<b>ABBREVIATIONS.....</b>	<b>ix</b>
<b>ACKNOWLEDGEMENTS.....</b>	<b>xi</b>
<b>EXECUTIVE SUMMARY.....</b>	<b>xiii</b>
 <b>CHAPTER 1. CHALLENGES IN APPLYING LOW-CARBON DEVELOPMENT IN DEVELOPING COUNTRIES.....</b>	 <b>1</b>
<b>1.1 Challenges of applying low-carbon concept for developing countries in Asia and the Pacific Region.....</b>	<b>2</b>
1.1.1 Development challenges for developing countries in the Asia-Pacific region and their implication to the energy sector.....	2
1.1.2 Economic challenges and their implication to the energy sector.....	2
1.1.3 Social challenges and their implication to the energy sector.....	4
1.1.4 Environmental challenges and their implication to the energy sector.....	8
<b>1.2 Availability and research and development of clean energy technologies in Asia and the Pacific...</b>	<b>10</b>
1.2.1 Clean power technology.....	10
1.2.2 Clean heating/cooking technology.....	13
1.2.3 Liquid biofuels.....	13
1.2.4 Energy efficiency technologies.....	14
 <b>CHAPTER 2. APPROACHES AND PERSPECTIVES.....</b>	 <b>15</b>
<b>2.1 What is a low-carbon development path? Consensus and Debates.....</b>	<b>15</b>
<b>2.2 The Economics of Boldness: Tackling Climate Change.....</b>	<b>22</b>
2.2.1 Some general characteristics of the approach taken.....	22
2.2.2 Why move boldly? Bold and shy negotiation positions and first mover advantages.....	22
2.2.3 Scenarios tested and modelling.....	24
2.2.4 Preliminary results – and what they mean.....	26
2.2.5 Some consequences – mitigation, adaptation, and coalitions to deliver.....	28
2.2.6 The range and delivery mechanism for the required contributions.....	30
 <b>CHAPTER 3 APPROACHES TO DEMONSTRATE THE BENEFITS OF A LOW-CARBON DEVELOPMENT PATH.....</b>	 <b>31</b>
<b>3.1 Widening access to energy services.....</b>	<b>31</b>
3.1.1 Status of the issue: Quantitatively and qualitatively.....	31
3.1.2 Business as usual and related socio-economic and environmental implications.....	32
3.1.3 Project and trends towards 2030/2050.....	33
3.1.4 Projection of the use of renewable energy and energy efficiency in addressing these issues.....	34
3.1.5 Required policy intervention and needs for the betterment of enabling environment.....	35
3.1.6 Co-benefits.....	35
<b>3.2 Green buildings.....</b>	<b>36</b>
3.2.1 Status of the issue: quantitatively and qualitatively.....	36

3.2.2	Business as usual and related socio-economic and environmental implications.....	37
3.2.3	Project and trends towards 2030/2050.....	38
3.2.4	Use of renewable energy and energy efficiency technologies in the building sector.....	39
3.2.5	Policy intervention and needs for the betterment of enabling environment.....	40
3.2.6	Co-benefits.....	40
<b>3.3</b>	<b>Improved transport system.....</b>	<b>41</b>
3.3.1	Status of the issue: Quantitatively and qualitatively.....	41
3.3.2	Business as usual and related socio-economic and environmental implications.....	42
3.3.3	Project and trends towards 2030/2050.....	42
3.3.4	Projection of the use of renewable energy and energy efficiency in addressing these issues.....	44
3.3.5	Required policy intervention and needs for the betterment of enabling environment.....	45
3.3.6	Co-benefits.....	46
<b>3.4</b>	<b>Case Studies.....</b>	<b>47</b>
3.4.1	Japan.....	48
3.4.2	China.....	49
3.4.3	India.....	53
3.4.4	Thailand.....	54
<b>CHAPTER 4.</b>	<b>STRATEGIES TO PURSUE A LOW-CARBON DEVELOPMENT PATH - SOME SUCCESS STORIES....</b>	<b>57</b>
4.1	Reducing energy demand through efficiencies and lifestyle changes.....	58
4.2	Shifting to low-carbon technologies.....	60
4.3	Carbon Capture and Storage.....	63
4.4	Cross cutting.....	64
<b>CHAPTER 5.</b>	<b>FINANCING AND INVESTMENT CHALLENGES AND INSTRUMENTS.....</b>	<b>65</b>
5.1	Higher investments costs than expected.....	65
5.2	Uncertainties on clean energy investment and risks.....	66
5.3	Challenges for private enterprises.....	66
5.4	Lessons in Clean Development Mechanism (CDM).....	66
5.5	Obstacles in carbon market.....	67
5.6	Global Financial Crisis.....	68
<b>CHAPTER 6.</b>	<b>A POLICY FRAMEWORK IN SUPPORT OF THE DEVELOPMENT OF A LOW-CARBON ECONOMY: CHALLENGES, PRINCIPLES AND STRATEGIC CONSIDERATIONS.....</b>	<b>69</b>
6.1	Laws, regulations, rules and standards.....	69
6.1.1	Laws/Legislation.....	69
6.1.2	Regulations.....	70
6.1.3	Rules and standards.....	70
6.2	Policies.....	70
6.2.1	Economic policies.....	70
6.2.2	Energy policies.....	71
6.2.3	Environmental policies.....	71

6.2.4 Other policy considerations.....	71
<b>6.3 Institution and mechanism.....</b>	<b>71</b>
<b>6.4 Some Guiding Principles.....</b>	<b>72</b>
6.4.1 Build upon political consensus.....	72
6.4.2 And be effective.....	73

## **CHAPTER 7. STRATEGIES AND POLICIES IN PROMOTING A LOW-CARBON DEVELOPMENT PATH FOR THE ENERGY SECTOR.....**

<b>7.1 Strategies.....</b>	<b>75</b>
7.1.1 How to establish and implement a low-carbon growth country strategy.....	75
7.1.2 Socio-economic development strategies.....	77
7.1.3 Energy strategies.....	78
7.1.4 Technology and research and development strategies.....	78
7.1.5 Other strategies.....	79
7.1.6 Strengthening institutions through their creation or reorganization.....	81
<b>7.2 Policies.....</b>	<b>81</b>
7.2.1 Command and control regulation.....	82
7.2.2 Market-based instruments.....	83
7.2.3 Awareness-based approaches.....	84
7.2.4 Innovative mechanisms and instruments for post-2012 climate change regime.....	84

## **CHAPTER 8. A ROAD MAP TO DEVELOPMENT OF NATIONAL STRATEGIES FOR THE ENERGY SECTOR IN THE ASIA AND THE PACIFIC.....**

<b>8.1 Establish a long-term vision for energy security and low-carbon development.....</b>	<b>87</b>
8.1.1 Recommendation 1: Integrate energy security and climate change priorities into all aspects of domestic and international policymaking.....	87
8.1.2 Recommendation 2: Consider the different stage of industrialization when shaping national low-carbon development strategies.....	87
<b>8.2 Improve the energy system to promote low-carbon technologies and practices.....</b>	<b>88</b>
8.2.1 Recommendation 3: Enhance energy efficiency and renewable energy utilization.....	88
8.2.2 Recommendation 4: Provide financial and investment supporting channels for low-carbon energy system.....	90
8.2.3 Recommendation 5: Encourage research and development of clean energy technology.....	92
<b>8.3 Build enabling environment for transition to low-carbon development.....</b>	<b>94</b>
8.3.1 Recommendation 6: Build an appropriate policy and regulatory framework for low-carbon development.....	94
8.3.2 Recommendation 7: Enhance institutional mechanism to support low-carbon development.....	95
8.3.3 Recommendation 8: Make full use of public and private partnership to promote the transition of low-carbon development.....	97
8.3.4 Recommendation 9: Enhance public awareness on low-carbon development through public education.....	98

## Boxes

	<i>page</i>
Box 2-1. Modelling approach.....	26
Box 2-2. What happens when contrasting these scenarios with parallel market expansion?.....	28
Box 2-3. And if taken - could it make it? The chances of a virtuous cycle at scale.....	29
Box 7-1. India's Low-carbon Growth.....	76
Box 7-2. China and India cooperate on energy issues.....	80
Box 7-3. Measures to reduce greenhouse gas emission and enhance energy security.....	82
Box 8-1. China: Top-1000 Enterprises Energy Conservation Programme.....	89
Box 8-2. Capacity Development in Indonesia's Low-carbon Development Options Study.....	96

## Figures

	<i>page</i>
Figure 1-1. Index of change in GDP per capita, world regions (1990 United States dollars).....	2
Figure 1-2. Unsustainable energy-economy – environment nexus of fossil fuels.....	3
Figure 1-3. Consumption rate by fuel in 2008.....	3
Figure 1-4. Unemployment rate (in per cent).....	5
Figure 1-5. Percentage of population living below \$1.25 (2005 PPP) a day.....	6
Figure 1-6. Population growth rate in the Asia-Pacific region.....	6
Figure 1-7. Carbon intensity using market exchange rates.....	8
Figure 1-8. Major fuel ethanol producers, 2007, millions of litres.....	13
Figure 2-1. China: Total energy production and demand.....	17
Figure 2-2. Hypothesis on scenarios.....	24
Figure 3-1. Share of total primary energy supply in 2007.....	32
Figure 3-2. Primary energy demand in Asia and the Pacific, 1990–2030.....	32
Figure 3-3. Fuel mix in power generation in China and India in the BAU.....	32
Figure 3-4. Net energy imports, by subregion, 2005, 2015 and 2030.....	33
Figure 3-5. SO <sub>2</sub> Emissions by sector in the BAU.....	33
Figure 3-6. India's power generation fuel mix in the reference and alternative policy scenarios.....	34
Figure 3-7. Incremental energy-related CO <sub>2</sub> emissions by region and scenario 2005-2030.....	34
Figure 3-8. Changes in China's electricity generation in the alternative policy scenario and savings relative to the Reference Scenario, 2030.....	35
Figure 3-9. Total building energy growth history in China.....	36
Figure 3-10. Residential energy consumption by fuel in China, 2005 and 2030.....	37
Figure 3-11. Residential fuel mix in the reference scenario in India.....	37
Figure 3-12. Energy-related CO <sub>2</sub> emissions by residential and services in the reference scenario in China.....	38
Figure 3-13. Buildings sector emission projections in Australia.....	38

	<i>page</i>
Figure 3-14. Reduction in final energy consumption in the residential and services sectors in the alternative policy scenario by fuel in India, 2005-2030.....	39
Figure 3-15. Estimated change in total GHG emissions through adoption of energy efficiency measures in Australia.....	39
Figure 3-16. Average annual ambient a levels of selected Asian cities against WHO guidelines 1993-2006.....	41
Figure 3-17. China's transport energy demand by mode in the reference scenario.....	42
Figure 3-18. CO <sub>2</sub> emissions 2000–2030.....	42
Figure 3-19. Energy-related CO <sub>2</sub> emission reductions in the world in transport by sub-sector in the 450 Scenario compared with the Reference Scenario.....	43
Figure 3-20. Share of global passenger vehicle sales by engine technology and scenario.....	43
Figure 3-21. Chinese share of passenger vehicle sales by technology and average new vehicle on-road CO <sub>2</sub> intensity in the 450 Scenario.....	44
Figure 3-22. Road transport energy use in India in the reference and alternative policy scenarios.....	44
Figure 3-23. Measures to reduce the CO <sub>2</sub> emission from transport sector.....	44
Figure 3-24. CO <sub>2</sub> emission coefficients of Automotive Fuels.....	45
Figure 3-25. Impact of vehicle speed on CO <sub>2</sub> emissions.....	45
Figure 3-26. China additional investment in the 450 Scenario relative to the Reference Scenario.....	47
Figure 3-27. Annual Energy-Related Expenditure per Household in India.....	47
Figure 3-28. Share of total primary energy supply in Japan 2007.....	48
Figure 3-29. Share of total primary energy supply in China 2007.....	49
Figure 3-30. CO <sub>2</sub> emission in China from 2000 to 2008.....	49
Figure 3-31. Incremental capacity and cumulative capacity in China from 1995 to 2008.....	52
Figure 3-32. Wind power production and its share in total power from 2000 to 2008.....	52
Figure 3-33. Share of total primary energy supply share in India 2007.....	53
Figure 3-34. CO <sub>2</sub> emission in India from 2000 to 2008.....	53
Figure 3-35. Share of total primary energy supply in Thailand 2007.....	54
Figure 3-36. CO <sub>2</sub> emission in Thailand from 2000 to 2008.....	54
Figure 4-1. Electricity Use Per Capita, California and the Rest of the United States, 1960-2006.....	59
Figure 4-2. World Electricity Generation by Fuel, 2006-2030.....	60
Figure 4-3. Global Photovoltaic Market Demand in 2008.....	61
