

THE 2019 POPULATION AND HOUSING CENSUS DATA DASHBOARD

The 2019 Population and Housing Census data page provides basic information on Vietnam's population and housing, stratified by geographic region and sex, including the following indicators: size and population structure, marriage, fertility, mortality, migration and urbanization, education, employment, and living conditions of the household. These information are compiled from the results of the 2019 Population and Housing Census at 0:00 on April 1, 2019. In addition to the access to the indicators designed in the form of charts, visual images, the user can download data tables for analysis, research and prediction purposes.

The data sheet also links to major results reports, monographs and a number of other products of the 2019 Population and Housing Census. This data page has been developed by the General Statistics Office with the technical and financial support of the United Nations Population Fund in Vietnam.
