**The Swedish Association of Local Authorities and Regions** (SALAR, SKR with its Swedish acronym) is a member organization for all of Sweden's municipalities, country councils and regions. SALAR, and its predecessors, has existed for over 100 years and strives to promote and strengthen local self-government and the development of regional and local democracy. Due to the global nature of challenges that municipalities face today, SALAR is also an important actor at the international arena of local governments. It is active in the global organization for municipalities, the United Cities and Local Governments (UCLG), in its European branch, the Council of European Municipalities and Regions (CEMR), and as the secretariat for the Swedish delegations to the EU Committee of Regions and for the Council of Europe Local and Regional Congress.

**SKL International** is a fully-owned subsidiary of SALAR. Its role is to implement and deliver international projects on behalf of SALAR, by drawing from relevant Swedish and other country experiences to support the development of local government systems and practice in developing countries and countries in transition or conflict.

Through its work in the MENA region and elsewhere, SALAR/SKL International has generated extensive knowledge and thorough understanding of issues of decentralisation, local governance, and local service delivery in fragile or close to conflict contexts; including how this brings the need for responsive and conflict sensitive approaches and flexible project management frameworks. SKL International is the long- term partner and implementer of the projects financed by the Swedish Government in 12 countries across the world, with its headquarters located in Stockholm.

SKL International has been operating in Turkey for over twenty years with the Turkish-Swedish Municipal Partnerships Network Project (TUSENET), Turkish-Swedish Partnership for Local Governance (TUSELOG) and ongoing Resilience in Local Governance Project (RESLOG Turkey). In this scope, SKL International supports municipalities and municipal unions in Turkey and also contributes to the establishment of permanent relations and cooperation between the local governments in these two countries.
