Third-party materials. If you wish to reuse material from this work that is attributed to a third party, such as tables, figures or images, it is your responsibility to determine whether permission is needed for that reuse and to obtain permission from the copyright holder. The risk of claims resulting from infringement of any third-party-owned component in the work rests solely with the user.

General disclaimers. The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall WHO be liable for damages arising from its use.

Design and layout by Ms Sue Hobbs of minimum graphics.

Contents

Acknowledgements	v
Abbreviations	vi
Executive summary	vii
Background	1
Methodology	4
Framework and guidance questions	4
Literature search	5
Systematic reviews	5
Primary studies	5
Grey literature	6
Screening, data extraction and synthesis	8
Synthesis by factor and intervention group	8
Terms used in synthesis	8
Factor 1: Values	9
Children's perceptions, views and understanding of what constitutes healthy and unhealthy food, and implications of its consumption	9
Values on (healthy) options available in and around schools, and factors influencing their choice	10
Values on health outcomes	11
Factor 2: Resource implications	12
Intervention group 1: Nutrition standards or rules that determine the quality of food served or sold in and around schools	12
Intervention group 5: Direct food provision to students in schools	14
Factor 3: Human rights, equity and equality	16
Universal human rights standards	16
Impact on health (in)equity and health (in)equality	19
Intervention group 1: Nutrition standards or rules that determine the quality of food served or sold in and around schools	19
Intervention group 2: Marketing restrictions on unhealthy foods and non-alcoholic beverages in and around schools	20
Intervention group 5: Direct food provision to students in schools	20

Factor 4: Acceptability	23
Intervention group 1: Nutrition standards or rules that determine the quality of food served or sold in and around schools	23
Intervention group 2: Marketing restrictions on unhealthy foods and non-alcoholic beverages in and around schools	32
Intervention group 3: Nudging interventions promoting healthy food behaviour in the school environment	33
Intervention group 4: Pricing policies to promote healthier alternatives	34
Intervention group 5: Direct food provision to students in schools	35
Factor 5: Feasibility	39
Intervention group 1: Nutrition standards or rules that determine the quality of food served or sold in and around schools	39
Intervention group 2: Marketing restrictions on unhealthy foods and non-alcoholic beverages in and around schools	54
Intervention group 3: Nudging interventions promoting healthy food behaviour in the school environment	56
Intervention group 4: Pricing policies to promote healthier alternatives	56
Intervention group 5: Direct food provision to students in schools	57

Acknowledgements

This review of contextual factors on school food and nutrition policies was led by Dr Katrin Engelhardt, of the World Health Organization (WHO) Unit of Safe, Healthy and Sustainable Diet, Department of Nutrition and Food Safety (NFS/CC Healthy Diet). Ms Dorit Erichsen, NFS/CC Healthy Diet, WHO, collected, reviewed and synthesized the evidence, and prepared the first draft of the report. Mr Tomas Allen, Librarian, WHO, reviewed the search protocol and supported the search for the factor on values. Comments on the protocol and the search strategy for the factor on equity and human rights were provided by Ms Rebekah Thomas Bosco, WHO Guideline Review Committee Secretariat. Comments on the search strategy for government searches were provided by Professor Celeste Naude, Associate Professor, Centre for Evidence-based Health Care, Division of Epidemiology and Biostatistics, Stellenbosch University, South Africa, and Co-Director Cochrane Nutrition; Professor Eva Rehfuss, Chair of Public Health and Health Services Research, Ludwig-Maximilians-University, Germany; and Dr Elie Akl, Professor of Medicine, American University of Beirut, Lebanon. Ms Krista Lang, NFS/CC Healthy Diet, WHO, conducted the searches for government reports and supported the finalization of the review.

The review was prepared as part of the required process for WHO guideline development. It was presented to the WHO Nutrition Guidance Expert Advisory Group (NUGAG) Subgroup on Policy Actions at its third meeting, in March 2021.

Technical editing of the review was undertaken by Dr Andina Faragher at Biotext Pty Ltd.

Abbreviations

BIC	Breakfast in the Classroom
CACFP	Child and Adult Care Food Program (United States)
CRC	Convention on the Rights of the Child
FNAB	food and non-alcoholic beverage
