This document has been produced without formal United Nations editing. The designations employed and the presentation of the material in this document do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations Industrial Development Organization (UNIDO) concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries, or its economic system or degree of development. Designations such as “developed”, “industrialized” and “developing” are intended for statistical convenience and do not necessarily express a judgment about the stage reached by a particular country or area in the development process. Mention of firm names or commercial products does not constitute an endorsement by UNIDO. The selection of projects to illustrate UNIDO’s engagement aims at demonstrating their geographic and thematic variety and scope and is not endorsed by UNIDO.

design // red hot 'n' cool

Goal 1.

End poverty in all its forms everywhere

Goal 2.

End hunger, achieve food security and improved nutrition and promote sustainable agriculture

Goal 3.

Ensure healthy lives and promote well-being for all at all ages

Goal 4.

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

Goal 5.

Achieve gender equality and empower all women and girls

Goal 6.

Ensure availability and sustainable management of water and sanitation for all

Goal 7.

Ensure access to affordable, reliable, sustainable and modern energy for all

Goal 8.

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Goal 9.

Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

Goal 10.

Reduce inequality within and among countries

Goal 11.

Make cities and human settlements inclusive, safe, resilient and sustainable

Goal 12.

Ensure sustainable consumption and production patterns

Goal 13.

Take urgent action to combat climate change and its impacts

Goal 14.

Conserve and sustainably use the oceans, seas and marine resources for sustainable development

Goal 15.

Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss

Goal 16.

Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

Goal 17.

Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development

Inclusive and Sustainable Industrial Development and the 2030 Agenda for Sustainable Development

UNIDO's vision to address today's economic, social and environmental challenges is enshrined in the Lima Declaration, which was adopted by UNIDO Member States in December 2013.

On this basis, the Organization pursues Inclusive and Sustainable Industrial Development to harness industry's full potential to contribute to lasting prosperity for all. The mandate is based on the recognition by Member States that poverty eradication "can only be achieved through strong, inclusive, sustainable and resilient economic and industrial growth, and the effective integration of the economic, social and environmental dimensions of sustainable development."

Inclusive and sustainable industrial development (ISID) means that:

- Every country achieves a higher level of industrialization in their economies and benefits from the globalization of markets for industrial goods and services.

- No one is left behind in benefiting from industrial growth, and prosperity is shared among women and men in all countries.
- Broader economic and social growth is supported within an environmentally sustainable framework.
- The unique knowledge and resources of all relevant development actors are combined to maximize the development impact of ISID.

The Sustainable Development Goals (SDGs) constitute the core of the 2030 Agenda for Sustainable Development adopted by the international community on 25 September 2015, the new development framework that seeks to transform our world and will guide all global, regional and national development endeavours for the next 15 years. These Goals, and their associated targets, frame the 2030 Agenda with the vision and ambition to both achieve a balance among the three dimensions of sustainable development – environmental, social and economic – and integrate them into a universal and visionary

framework for global cooperation and action. This integrated approach intrinsically recognizes the interrelated nature of all goals and targets, their trade-offs and synergies. UNIDO's goal of achieving ISID is explicitly recognized and anchored within the internationally agreed 2030 Agenda.

Through Goal 9, the Member States of the United Nations call upon the international community to "*build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation*". ISID can therefore serve as a primary engine not only of job creation and economic growth but also of technology transfer, investment flows and skills development, as also acknowledged in the Addis Ababa Action Agenda of the Third International Conference on Financing for Development held in July 2015.

In addition to Goal 9, all other SDGs incorporate some industry-related aspects and targets. As a core driver of the global

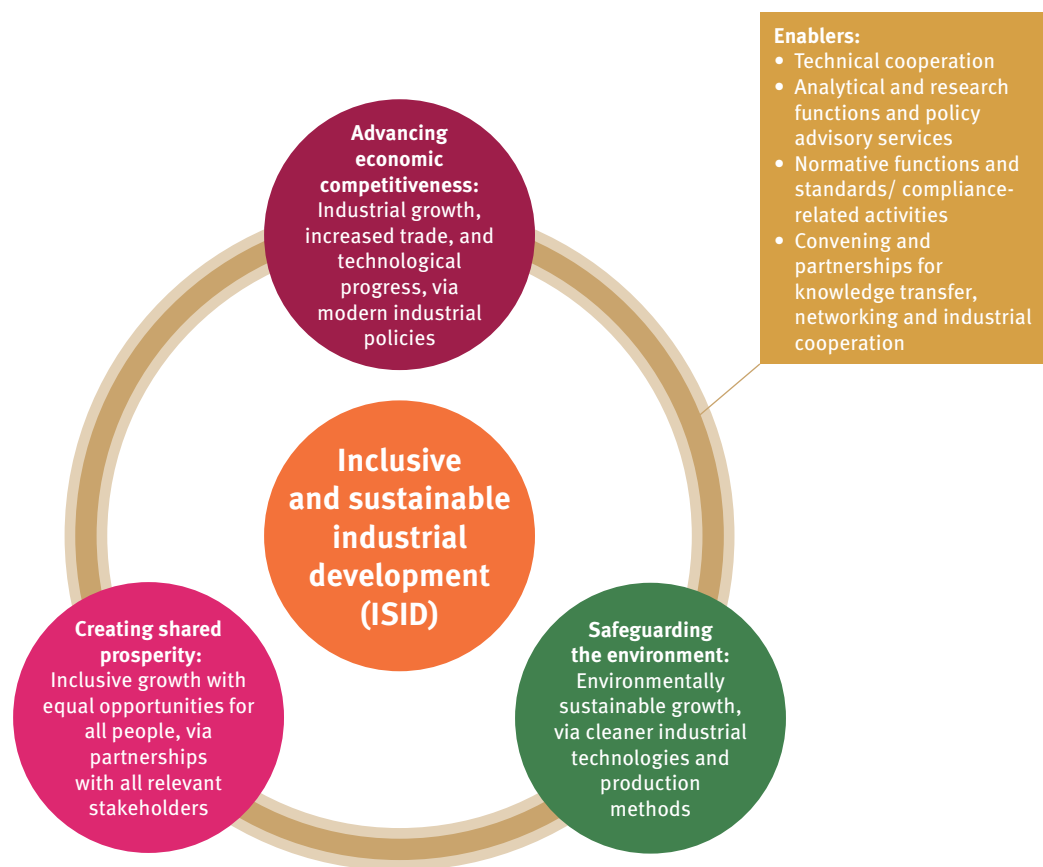

UNIDO programmatic framework for 2016-2019

development agenda to eradicate poverty and advance sustainable development, ISID therefore makes a critical contribution towards addressing the economic, social and environmental dimensions of development in a systemic and holistic manner.

UNIDO's extensive and widely recognized knowledge and expertise in supporting countries in their sustainable industrialization efforts make the Organization a reference institution for the implementation all these industry-related aspects in the SDGs, as well as the follow-up and review of progress towards the related achievements.

In line with the renewed mandates given to both UNIDO and the United Nations development system, the Organization's programmatic approach is guided by three interrelated thematic priorities, each of which represents different aspects of ISID:

Creating shared prosperity: Advancing poverty eradication and inclusiveness, building productive capacities in an inclusive manner, and providing increased opportunities for all women and men as well as across social groups, also through partnerships with all relevant stakeholders involved in the industrialization process;

Advancing economic competitiveness: Advancing rapid economic and industrial growth, fostering entrepreneurship, building trade capacities in industries, and ensuring that all countries can benefit from international trade and technological progress, also through the application of modern industrial policies and compliance with global standards and norms;

Safeguarding the environment: Advancing environmentally sustainable growth, building institutional capacities for greening industries through cleaner production technologies and resource efficiency methodologies, creating green industries, including in fields of waste management and recycling, supporting energy transitions, and implementing the various multilateral environmental agreements.

Strategic partnerships and international industrial cooperation have proven to be innovative and impact-maximizing approaches to address the multidimensional context of economic deprivation, social inequality, and environmental degradation. Hence, any response to achieve poverty eradication and sustainable development – the overarching goal of the new development agenda – will need to consider these approaches if it is to be successful. UNIDO strives to link its ISID priorities with all the 17 SDGs, in order to ensure that, the Organization's programmes, projects and initiatives have positive synergetic effects in supporting the achievement of all the objectives of the 2030 Agenda for Sustainable Development.

UNIDO's contribution to the 2030 Agenda will be most visibly recognized in the progress nations will make on SDG-9. However, according to UNIDO's analysis, the multiplier effect of industrialization on all other areas of development will further reinforce UNIDO's contribution to the achievement of the development goals in their entirety. Directly through its contribution to Goal 9, or indirectly through programmatic or thematic involvement in other SDGs, UNIDO supports the achievement of the agenda at large.

For the sake of simplicity, the present document summarizes the contribution of UNIDO's mandate as well as current and planned future activities vis-à-vis the SDGs, with a special focus on SDG-9, which highlights and affirms the critical importance of ISID and its contribution to all 17 goals.

Contribution of Inclusive and Sustainable Industrial Development to the SDGs

Goal 1: End poverty in all its forms everywhere

The eradication of poverty is the ultimate objective of all development agendas, and as such it is explicitly stated in UNIDO's mandate. The Lima declaration recognizes industrialization as central to achieving longer-lasting wealth creation and economic advancement, both in developing and in industrialized countries.

In the face of a rapidly changing global economic landscape and increasing inequalities, a strategy for sustained growth must ensure a form of industrialization that makes opportunities accessible to all people while distributing income and non-

income gains from prosperity more equally across society. Such a structural transformation associated with the development of a robust and more diversified manufacturing sector and a strengthened agro-industry plays an important role in increasing the ability of countries to constantly generate new and dynamic activities based on upgrading to higher levels of value addition, higher productivity, or higher returns to scale, thus providing decent jobs for a growing share of the population.

Inclusive and sustainable industrial development, when adequately linked to formal job markets and health, safety and environmental standards, is well recognized for having crucial impacts on job creation, sustainable livelihoods, technology and skills development, food security and equitable

the rural poor in productive activities, and enables them to benefit from these activities in ways that recognize the value of their contributions, respect their dignity and improve their ability to bring about positive change in society through improved access to economic resources and opportunities. By ensuring that the benefits of industrialization are shared by all, that the living conditions of all are sustainably improved, and that no one is left behind, ISID can play a central role in the achievement of the ambitious, yet achievable, SDG-1.

On this basis, UNIDO's strategies directed towards poverty reduction aim to enable countries create the necessary conditions for sustaining economic and inclusive growth by unleashing the underutilized assets of the economy and enhancing their potential
