

Priority medical devices list for the COVID-19 response and associated technical specifications

INTERIM GUIDANCE

19 NOVEMBER 2020

Priority medical devices list for the COVID-19 response and associated technical specifications

INTERIM GUIDANCE

19 NOVEMBER 2020

Contents

ACKNOWLEDGEMENTS	v
ABBREVIATIONS	vii
1. INTRODUCTION	1
1.1 Objective	1
1.2 Target audience	3
1.3 Methodology	3
1.4 Considerations	5
References	5
PART A: LIST OF PRIORITY MEDICAL DEVICES IN THE CONTEXT OF COVID-19	7
2. PRIORITY MEDICAL DEVICES IN THE CONTEXT OF COVID-19	9
2.1 Interventions by clinical area	9
2.2 Navigation diagram	11
2.3 Priority medical devices by clinical area	12
2.4 Medical devices for case management of severe and critical patients by health facility level	16
Resources	23
PART B: TECHNICAL SPECIFICATIONS	25
3. TECHNICAL SPECIFICATIONS FOR OXYGEN THERAPY AND MONITORING DEVICES	27
3.1 Context and considerations	27
3.2 Definitions and intended use	28
3.3 Technical specifications for procurement	33
3.3.1 Oxygen supply devices	33
3.3.1.1 Oxygen concentrator	33
3.3.1.2 Oxygen cylinder	35
3.3.2 Oxygen delivery devices	39
3.3.2.1 Nasal oxygen cannula with prongs	39
3.3.2.2 Mask with reservoir bag	40
3.3.2.3 Venturi mask	41
3.3.3 Devices for oxygen regulation and conditioning	42
3.3.3.1 Flowmeter, Thorpe tube	42
3.3.3.2 Flow splitter	43
3.3.3.3 Non-heated bubble humidifier	44
3.3.3.4 Tubing (for medical gases)	45
3.3.4 Self-inflating resuscitation bag with mask (Manual resuscitator)	46
3.3.5 Heat and moisture exchanger filter (HMEF)	47
3.3.6 Colourimetric end-tidal CO ₂ (EtCO ₂) detector	47
3.3.7 Pulse oximeter	48
3.3.7.1 Pulse oximeter: handheld	48
3.3.7.2 Pulse oximeter: tabletop	49
3.3.7.3 Pulse oximeter: fingertip	51

3.3.8 Patient monitor multiparametric	53
3.3.8.1 Patient monitor multiparametric: basic – for non-invasive blood pressure (NIBP) and oxygen saturation (SpO ₂) (with accessories).	53
3.3.8.2 Patient monitor multiparametric: intermediate – for ECG, non-invasive blood pressure (NIBP), oxygen saturation (SpO ₂), respiratory rate (RR) and temperature (TEMP) (with accessories).	55
3.3.8.3 Patient monitor multiparametric: advanced – for ECG, CO ₂ , invasive blood pressure (IBP), non-invasive blood pressure (NIBP), oxygen saturation (SpO ₂), respiratory rate (RR) and temperature (TEMP) (with accessories).	57
Reference	59
Resources	59
4. TECHNICAL SPECIFICATIONS FOR INVASIVE AND NON-INVASIVE VENTILATORS	61
4.1 Context and considerations	61
4.2 Definitions and intended use	62
4.3 Technical specifications for procurement	64
4.3.1 Invasive ventilators	64
4.3.1.1 Invasive ventilator – intensive care unit	64
4.3.1.2 Invasive ventilators – transport	66
4.3.1.3 Invasive ventilators – sub-acute care	68
4.3.2 Non-invasive ventilators	71
4.3.2.1 Non-invasive ventilators – continuous positive airway pressure (CPAP)	71
4.3.2.2 Non-invasive ventilators – bilevel positive airway pressure (BiPAP/BPAP)	73
4.3.2.3 Non-invasive ventilators – high-flow nasal cannula (HFNC)	75
5. TECHNICAL SPECIFICATIONS FOR INFUSION DEVICES	77
5.1 Context and considerations	77
5.2 Definitions and intended use	78
5.3 Technical specifications for procurement	79
5.3.1 Infusion pump	79
5.3.2 Syringe pump	81
5.3.3 Drop counter	83
Resources	84
6. TECHNICAL SPECIFICATIONS FOR COMPLEMENTARY MEDICAL EQUIPMENT TO SUPPORT COVID-19 MANAGEMENT	85
6.1 Context and considerations	85
6.2 Technical specifications for procurement	86
6.2.1 Infrared thermometer	86
6.2.2 Digital thermometer	89
6.2.3 Electrocardiograph, portable	93
6.2.4 Laryngoscope	98
6.2.5 Video-laryngoscope	101
6.2.6 Suction pump, electric	105
6.2.7 Suction pump, manual	109
6.2.8 Blood gas analyser, portable	112
Resources	115

7. TECHNICAL SPECIFICATIONS FOR AIRWAY AND ICU CONSUMABLES AND SINGLE-USE MEDICAL DEVICES	117
7.1 Context and considerations	117
7.2 Technical specifications for procurement	118
7.2.1 List of airway and ICU consumables and single-use medical devices	118
Resources	138
8. TECHNICAL SPECIFICATIONS FOR IMAGING EQUIPMENT	139
8.1 Portable ultrasound scanner	140
8.1.1 Context and considerations	140
8.1.2 Definitions and intended use	141
8.1.3 Technical specifications for procurement	142
References	145
Resources	145
8.2 Mobile digital radiography system	146
8.2.1 Context and considerations	146
8.2.2 Definitions and intended use	146
8.2.3 Technical specifications for procurement	147
Reference	150
Resources	150
8.3 Computed tomography (CT) scanning system	152
8.3.1 Context and considerations	152
8.3.2 Definitions and intended use	153
8.3.3 Technical specifications for procurement	154
References	161
Resources	161

Acknowledgements

The development and production of this publication was coordinated by Adriana Velazquez Berumen, Medical Devices and In Vitro Diagnostics, World Health Organization (WHO), Geneva, Switzerland.

Continued support was gratefully received from WHO staff: Janet Diaz (Lead, Clinical Care, Health Emergencies Programme; Antoine Delaitre (Operations, Support and Logistic, Health Emergencies Programme); regional advisors on health technology: Tifenn Humbert (Regional Office for Europe), Houda Langa (Regional Office for the Eastern Mediterranean), Alexandre Lemgruber (Pan American Health Organization [PAHO]), and through consultation with other WHO regional and country staff.

For the imaging equipment chapter, special acknowledgements go to the core working group, which included WHO staff: Pablo Jimenez (PAHO); Maria del Rosario Perez, Pryanka Relan and Emilie van Deventer (WHO headquarters); and staff from the International Atomic Energy Agency (IAEA) Division of Human Health: from the Nuclear Medicine and Diagnostic Imaging Section, Enrique Estrada Lobato, Francesco Giammarile, Miriam Mikhail Lette, Diana Paez, Olivier Pellet; and from the Dosimetry and Medical Radiation Physics Section, Virginia Tsapaki – all of whom provided expert input to the development of the guidance on ultrasound, portable X-ray unit and CT scanner specifically for the diagnosis and management of COVID-19.

WHO acknowledges the following international WHO consultants who drafted and provided input to all chapters: Francesco Ribolzi; with expert input from Ingrid Lara, Gabriela Jimenez Moyao; and regional consultants: Claudio Meirovich (Regional Office for Europe) and Nilda Enríquez, and Alfonso Rosales (PAHO).

WHO is very grateful to the following consultants and experts for their inputs to specific chapters:

Priority medical devices for COVID-19: Adriana Velazquez and WHO consultant, Valeria Montant, who drafted this chapter. In vitro diagnostics input from: Ana Elisa Aceves and Mercedes Perez Gonzalez (WHO).

Oxygen delivery and monitoring devices: Beverly Bradley (United Nations Children's Fund [UNICEF]); Riad Farah (Medical Engineering Manager at Saint George Hospital, University Medical Center, Beirut) and Tobey Clark, Bill Gentles and Alan Vazquez (expert clinical engineers); Laura Alejandra Velez Ruiz Gaitan (WHO); Andrew Gammie (UNICEF consultant).

Invasive and non-invasive ventilators: Laura Alejandra Velez Ruiz Gaitan (WHO), Tobey Clark and Alan Vazquez. Michael Lipnick (University of California San Francisco) and Richard Kallet (San Francisco General Hospital), both members of the WHO expert respiratory panel.

Infusion devices: Riad Farah and Bill Gentles.

Imaging equipment: ultrasound, portable X-ray unit and CT scanner: for the ultrasound scanner, WHO is grateful to Laura Alejandra Velez Ruiz Gaitan for drafting the specifications and to experts: Jocelyne M Basseal (Faculty of Health and Medicine, University of Sydney), Daniel Kaminstein (Medical College of Georgia at Augusta University), Michael G Kawooya (Ernest Cook Ultrasound Research and Education Institute, Kampala) and Konstantin Yastrebov (St George & Sutherland Clinical School, University of New South Wales) who provided technical input. For X-ray and CT scanner, thanks go to Eliseo Vano (Radiology Department, San Carlos University Hospital, Madrid). The three imaging devices – ultrasound, portable X-ray and CT scanner – were reviewed by the following members of the organizations listed below and all comments were addressed by the core WHO-IAEA group. Therefore, WHO is grateful to:

International Electrotechnical Commission (IEC): Norbert Bischof.

International Organization for Medical Physics (IOMP): Abdalla Al-Haj, John Damilakis, Geoffrey Ibbott, Mahadevappa Mahesh, Madan Rehani.

International Organization for Standardization (ISO): Alain Rannou.

International Society of Radiographers and Radiological Technologists (ISRRT): Donna Newman, Stewart Whitley.

International Society of Radiology (ISR): Ivana Blazic.

World Federation for Ultrasound in Medicine and Biology (WFUMB): Jacques S Abramowicz.

Representing the member organizations from the Global Diagnostic Imaging, Healthcare IT & Radiation Therapy Trade Association (DITTA): Nicole Denjoy.

It should be noted that non-United Nations staff contributors completed Declaration of Interests forms, which were reviewed by WHO and no conflict of interests were found.

Thanks also go to copyeditor Vivien Stone (Etchingham, United Kingdom of Great Britain and Northern Ireland) and to L'IV Com Sàrl (Villars-sous-Yens, Switzerland) for the design and layout.

Thank you to Riad Farah and Ziad Ghazali for providing the cover photo, taken at Saint George Hospital, University Medical Center, Beirut, 12 November 2020.
