Mobilizing Revenues from Extractive Industries:
Protecting and Promoting Children's Rights and Well-Being
in Resource-Rich Countries

February 2016

UNRISD

United Nations Research Institute for Social Development

The United Nations Research Institute for Social Development (UNRISD) is an autonomous research institute within the UN system that undertakes multidisciplinary research and policy analysis on the social dimensions of contemporary development issues. Through our work we aim to ensure that social equity, inclusion and justice are central to development thinking, policy and practice.

Introduction to Working Papers on Mobilizing Revenues from Extractive Industries: Protecting and Promoting Children's Rights and Well-Being in Resource-Rich Countries

This paper is part of a series of outputs from the UNRISD and UNICEF research project on Mobilizing Revenues from Extractive Industries: Protecting and Promoting Children's Rights and Well-Being in Resource-Rich Countries.

The project seeks to contribute to knowledge creation and institutional learning processes within the partner organizations; to bring knowledge to national and international debates about channelling revenues from mineral extraction towards social policy and investments in children; and to examine public finance mechanisms, economic and social policies, and political conditions that are conducive to this end.

More specifically, it aims to:

- advance knowledge and understanding of the linkages between extractive industries and public policies as they relate to children's rights and well-being in Mongolia, Papua New Guinea and the Philippines; and
- advance knowledge and understanding of the political processes and institutions that impact on revenue mobilization in Mongolia, Papua New Guinea and the Philippines.

For further information on the project visit <http://www.unrisd.org/eiandchildren>.
