Disclaimer

This publication has been produced with the support of PAGE funding partners. The contents of this publication are the sole responsibility of PAGE and can in no way be taken to reflect the views of any Government. The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the PAGE partners concerning the legal status of any country, territory, city or area or of its authorities, or concerning delimitation of its frontiers or boundaries. Moreover, the views expressed do not necessarily represent the decision or the stated policy of the PAGE partners, nor does citing of trade names or commercial processes constitute endorsement.

PAGE promotes environmentally sound practices globally and in its own activities. This publication is printed on 100% recycled paper. Our distribution policy aims to minimise the carbon footprint.

ACKNOWLEDGEMENTS

This report was commissioned under the Partnership for Action on Green Economy (PAGE) to guide policymakers in the development of their strategic green industrial policies (SGIP) as they advance their green economies.

UNIDO would like to express its gratitude to the PAGE partners – the International Labour Organization, United Nations Development Programme, the United Nations Environment Programme, and the United Nations Institute for Training and Research Institute – for their support and continued collaboration on this project.

The Practitioner's Guide was authored by an expert team consisting of Christina Buczko, Leisa Burrell, Ralph Luken and Anna Pegels under the leadership of Christoph David Weinmann. The team was guided by a group of UNIDO staff including Smeeta Fokeer (who also took detailed care of several sections), Philipp Neuenburg, Michele Clara and Charles Arthur, and coordinated by Claudia Linke-Heep.

The guide was reviewed by the PAGE partners, the members of the Green Industry Platform technical committee, as well as UNIDO colleagues from various departments, whom we would all like to thank for their substantive inputs. We would furthermore like to express our gratitude to UNIDO's Publications Committee for their valuable comments and endorsement, in particular Mr. Ludovico Alcorta.

Special thanks are due to Heinz Leuenberger, Rene van Berkel, Ciyong Zou and Jürgen Hierold of UNIDO for their support and supervision; Ana Regina Marquez Lacayo, Edith Recourt, Patrick Göttner and Gavin Steel for their project support; Leisa Burrell and Shay Griffin for their thorough editing and Michael Geyer for design and layout of the report.

PAGE gratefully acknowledges the support of all its funding partners: European Union, Germany, Finland, Norway, Republic of Korea, Sweden, Switzerland and the United Arab Emirates.

OVERVIEW

How to use this guide

Glossary

References

Chapter 1
What is strategic green industrial policy (SGIP)?

Evolution of industrial policy

Externalities from manufacturing and consumption of consumer products

Circular economy as a necessary alternative to conventional modes of manufacturing

Chapter 2
SGIP - The key issues

The role of economics

The task for modern industrial economists

Decoupling of manufacturing - the key SGIP target

Challenge: Decoupling energy, water and material flows from growth in manufacturing

More general benefits of SGIP

Understanding and addressing risks

Turning risks into opportunities

Practitioner's Guide to Strategic Green Industrial Policy

Chapter 3
The SGIP cycle

Chapter 4
The SGIP policy phases in more detail

Overview of phases

Cross-cutting and central work

Stakeholder coordination

Phase 1: High level vision-setting (in parallel with Phase 2)

Phase 2: Stocktaking (policy & data stocktaking for baseline setting and benchmarking)

Phase 3: Prioritizing intervention areas/goal setting

Phases 4 & 5 (parallel phases): Policy domains, policy instruments, strategy design & strategy impact assessment

Phase 6: Implementation

Capacity building

Gender mainstreaming

Monitoring and evaluation

Status quo document

Policy stocktaking

Phase 2 continued: Data stocktaking for baseline setting and benchmarking & understanding the systems

SGIP policy domains

Categories of policy

Strategy design

Strategy impact assessment

Policy legitimization process

Phase 2: Stocktaking: Establishing the evidence base for the SGIP

Phase 2 continued: Resource use and pollution within the manufacturing industry

Phase 2 continued: Integrating the manufacturing industry with the green economy

What if there is no evidence available?

Phase 2 continued: Indicators for setting SGIP targets (leading into Phase 3 - Goal setting)

Stages of industrialization & their influence on choices of policy mix

Principles to guide the identification of the most appropriate mix of SGIP policy instruments

Policy domains

Categories of policy instruments

Communicating the SGIP

Phase 1: The vision - Theory of change

Phases 4 & 5: Policy domains, policy instruments, strategy design & strategy impact assessments

TABLE OF CONTENTS

BOXES, FIGURES, MINDMAPS and TABLES

ABBREVIATIONS

HOW TO USE THIS GUIDE

1. WHAT IS STRATEGIC GREEN INDUSTRIAL POLICY (SGIP) AND WHY IS IT NEEDED?

- 1.1. Introduction 13
- 1.2. The evolution of industrial policy 14
- 1.3. Externalities from manufacturing and consumption of consumer products 15
- 1.4. A new way forward: Green industry policy, the green economy, and the circular economy as necessary alternatives to conventional modes of manufacturing 16

2. STRATEGIC GREEN INDUSTRIAL POLICY – THE KEY ISSUES

- 2.1. The role of economics 24
- 2.2. The task for modern industrial economists 25
- 2.3. Decoupling of manufacturing – the key SGIP target 26
- 2.4. The challenge for SGIP: Decoupling energy, water and material flows from growth in manufacturing 29
- 2.5. More general benefits of SGIP 31
- 2.6. Understanding and addressing risks associated with SGIP 32
- 2.7. Turning risks into opportunities 33

3. A STRATEGIC GREEN INDUSTRIAL POLICY CYCLE

- 3.1. Introduction 37
- 3.2. Phases of SGIP development 39
- 3.3. Overview of the SGIP cycle phases 40
- 3.4. Preliminary and cross-cutting phases 40
- 3.5. Stakeholder Coordination 41
 - 3.5.1 Capacity Building 41
 - 3.5.2 Gender Mainstreaming 42
 - 3.5.3 Monitoring and Evaluation (M&E) 42
 - 3.5.4 Status Quo Document 42
- 3.6 Phase 1: High level vision-setting (in parallel with Phase 2) 44
- 3.7 Phase 2: Stocktaking (policy & data stocktaking for baseline setting and benchmarking) 44
 - 3.7.1 Policy stocktaking 45
 - 3.7.2 Phase 2 continued: Data stocktaking for baseline setting, benchmarking & understanding the systems 47
- 3.8 Phase 3: Prioritizing intervention areas/Goal setting 48
- 3.9 Parallel phases: Phase 4: Policy domains & policy instruments 48
 - Phase 5: Policy pathway design & impact assessment
 - 3.9.1 Elements to consider when selecting policy domains and policy instruments 49
 - 3.9.2 SGIP policy domains 50
 - 3.9.3 Categories of policy instruments 51
 - 3.9.4 Policy pathway design 51
 - 3.9.5 Impact assessments 52
- 3.10 Phase 6: Implementation 53

4. THE SGIP POLICY PHASES IN MORE DETAIL	55
4.1. Capabilities required for managing the transition to SGIP	57
4.1.1 Capability One: Strategic government	58
4.1.2 Capability Two: Establishing and enforcing clear rules of competition	58
4.1.3 Capability Three: Effective service delivery	58
4.2 Stakeholder analysis, consultation & participation	59
4.2.1 Stakeholder coordination	62
4.3 Phase 1: The Vision-Theory of change	65
4.4 Phase 2: Stocktaking-Establishing the evidence base for the SGIP	67
4.4.1 Phase 2 continued: Resource use and pollution within the manufacturing industry	68
4.4.2 Phase 2 continued: Integrating the manufacturing industry with the green economy	70
4.4.3 What if there is no evidence available?	71
4.4.4 Phase 2 continued: Indicators for setting SGIP targets (leading into Phase 3-Goal setting)	74
4.5 Phase 4: Policy domains and policy instruments	78
4.5.1 Background: Stages of industrialization & their influence on the selection of policy mix	78
4.5.2 Factors to consider before selecting a policy domain, policy instrument/mix of policy instruments	79
4.5.3 Policy domains	80
4.5.4 Categories of policy instruments	81
4.5.5 Communicating the SGIP	84

5. CONCLUSION	86
