COVID-19 situation for refugees in Jordan

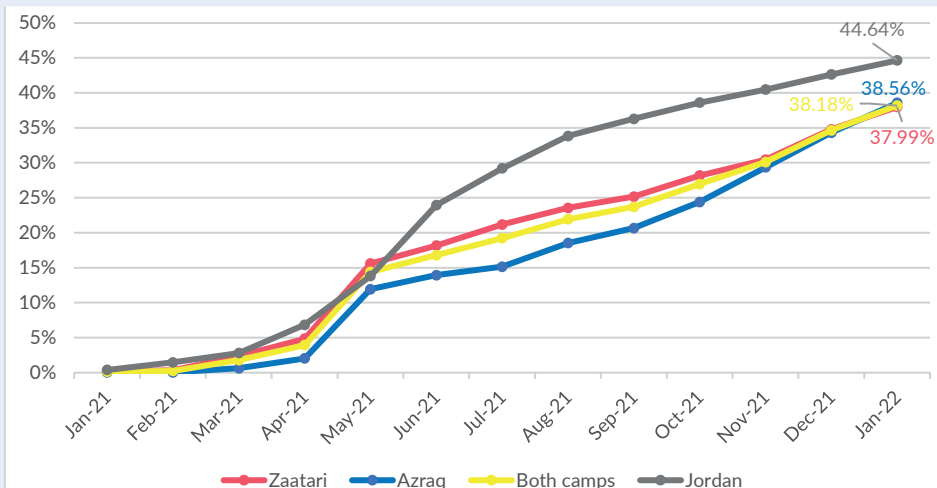

UNHCR Jordan

January 2022

COVID-19 vaccinations in urban vaccination stations

COVID-19 vaccinations in camps as % of population*

* Vaccination rates are calculated as a percentage of total population, not population eligible to receive the COVID-19 vaccine.

HIGHLIGHTS

- ◆ Over **90%** of the Syrian refugee population in camps in Jordan, about **50%** of the Syrian and about **40%** of the non-Syrian refugee population in urban areas (18 years and above) have received at least one dose of the COVID-19 vaccine.
- ◆ New vaccination stations have been set up in UNHCR Registration Centres in Amman, Mafraq and Irbid, as well as community centres across Jordan. As of January, mobile vaccination stations have also been deployed to southern governorates to reach more people. Over **12,600** people have been vaccinated through these efforts as of mid-February.
- ◆ Some **80,000** refugee families have received UNHCR's cash compensation for transportation to and from the vaccination centre, as part of the ongoing efforts to increase vaccination rates among the refugee population.

COVID-19 RESPONSE

- ◆ Awareness raising about the COVID-19 vaccination program, through focus group discussions, the UNHCR Helpline, **outreach volunteers**, **FAQs**, **social media**, and more
- ◆ Enhanced community engagement and **communications** via SMS text, social media and WhatsApp to refugee populations
- ◆ In-camp vaccination centres in Zaatari and Azraq camps, upgrading of quarantine facilities, and PPE provision for frontline workers/refugees
- ◆ Health screening procedures, surveillance and monitoring
- ◆ Remote services, protection hotlines and the **Help website**
- ◆ Supporting refugee access to e-learning platforms
