Third-party materials. If you wish to reuse material from this work that is attributed to a third party, such as tables, figures or images, it is your responsibility to determine whether permission is needed for that reuse and to obtain permission from the copyright holder. The risk of claims resulting from infringement of any third-party-owned component in the work rests solely with the user.

General disclaimers. The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall WHO be liable for damages arising from its use.

This publication forms part of the WHO guideline entitled *WHO guideline on school health services*. It is being made publicly available for transparency purposes and information, in accordance with the *WHO handbook for guideline development*, 2nd edition (2014).

A glossary of terms used throught the guidance and its web annexes is provided in the guidance document.

Web Annex H

Menu of interventions with WHO sources

Table. H.I shows the menu of 87 interventions that the Guideline Development Group (GDG) identified as essential or suitable within school health services (SHS), organized by health area, type of health activity, WHO source and specific GDG categorization. Importantly, many interventions could have been placed in multiple cells of the menu, but, for the sake of simplicity and clarity, only one cell has been selected for each intervention. Also, summary names of interventions have been used in this menu; the full, precise wording of each intervention is given in Table 7 of the SHS guideline. This at-a-glance menu is linked to a compendium (Web Annex A) that details the published global WHO evidence base and specific procedures or activities for each of the 87 interventions.
