Vientiane, Lao People's Democratic Republic
24-26 June 2014

Need for a robust, inclusive and transparent monitoring and accountability framework

Accountability framework

- Joint commitment of the international community to monitor, evaluate, share and discuss progress towards the implementation of the agreed goals

High-level Political Forum (HLPF)

- Created at Rio+20 by Member States
- Under ECOSOC and the GA: conduct regular reviews of implementation, starting in 2016
- Reviews shall be voluntary & reporting is encouraged
- Developed and developing countries, as well as UN entities
- State-led (Ministerial and other relevant high-level participants)
- Platform for partnerships, including through the participation of major groups and other relevant stakeholders
- Replace the AMR national voluntary presentations

Purpose of a post-2015 monitoring and accountability framework

- To promote implementation of the agenda through:
 - monitoring and incentivizing voluntary compliance with development commitments, including notably development cooperation
 - reviewing impact of interventions in terms of supporting achievement of sustainable development results
 - promoting mutual learning and exchange of lessons learned
 - Identification of the necessary means of implementation

Possible accountability architecture

- Overarching global framework with a number of specific national or regional level mechanisms
- Complemented by various mechanisms for the different purposes, reflecting their differentiated capabilities
- Reinforce existing accountability mechanisms at the global, regional, national and local levels and vice versa, in a multi-layered architecture

Examples

- ECOSOC Annual Ministerial Review and Development Cooperation Forum
 - Voluntary by members, report by secretariat, annual
- African Peer Review Mechanism (APRM) integrated in the New Partnership for Africa's Development (NEPAD)
