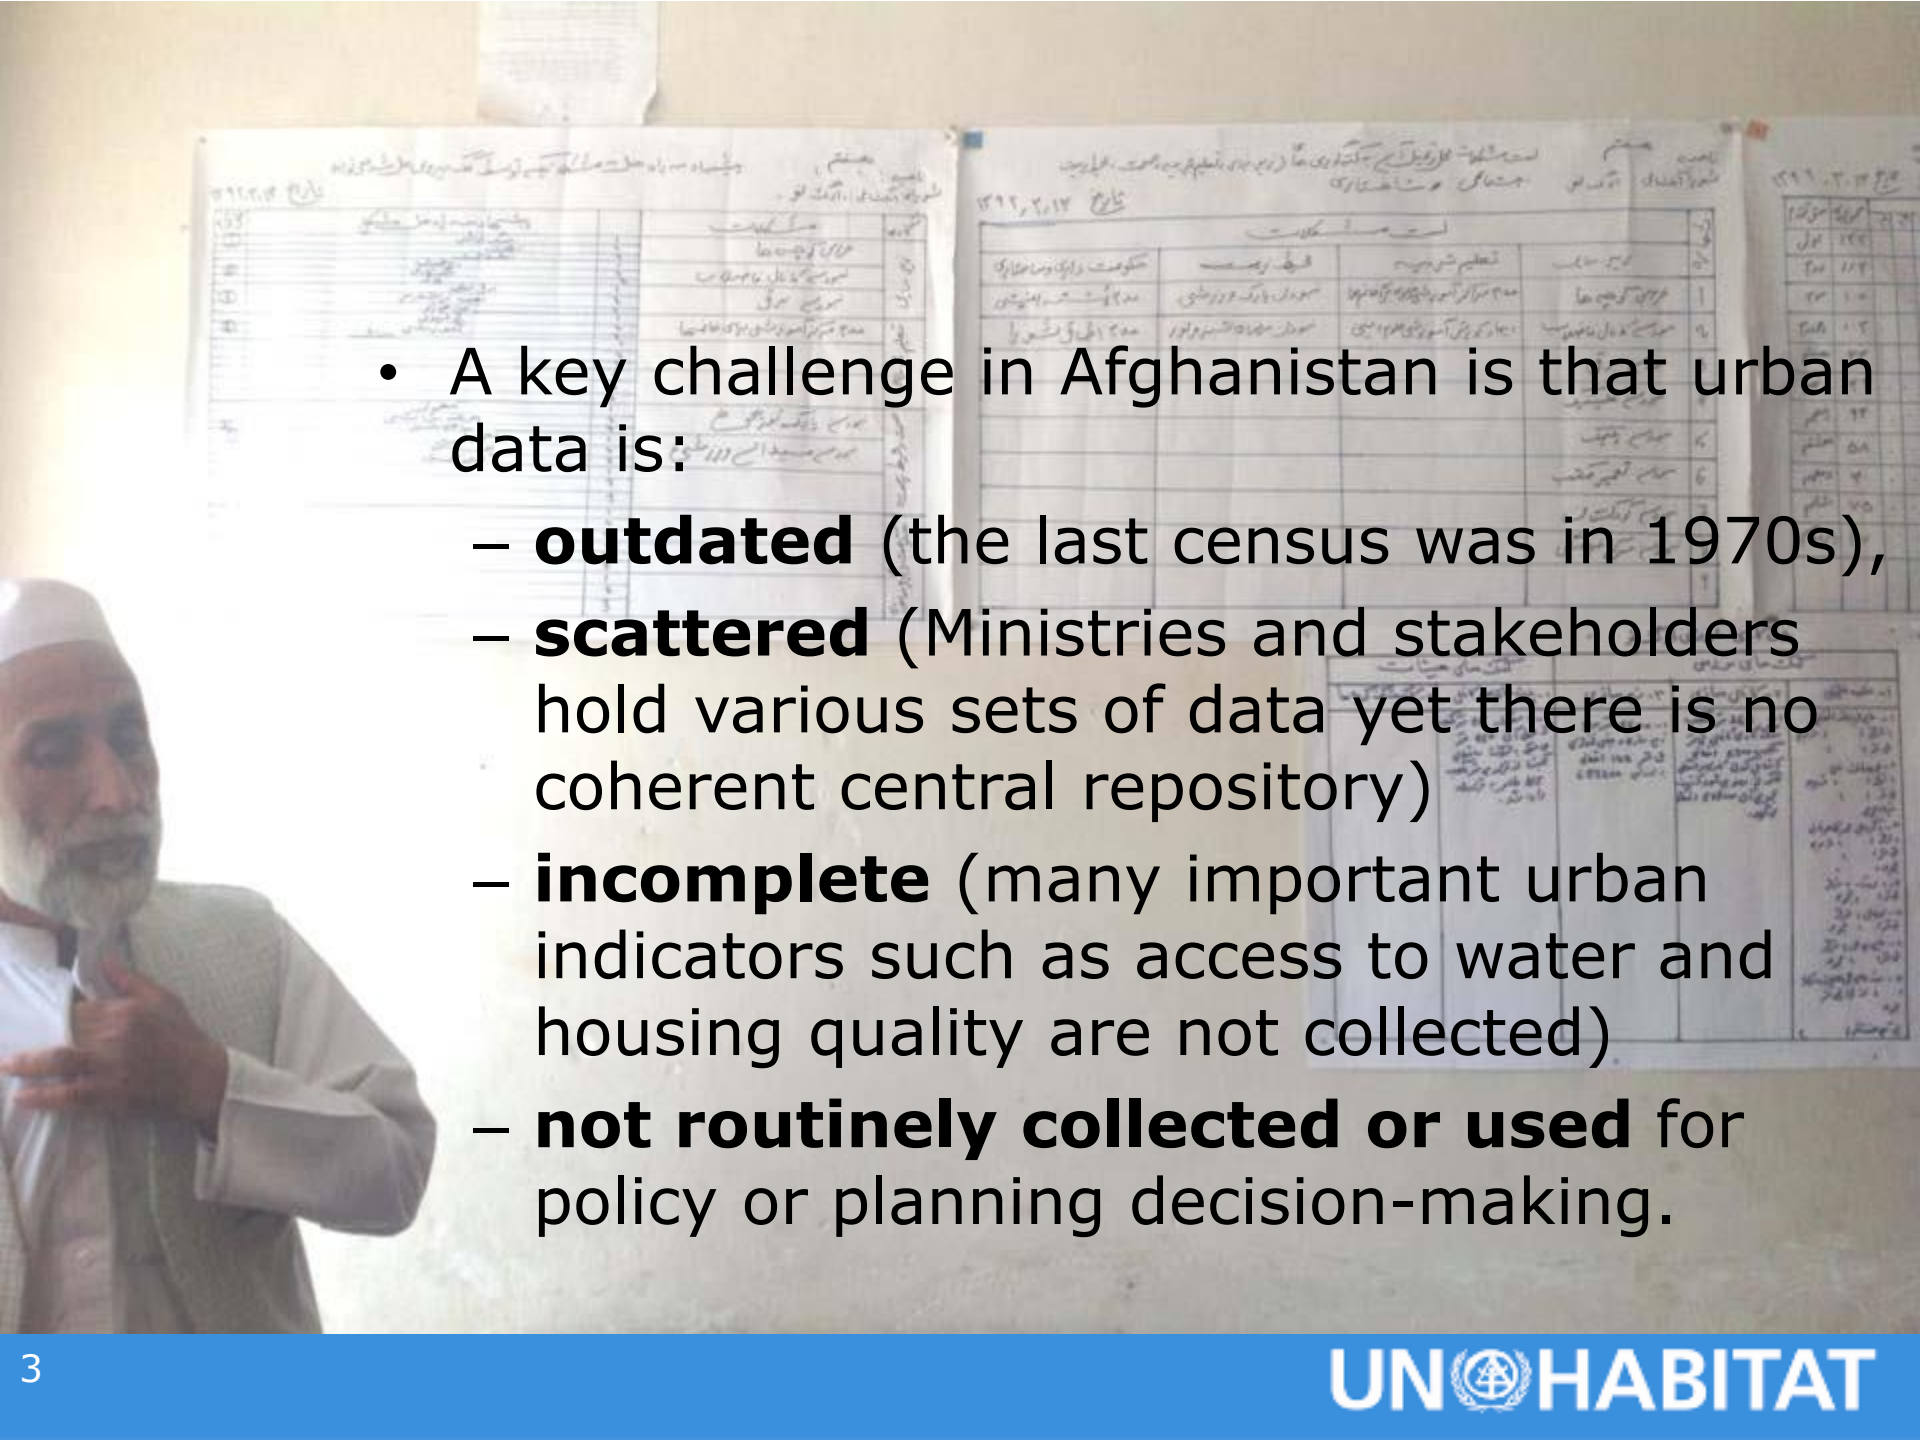

Jobs and livelihoods?

Access to basic services?

...

**How can we adequately
plan and manage a city if
you don't have this basic
information?**

Kabul, Feb 2012

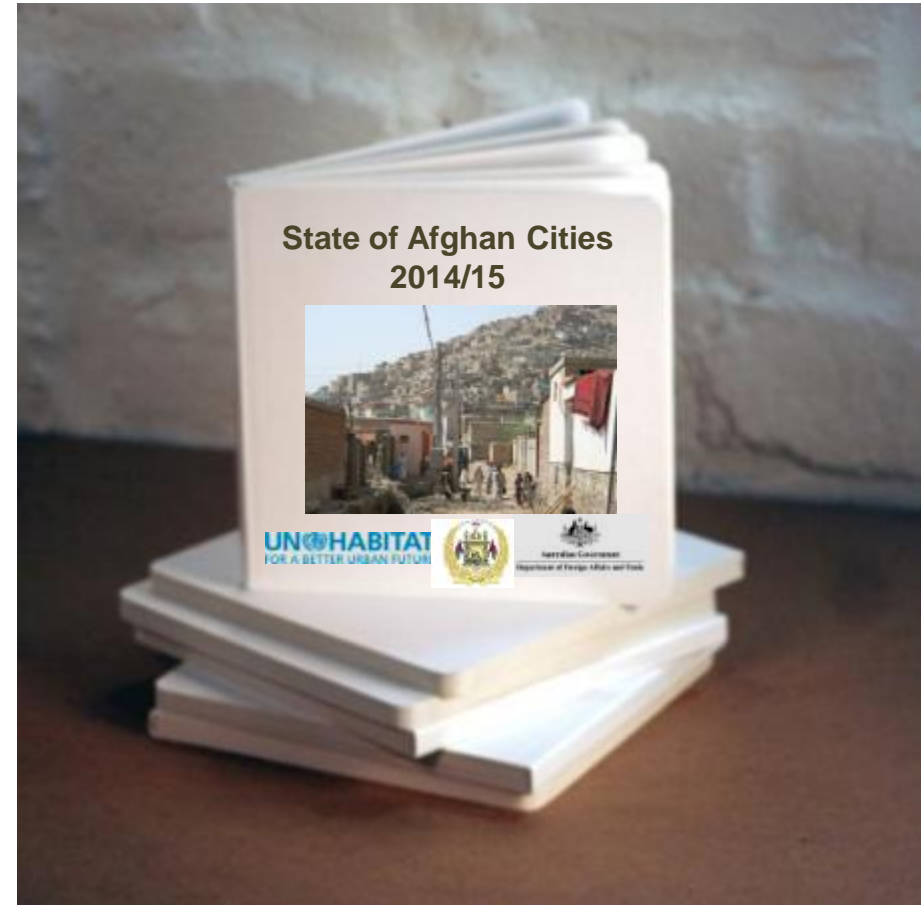

- 
- A key challenge in Afghanistan is that urban data is:
 - **outdated** (the last census was in 1970s),
 - **scattered** (Ministries and stakeholders hold various sets of data yet there is no coherent central repository)
 - **incomplete** (many important urban indicators such as access to water and housing quality are not collected)
 - **not routinely collected or used** for policy or planning decision-making.

2. Aims and Objectives

The programme will develop a *State of Afghan Cities 2014/5* Report.

The Report will present a well-informed and action-oriented analysis on the state of urbanization in Afghanistan.

It will include quantitative and qualitative city-based data and conduct specific analyses of key national, provincial and municipal urban development issues in all Provincial Capitals of Afghanistan.

3. Implementation Strategy

Kabul Municipality

**State of Afghan Cities
Programme**

*Ministry of
Urban Development Affairs
Islamic Republic of Afghanistan*

UN HABITAT
FOR A BETTER URBAN FUTURE

3. Implementation Strategy – Report Content

Scope and focus

The report will focus on all **33 provincial capitals and Kabul**.

The report will be structured into **thematic chapters**, each with three parts:

- 1) Status, challenges and opportunities;
- 2) Policy and practice constraints and implications;
- 3) Ways forward/Recommendations.

The report will have a strong spatial focus: it will present data on maps to show the spatial dimension of urbanization in Afghanistan (urban growth, poverty, economy, etc.), as well as a **focus on *primary data***.

3. Implementation Strategy – Report Content

1. Introduction: The urban future

2. Urban Governance: Inclusive cities

3. Urban Economy: Prosperous cities

4. Land and Housing: Safe and secure cities

5. Urban Environment: Livable cities

Statistical Annex

*Cross-cutting
issues:
Women,
Youth, Urban
Safety, IDPs
and urban
marginalised*
