<b>Executive summary</b>	vii
<b>Acknowledgements</b>	xiv
<b>Acronyms and abbreviations</b>	xvii
<b>1 Introduction</b>	1
1.1 Purpose of this report	1
1.2 Scope of this report	1
1.3 Background	2
1.4 Overview of contents	6
<b>2 Occurrence of microplastics in fresh water and drinking-water</b>	8
2.1 Introduction	8
2.2 Sources and transport of microplastics into water	8
2.3 General principles of sampling and analysis	12
2.4 Overall reliability of studies	14
2.5 Microplastic concentrations reported in fresh water	16
2.6 Microplastic concentrations reported in drinking-water	17
2.7 Particle size, shape and polymer type in fresh water and drinking-water	20
2.8 Other routes of exposure	20
2.9 Conclusions and research needs	24
<b>3 Possible human health risks associated with microplastics in drinking-water: particles and chemicals</b>	26
3.1 Introduction	26
3.2 Potential hazards associated with particles	27
3.3 Potential hazards associated with monomers, additives and sorbed chemicals	31
3.4 Assessing possible risks from microplastics	34
3.5 Conclusions and research needs	42
<b>4 Possible human health risks associated with microplastics in drinking-water: biofilms</b>	44
4.1 Introduction	44
4.2 Characteristics of plastics and microorganisms that influence biofilm formation	44
4.3 Potential concerns associated with microplastic-associated biofilms in water	45

4.4	Distribution and risk of microplastic-associated biofilms in drinking-water . . . . .	46
4.5	Conclusions and research needs . . . . .	48
<b>5</b>	<b>Treatment technologies for removing microplastics from water . . . . .</b>	<b>50</b>
5.1	Introduction . . . . .	50
5.2	Wastewater treatment . . . . .	51
5.3	Drinking-water treatment . . . . .	54
5.4	Considerations for drinking-water and wastewater treatment sludge . .	58
5.5	Conclusions and research needs . . . . .	59
<b>6</b>	<b>Managing plastic and microplastic pollution in the environment . . . . .</b>	<b>61</b>
6.1	Benefits of managing plastic and microplastic pollution . . . . .	61
6.2	Responses to growing concern over plastic pollution . . . . .	61
6.3	Options to curb plastic and microplastic pollution . . . . .	62
<b>7</b>	<b>Conclusions, recommendations and knowledge gaps . . . . .</b>	<b>64</b>
7.1	Conclusions . . . . .	64
7.2	Recommendations . . . . .	68
7.3	Knowledge gaps and research needs . . . . .	69
	<b>References . . . . .</b>	<b>71</b>
	<b>Annex 1: Systematic review and other studies of microplastics in fresh water and drinking-water . . . . .</b>	<b>88</b>
A.1	Overview of systematic review . . . . .	88
A.2	Systematic review methods . . . . .	88
A.3	Overview of systematic review results . . . . .	91
A.4	Summary of drinking-water studies . . . . .	96
A.5	References . . . . .	100
	<b>Figures</b>	
1.1	Global plastic production . . . . .	5
1.2	Total non-fibre plastic production in Europe . . . . .	5
2.1	Examples of routes by which plastics and microplastics enter and move in the freshwater environment and how microplastics may reach drinking-water . . . . .	12
	<b>Tables</b>	
2.1	Polymer densities . . . . .	9
2.2	Summary of reported microplastic particle numbers from freshwater studies that scored highest for quality . . . . .	16
2.3	Summary of reported microplastic or microplastic-like particle numbers and particle characteristics from drinking-water studies . . . . .	18

3.1 Exposure assumptions to assess microplastic intake in drinking-water, along with rationale and associated level of conservatism . . . . .	37
3.2 Additional exposure assumptions to assess chemicals associated with microplastics in drinking-water, along with rationale and associated level of conservatism. . . . .	38
3.3 Upper-bound daily intake estimates of chemicals from microplastics, maximum levels of contaminants associated with microplastics, and corresponding MOE . . . . .	40
5.1 Summary of microplastic removal reported from wastewater treatment studies . . . . .	53
7.1 Summary of key hazards associated with microplastics in drinking-water and estimated health risk. . . . .	66
A.1 Overview of individual and accumulated scores from studies reporting microplastic concentrations in drinking-water, fresh water and wastewater. . . . .	92

## Boxes

1.1 The risk of microplastics to aquatic ecosystems . . . . .	1
2.1 Lack of sewage treatment: the bigger problem? . . . . .	10
2.2 Recommendations to improve sampling and analytical methods . . . . .	15
2.3 Interpretation and comparison of occurrence studies. . . . .	17
3.1 Risk is a function of toxicity and exposure . . . . .	26
5.1 Data limitations . . . . .	50
