CONTENTS

Acknowledgements	v
Abbreviations and acronyms	v
1. Introduction	1
1.1 Purpose of this document	1
1.2 Structure	2
1.3 Target audiences	2
1.4 Interlinkage with efforts and resources to improve the quality of health services	3
PART A. Standards and measurement	
• Minimum Requirements, indicators and resources	
2. Part A. Infection prevention and control in primary care: standards and measurement	5
2.1 Introduction to the minimum requirements for infection prevention and control programmes and associated measurement tools and indicators	5
2.1.1 At-a-glance summary of the minimum requirements for primary care by each core component	8
Core components primary care minimum requirements	8
Core Component 1. IPC programmes	8
Core Component 2. IPC guideline	8
Core Component 3. IPC education and training	8
Core Component 4. HAI surveillance	9
Core Component 5. Multimodal strategies	9
Core Component 6. Monitoring and feedback	9
Core Component 7. Workload staffing & bed occupancy	9
Core Component 8. Built environment, materials and equipment for IPC	9
2.1.2 Minimum requirements at the primary care facility level: what, who, how and why	10
Core Component 1. IPC programmes	10
Core Component 2. IPC guideline	12
Core Component 3. IPC education and training	14
Core Component 4. HAI surveillance	16
Core Component 5. Multimodal strategies	17
Core Component 6. Monitoring and feedback	18
Core Component 7. Workload staffing & bed occupancy	20
Core Component 8. Built environment, materials and equipment for IPC	22

PART B. Implementation resources, with a focus on hand hygiene improvement in primary care

- Implementation approaches (general)
- Hand hygiene implementation
- Resource considerations for hand hygiene improvement

3. Part B. Infection prevention and control in primary care: implementation resources with a focus on hand hygiene improvement	27
3.1 Introduction to implementation and improvement resources	27
3.1.1 General implementation principles and the multimodal improvement strategy	29
3.1.2 3.1.2 The multimodal improvement strategy (MMIS) - Implementing the WHO MMIS for IPC interventions in primary care	30
3.1.3 The 5-step improvement cycle	32
3.1.4 Using the 5-step improvement cycle	33
Step 1. Preparing for action	33
Step 2. Baseline assessment	35
Step 3. Developing and executing the plan	37
Step 4. Assessing impact	39
Step 5. Sustaining the programme over the long term	41
3.2 Hand hygiene improvement in primary care	44
- Application of the 'my five moments for hand hygiene' approach in primary care	45
- Practical examples of hand hygiene requirements in primary care settings	48
- Public vaccination campaign	50
3.3 Resource considerations for hand hygiene improvement in primary care	52
3.3.1 Recap on the multimodal improvement strategy in the context of required resources and investment	53
3.3.2 How a primary care facility can understand its situation and address all five elements of the multimodal improvement strategy	53
Table 3.6 System change ('build it')	55
Table 3.7 Training and education ('teach it')	56
Table 3.8 Monitoring and feedback ('check it')	57
Table 3.9 Reminders and communications ('sell it')	58
Table 3.10 Safety climate/culture change ('live it')	59
Glossary of key terms and definitions	61
Annex 1. Multimodal strategy guiding questions	67
Annex 2. Report template for the findings of the infection prevention and control assessment framework – Minimum requirements	68
Annex 3. Action plan templates	70
References	72

ACKNOWLEDGEMENTS

This document was developed by the World Health Organization (WHO) Department of Integrated Health Services (Universal Health Coverage and Life Course Division). Most of the content is extracted from existing WHO publications and WHO gratefully acknowledges the contributions that many individuals and organizations have made to the development of all of the material referenced throughout this document.

Overall coordination, writing and design of the document

Benedetta Allegranzi (Department of Integrated Health Services) provided strategic directions for the development of the document and contributed to its writing. Julie Storr (infection prevention and control consultant, United Kingdom) and Anthony Twyman (infection prevention and control consultant, Canada) coordinated and led the development of the document; Julie Storr led the writing.

The following WHO staff and experts contributed to the review of the document and are gratefully acknowledged.

Sepideh Bagheri Nejad (Department of Integrated Health Services), Elizabeth Bancroft (Centers for Disease Control and Prevention, USA), Shannon Barkley (Special Programme on Primary Health Care), Ana Paula Coutinho-Rehse (WHO Regional Office for Europe), Claire Kilpatrick (infection prevention and control consultant, United Kingdom), Fernanda Lessa (Centers for Disease Control and Prevention, USA), Benjamin Park (Centers for Disease Control and Prevention, USA), Molly Patrick (Centers for Disease Control and Prevention, USA), Bassem Zayed (WHO Regional Office for the Eastern Mediterranean).

ABBREVIATIONS AND ACRONYMS

ABHR	alcohol-based handrub
AMR	antimicrobial resistance
COVID-19	coronavirus disease 2019
HAI	health care-associated infection
HCW	health care worker
HHSAF	hand hygiene self-assessment framework
IPC	infection prevention and control
IPCAF	infection prevention and control assessment framework
IPCAF-MR	infection prevention and control assessment framework - minimum requirements
PPE	personal protective equipment
SMART	specific, measurable, achievable, realistic and time-bound (objectives)
SOP	standard operating procedures
UNICEF	United Nations Children's Fund
USA	United States of America
USA-CDC	USA-Centers for Disease Control and Prevention
WASH	water, sanitation and hygiene
WASH FIT	water, sanitation and hygiene facility improvement tool
WHO	World Health Organization
