CHAPTER 1

INTRODUCTION	1
--------------------	---

CHAPTER 2

SCALE AND SEVERITY OF RAILWAY LEVEL CROSSING ACCIDENT PROBLEM IN SELECTED COUNTRIES OF THE REGION.....	3
2.1 General	3
2.2 Level Crossing Safety in India	3
2.2.1 Summary	3
2.2.2 Level crossing safety record	4
2.2.3 Level crossing characteristics and effectiveness	7
2.2.4 Administration of railway safety regulations: role of the CRS.....	11
2.2.5 Level crossing system evaluation techniques	12
2.2.6 Level crossing safety initiatives	14
2.2.7 Level crossing safety impediments	16
2.3 Level Crossing Safety in the Islamic Republic of Iran	16
2.3.1 Summary.....	16
2.3.2 Level crossing safety record.....	17
2.3.3 Level crossing characteristics and effectiveness	19
2.3.4 Administration of railway safety regulations.....	20
2.3.5 Level crossing system evaluation techniques (technical and financial).....	20
2.3.6 Level crossing safety initiatives	22
2.3.7 Level crossing safety impediments	22
2.4 Level Crossing Safety in the Russian Federation.....	23
2.4.1 Level crossing characteristics and effectiveness	23
2.4.2 Level crossing evaluation system	27
2.4.3 Level crossing safety impediments.....	28
2.5 Level Crossing Safety in Viet Nam.....	30
2.5.1 Summary.....	30
2.5.2 Level crossing safety record.....	31
2.5.3 Level crossing characteristics and effectiveness.....	33
2.5.4 Administration of safety regulations in relation to level crossings.....	35

CONTENTS (Continued)

	<i>Page</i>
2.5.5 Level crossing system evaluation techniques (technical and financial).....	36
2.5.6 Level crossing safety initiatives.....	38
2.5.7 Level crossing safety impediments.....	41
2.6 Level Crossing Safety in Bangladesh, Philippines and Thailand.....	45
2.6.1 Level crossing safety record.....	45
2.6.2 Level crossing characteristics and effectiveness.....	47
2.6.3 Level crossing system evaluation techniques.....	49
 CHAPTER 3	
RAILWAY LEVEL CROSSING SAFETY EXPERIENCE AND ENHANCEMENT IN DEVELOPED COUNTRIES.....	51
3.1 General.....	51
3.2 Some definitions.....	51
3.3 Experience of the United Kingdom in safety management.....	52
3.3.1 A change in the philosophy of railway safety management.....	53
3.3.2 Development of a Risk Management Approach in British Railways.....	54
3.3.3 Risk management as applied to level crossing accidents in the United Kingdom.....	59
3.3.4 Safety Valuation in Transport Project Appraisal.....	62
3.4 Level crossing experience of the United States of America.....	65
3.5 Level crossing experience of Canada.....	69
3.6 Level crossing experience of continental Europe.....	72
3.7 Level crossing experience of Japan.....	81
3.7.1 Level crossing evolution.....	81
3.7.2 Current level crossing inventory.....	82
3.7.3 Level crossing safety performance in Japan.....	85
3.7.4 Level crossing evaluation methods in Japan.....	89
3.7.5 Motor vehicle driver education.....	90
3.7.6 Future level crossing safety policy.....	91

CONTENTS (Continued)

Page

CHAPTER 4

RECOMMENDED TECHNIQUES FOR RAILWAY LEVEL CROSSING SAFETY ASSESSMENT IN THE ASIA-PACIFIC REGION..... 93

- 4.1 General..... 93
- 4.2 Requirements of a Safety Management Information System.. 94
- 4.3 Relevance and application of Quantified Risk Analysis to
level crossing safety management..... 101
- 4.4 Cost-Benefit Evaluation of level crossing safety management
measures..... 105
 - 4.4.1 Valuing human life..... 106
 - 4.4.2 Assessing the delay reduction benefits of alternative
level crossing protection systems..... 108
 - 4.4.3 Financial analysis of alternative methods of safety
enhancement at level crossings..... 113
- 4.5 Technical assessment of level crossing protection devices.. 114
 - 4.5.1 Currently available level crossing protection
systems..... 114
 - 4.5.2 Future systems for level crossing protection..... 117

CHAPTER 5

CONCLUSIONS AND RECOMMENDATIONS..... 121

- 5.1 General..... 121
- 5.2 Conclusions..... 121
 - 5.2.1 Comparative level crossing safety performance..... 121
 - 5.2.2 Comparative costs of level crossing systems..... 121
 - 5.2.3 Do the railway systems of the region have an adequate
information base for setting level crossing upgrading
priorities?..... 122
 - 5.2.4 Are the railways of the region committed to road user
education programmes and potentially how effective
are these programmes?..... 122

CONTENTS (Continued)

	<i>Page</i>
5.2.5 Traffic threshold criteria for level crossing improvement.....	124
5.2.6 Level crossing safety and operational efficiency.....	124
5.3 Recommendations.....	125

LIST OF TABLES

	<i>Page</i>
Table 2.1 Significance of and trend in level crossing accidents in India.....	4
Table 2.2 Significance of and trend in level crossing fatalities in India.....	6
Table 2.3 Significance of and trend in level crossing injuries in India.....	6
Table 2.4 Level crossings on the Indian Railways network, by type.....	8
Table 2.5 Causes of accidents at manned level crossings, 1993-94 to 1997-98.....	9
Table 2.6 Level crossing characteristics and performance, by zonal railway.....	11
Table 2.7 TVU criteria for level crossing type.....	13
Table 2.8 Criteria for manning of unprotected level crossings.....	13
Table 2.9 Measures of the importance of railway lines used to establish level crossing manning priorities.....	14
Table 2.10 Annual plan of level crossing conversion to manned status.....	14
Table 2.11 Level crossing installations by type, Islamic Republic of Iran	20
Table 2.12 Trend in level crossing numbers.....	24
Table 2.13 Trend in level crossing accidents.....	24
Table 2.14 Trend in level crossing accident rates.....	25
Table 2.15 Types of level crossings operational in 1999.....	26
Table 2.16 Trend in the numbers of each manned crossing type.....	27
Table 2.17 Trend in the numbers of each unmanned crossing type.....	27
Table 2.18 Level crossing classification in the Russian Federation.....	27
Table 2.19 Distribution of all level crossings, by traffic density class	28
Table 2.20 Number and density of level crossings in Viet Nam.....	33
Table 2.21 Road classification system in Viet Nam	38
Table 2.22 Proposed Level Crossing Upgrading Programme, Viet Nam	40
Table 2.23 Level crossing accidents, 1988-1998	45
Table 2.24 Level crossing fatalities, 1988-1998	46
Table 2.25 Level crossing injuries, 1988-1998	47
Table 2.26 Density of level crossings and number, by type	47
