

The Republic of the Union of Myanmar

Myanmar Climate Change Strategy (2018 – 2030)

2019

Acknowledgements

The Ministry of Natural Resources and Environmental Conservation (MONREC) acknowledges the important contribution made by all members of the Programme Steering Committee of the Myanmar Climate Change Alliance (MCCA) for their guidance and all members of the MCCA's Technical Working Group (TWG) for their contribution in formulating this strategy. The TWG comprises representatives from all key ministries and departments; Yangon, Mandalay and Nay Pyi Taw city development committees; academic institutions; the Union of Myanmar Federation of Chambers of Commerce and Industry (UMFCCI); Civil Society Organisations, including the Myanmar Environment Rehabilitation Network (MERN), and the Platform of CSOs working on Environment and Climate Change; Myanmar Engineering Society; and Development Partners, the United Nations Development Programme (UNDP), Disaster Risk Reduction Working Group, Environment Sector Working Group, UN-REDD+, WWF-Myanmar. These members provided valuable insights, ideas and strategic orientation to produce an actionable strategy.

MONREC is sincerely grateful to the European Union for the generous support received through funding the MCCA programme, implemented by the United Nations Human Settlements Programme (UN-Habitat) and the United Nations Environment Programme (UN Environment). MCCA has worked as an efficient platform for convening national and sub-national stakeholders for the strategy formulation process from April 2015 to June 2016, and to mobilize expertise to draft the Strategy. MONREC also wishes to thank the experts of the International Institute for Environment and Development (IIED), the experts who formulated the capacity development need assessments in connection to the Strategy and MERN for facilitating the local consultations.

The Ministry of Natural Resources and Environmental Conservation (MONREC) also acknowledges the important contribution made by all stakeholders, including the TWG, PSC, the UMFCCI; civil society organisations, including MERN, and development partners, WWF-Myanmar, consulted for the formulation of the Myanmar Climate Change Policy (MCCP). In particular MONREC would like to thank the Environment Ministers and high level representatives of the Environmental Conservation Department for their valuable

contributions and for travelling from different states and regions to attend the national consultation workshops; and the experts of the International Institute for Environment and Development (IIED) drafting team for their tireless efforts in formulating the Myanmar Climate Change Policy that provides long-term direction and guidance for government, civil society, and the private sector to undertake and promote climate change actions in adaptation and mitigation in Myanmar and to create opportunities for sustainable and low-carbon development.

On behalf of the Government of the Republic of the Union of Myanmar, MONREC extends its gratitude to all citizens of Myanmar who participated in meetings at local, sub-national and national levels in more than 20 townships in five states and regions, and those who provided comments through the MCCA website and by other means through out the formulation process of the Myanmar Climate Change Strategy and Master Plan (MCCS and MCCMP) 2018–2030 and the Myanmar Climate Change Policy (MCCP).

Table of contents.....	3
Glossary	7
Acronyms.....	9
Forewords.....	12
Executive summary.....	20
Part I: Development in the context of climate change.....	27
1. National circumstances.....	27
1.1 Climate.....	28
1.2 Demography.....	29
1.3 Economic development.....	31
1.4 Social development.....	34
1.5 Environmental development.....	34
1.6 Governance systems.....	35
2. Myanmar's development vision.....	37
2.1 Economic development.....	37
2.2 Social development.....	38
2.3 Environmental development.....	39
2.4 Climate change.....	41
3. Implications of climate change on development.....	48
3.1 Agriculture, fisheries and livestock.....	53
3.2 Environment and natural resources.....	58
3.3 Energy, transport and industry.....	64
3.4 Cities, towns and human settlements.....	73
3.5 Climate hazards and health.....	79
3.6 Education, science and technology.....	85
4. Readiness and capabilities for addressing climate change	90

4.1 Policy landscape.....	90
4.2 Institutional arrangements.....	95
4.3 Financing mechanism.....	96
4.4 Monitoring and evaluation.....	99
4.5 Technology and innovation.....	99
4.6 Awareness and capacity.....	100
4.7 Partnerships.....	101
4.8 Youth and children.....	102
4.9 Gender considerations.....	103
Part II: The strategy.....	106
5. Myanmar Climate Change Strategy.....	108
5.1 Strategic vision.....	108
5.2 2030 Goal.....	108
5.3 Objectives.....	108
5.4 Action areas.....	109
5.5 Priority sectors and outcomes.....	110
5.5.1. Climate-smart agriculture, fisheries and livestock for food security...	111
5.5.2. Sustainable management of natural resources for healthy ecosystem.....	112
5.5.3. Resilient and low-carbon energy, transport and industrial systems for sustainable growth.....	112
5.5.4. Resilient, inclusive and sustainable cities and towns where people can live and thrive.....	113
5.5.5. Climate risk management for people’s health and wellbeing.....	114
5.5.6. Education, science and technology for a resilient society.....	115
5.6 Strategic indicators.....	116
5.6.1 Achieving sectoral outcome.....	116
5.6.2. Phases.....	117
Part III: Implementing the strategy.....	119

6. Overall mission: to direct action for addressing climate change.....	120
7. Guiding principles.....	121
8. Strategic master plan and sectoral outcomes.....	122
9. The five pillars of implementation.....	131
9.1 Policy framework	131
9.2 Multi-stakeholder institutional mechanism.....	132
9.3 Climate finance mechanism.....	139
9.4 Capacity-strengthening framework	141
9.5 Monitoring, evaluation and learning framework.....	143
References.....	145
