ECONOMIC AND SOCIAL COMMISSION FOR ASIA AND THE PACIFIC

ESCAP is the regional development arm of the United Nations and serves as the main economic and social development centre for the United Nations in Asia and the Pacific. Its mandate is to foster cooperation between its 53 members and 9 associate members. ESCAP provides the strategic link between global and country-level programmes and issues. It supports Governments of the region in consolidating regional positions and advocates regional approaches to meeting the region's unique socio-economic challenges in a globalizing world. The ESCAP office is located in Bangkok, Thailand. Please visit our website at www.unescap.org for further information.

The shaded areas of the map represent ESCAP members and associate members.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Mention of firm names and commercial products does not imply the endorsement of the United Nations.

This publication was prepared by Mr. Ti Le-Huu of the Water Resources Section, Environment and Sustainable Development Division of ESCAP in cooperation with various national water resources experts participating in the implementation of the project on "Capacity-building in Strategic Planning and Management of Natural Resources in Asia and the Pacific". The views expressed are those of the authors and do not necessarily reflect the views of the United Nations or of the Governments of the countries concerned.

CONTENTS

	<i>Page</i>
Foreword	ix
PART I: INTRODUCTION TO THE APPLICATION OF STRATEGIC PLANNING AND MANAGEMENT TO WATER RESOURCES	
A. Introduction	3
1. Background	3
2. Lessons from the application of SPM to water resources	6
B. Principles adopted for application of SPM to water resources	7
1. Necessity of SPM for water resources development	7
2. Key elements/components and issues of SPM	8
3. Initiation and implementation of SPM	8
C. Concluding remarks on application of SPM to water resources	10
1. Contribution of SPM approaches to the development of IWRM plans	10
2. Expectations from SPM	11
PART II: EXAMPLES OF GOOD PRACTICES	
D. Strategic planning and management of water resources in the Haihe and Huaihe River basins of China	15
Introduction	15
I. Key national components of the integral strategic planning and management of water resources development in the Haihe River basin	18
II. Integrated strategic plan for the Huaihe River basin	34
III. Summary of water resources management goals linked to the socio- economic development targets of China	46
IV. Consultation mechanisms and initial findings	50
E. Strategic plan – Integrated water resources development for the Nadi River basin, Fiji	54
Introduction	54
I. Government policy	55
II. Features of the Nadi River basin	56
III. Strategic plan goals	60
IV. Implementation, monitoring and evaluation	63
V. Conclusion	65
F. Strategic planning for integrated water resources management in the Lao People's Democratic Republic	66
Introduction	66
I. Summary of the goals linked to socio-economic development targets	68
II. Legal and institutional framework	71

CONTENTS (continued)

	<i>Page</i>
III. Strategic plan goals	74
IV. Implementation, monitoring and evaluation	83
V. Consultation mechanisms and initial findings	86
VI. Conclusions and recommendations	88
G. Strategic planning and management of water resources in Malaysia: Langat River basin case study	89
Introduction	89
I. Background of the Langat River basin	89
II. Objective of the workshop	89
III. Outcome of the workshop	90
IV. Integrated river basin management (IRBM)	92
V. Benefits of SPM approach	94
VI. Challenges of SPM approach	96
VII. Plans for sustaining SPM approach	96
VIII. Concluding remarks	97
H. Strategic plan on integrated water resources management in Myanmar	98
Introduction	98
I. Summary of the goals linked to socio-economic development targets	100
II. Legal and institutional framework	101
III. Strategic plan goals	104
IV. Implementation, monitoring and evaluation	111
V. Consultation mechanisms and initial findings	113
VI. Conclusions and recommendations	115
I Strategic plan of the Pakistan Council of Research in Water Resources	117
Introduction	117
I. Summary of the goals linked to socio-economic development targets	119
II. Legal and institutional framework	124
III. Strategic plan goals	127
IV. Implementation, monitoring and evaluation	129
V. Consultation mechanisms and initial findings	132
VI. Conclusions and recommendations	133
J. National Water Resources Board: Strategic planning and management of integrated water resources management in the Philippines	137
Introduction	137
I. Summary of the goals linked to socio-economic development targets	141
II. Legal and institutional framework	146
III. Strategic plan goals	149
IV. Implementation, monitoring and evaluation	152
V. Consultation mechanisms and initial findings	155
VI. Conclusions and recommendations	156

CONTENTS (continued)

K. Outline of the strategic plan to establish a National Water Resources Authority of Sri Lanka	160
Introduction	160
I. National water sector context	160
II. Main issues and challenges	163
III. National water policy	167
IV. Sectoral water strategies	170
V. Institutional reforms	178
VI. Strategy to achieve integrated water resources management goals	186
VII. Water and national development	191
VIII. Water resources management financing	192
IX. Strategies and main outputs	195
X. Implementation, monitoring and evaluation	195
L. Water resources management strategies and action plans of Thailand	202
Introduction	202
I. Approach	202
II. Process	202
III. Output	202
M. Strategic plan for integrated water resources management of the Vu Gia-Thu Bon Basin Organization	213
Introduction	213
I. Successes and constraints, opportunities and challenges in water resources development in Viet Nam	213
II. Water resources in the Vu Gia-Thu Bon River basin	218
III. Current and projected socio-economic development	221
IV. Opportunities and challenges in sustainable water resources management in the Vu Gia-Thu Bon River basin	225
V. Organization and legal framework	227
VI. Proposed River Basin Organization	229
VII. Action programme	230
VIII. Conclusions and recommendations	234
N. Experiences in water resources management: Survey of issues for water resources management in the Pacific Subregion	236
Introduction	236
I. Surface water and groundwater resources	237
II. Climatic impact on water resources	238
III. Surface water development and storage	239
IV. Environment trends relevant to water resources	240
V. Social and economic trends and the water sector	240
VI. Development of water resources	241

CONTENTS (continued)

	Page
VII. Water quality	243
VIII. Management of watersheds	244
IX. Water information, assessment and monitoring	245
X. Information management	246
XI. Planning in the water sector	247
XII. Technical capacity	247
XIII. Administrative and management capacity	248
XIV. Institutional factors	248
XV. Cultural and social issues	249
XVI. Legislation	250
XVII. International and regional organizations	252
XVIII. Water resources management issues	253
XIX. Water management issues (small islands)	256
XX. Conclusions	256

LIST OF TABLES

D.1	Related provincial development targets	18
D.2	Economic losses caused by flooding in the Huaihe River basin	34
E.1	Major economic indicators, Fiji Islands, 2001-2005	58
E.2	Composition of GDP components and growth rates	59
E.3	Fiji macroeconomic data profile	59
G.1	Lead agencies	93
I.1	Annual discharge of western rivers at rim stations	118
I.2	Estimated groundwater resources	118
I.3	Indicators and benchmarks for helping to achieve targets in five-year/perspective development plans	130
J.1	Water demand in major cities of the Philippines (m ³ /year)	138
J.2	Volume of water extraction based on water right grantees	139
