# Acknowledgements

This report was developed with support from the World Health Organization (WHO) to respond to the strategic programming needs for adolescent health as defined by the Ministry of Health, Community Development, Gender, Elderly and Children, in the United Republic of Tanzania. Additionally, the assignment was conducted to pilot the draft WHO handbook for conducting an adolescent health services barriers assessment (AHSBA), with a focus on disadvantaged adolescents, developed in 2018. The handbook is one manifestation of WHO's Thirteenth General Programme of Work 2019–2023 on reducing barriers to health services on the path to universal health coverage. The pilot is intended to inform broader assessments of barriers to health services and work done on integration of equity, gender and human rights into policies and programming in the United Republic of Tanzania and beyond.

The assessment in the United Republic of Tanzania was managed by Gerald Kihwele of the Reproductive and Child Health Section of the Ministry of Health, Community Development, Gender, Elderly and Children, and Theopista Kabutani from the WHO Country Office in the United Republic of Tanzania. To ensure this work is in line with national priorities and strategic focus for adolescent health, the assessment leaders worked with the National Technical Working Group, which comprises multisectoral stakeholders that coordinate and provide strategic oversight of national adolescent health programming.

The assessment was commissioned to Emmanuel Matechi (independent consultant) who worked closely with Bruno Sunguya (Muhimbili University of Health and Allied Sciences) and Linda Mlunde (Implementation Science Tanzania). Their work was supported by three research assistants.

Special gratitude goes to Tigest Ketsela Mengestu (WHO Representative for Tanzania), Princess Nothemba Simelela (Assistant Director-General, WHO headquarters, Family, Women's and Children's Health), Anshu Banerjee (Director, WHO headquarters, Maternal, Newborn, Child and Adolescent Health) and Felicitas Zawaira (Director, WHO Regional Office for Africa, Family and Reproductive Health) for their overarching strategic guidance for this work.

The assessment team wishes to recognize the invaluable inputs and contributions offered by the WHO Country Office in the United Republic of Tanzania, and the Reproductive and Child Health Section of the Ministry of Health, Community Development, Gender, Elderly and Children. Special thanks go to the President's Office for Regional Administration and Local Government, through which the team obtained necessary permissions, support and guidance in conducting the subnational data collection.

Further, the team is indebted to the technical support provided by the WHO Regional Office for Africa (Taiwo Oyelade) and WHO headquarters (Julia Lynn Samuelson, Katherine Gilchrist, Mary Louisa Plummer [consultant], Theadora Swift Koller and Wole Ameyan). The global and country teams provided regular feedback on all assessment plans and outputs. Special appreciation goes to Katherine Gilchrist for her role in facilitating the working methods of the project team. We also wish to thank all participants of key informant interviews and focus group discussions who voluntarily contributed to this report.

Globally, the work towards the handbook for conducting an adolescent health services barriers assessment was designed and commissioned by WHO through a cross-departmental technical collaboration led by Theadora Swift Koller (Technical Officer, Equity, Family, Women's and Children's Health/Gender, Equity and Human Rights) and David Ross (Medical Officer, Research and Development, Maternal, Newborn, Child and Adolescent Health/Research and Development) of WHO headquarters, under the general direction of Veronica Magar (Team Leader, Family, Women's and Children's Health/Gender, Equity and Human Rights) and Rajiv Bahl (Coordinator Research and Development, Maternal, Newborn, Child and Adolescent Health/Research and Development).

The lead author for the global handbook is Mary Louisa Plummer, WHO Consultant on Adolescent Health and Gender, Equity and Human Rights.

This material has been funded by UK Aid from the Government of the United Kingdom of Great Britain and Northern Ireland. However, the views expressed may not necessarily reflect the Government of the United Kingdom's official policies.
